The KITE Assessment provides opportunities for flexible assessment administration. However, all KITE assessments - including instructionally embedded assessments chosen by the teacher and delivered during the year 2016 are secure tests.

Test administrators and other educational staff who support KITE implementation are responsible for following the KITE test security standards:

1. Assessments (testlets) are not to be stored or saved on computers or personal storage devices, shared via email or other file sharing systems, or reproduced by any means.
2. Except where explicitly allowed as described in the Test Administration Manual, electronic materials used during assessment administration may not be printed.
3. Those who violate the KITE test security standards may be subject to their state's regulations or state education agency policy governing test security.
4. Educators are encouraged to use resources provided by KITE, including practice activities and released testlets, to prepare themselves and their students for the assessments.
5. Users will not give out, loan or share their password with anyone else.
