Initial Precursor and Distal Precursor Linkage Level Relationships to the Target

How is the Initial Precursor related to the Target?

Figuring out when events in a story are represented out of order requires students to understand sequence. Students at the Initial Precursor linkage level can start working on sequence by identifying the next steps in familiar routines. In the context of repeated shared reading, teachers can use the DLM Familiar Texts aligned with this Essential Element and linkage level to help students attend to the steps or events in familiar routines and learn to identify what step comes next at different points in the routine.

How is the Distal Precursor related to the Target?

Determining which citations demonstrate explicit and inferential understandings of text requires students to be able to read and understand what the text says explicitly. Students at the Distal Precursor level are learning to read or listen in order to answer explicit questions about the text.
