

Parent Portal Transcript

No real student or parent data was used in this video. Not all states currently use Parent Portal.

This video is intended for parents and/or guardians to demonstrate how to view score reports.

Welcome to the Kite Parent Portal.

Enter the email address you provided to your school district on the login page and click Get Started.

An email will be sent with an access code. Enter your code by either manually typing it or copy and paste.

On the home screen, you will see an overview of your student's assessments and the students assigned to your account.

To view student reports, find the students you have registered below and click on View Reports below your student's name.

Here, you can use the navigation menu to return home, select a different subject, or choose a different student.

You may select a different subject by using the dropdown menu. Specific information to the assessment program will be shown on the screen.

The table below provides the report year, school, and grade level in which your student has participated in this assessment.

To view your student's full report, click the PDF icon.

The score report will open a new tab in your web browser.

The most current year will also include an audio report tour that can be controlled using the play buttons beside the report.

If you have multiple students, you can select their name from the dropdown menu below the student's name.

Please see the Parent Portal user guide for more information or contact the district test coordinator in your student's district for additional help.
