*When contacting the Kite Service Desk:

- **Do not send any Personally Identifiable Information** (PII) for a student via email. This is a federal violation of the Family Education Rights and Privacy Act (FERPA). PII includes information such as a student’s name or State Student Identifier number. Each state has unique PII requirements. Please check with your district assessment coordinator to find out what student information can be legally emailed in your state.

- Do send
  - your contact information (email address and name)
  - your school (include the district if contacting state-level personnel)
  - error messages, including the testlet number if applicable to the problem.

AUDIENCE AND PURPOSE

The Educator Portal User Guide for the Dynamic Learning Maps® (DLM®) alternate assessment provides users, particularly users with the role of Teacher in Educator Portal, with step-by-step procedures for using Educator Portal for the assessment. Educator Portal users (e.g., teachers, assessment coordinators, and data managers) manage student information and access reports in Educator Portal.

INTRODUCTION

ABOUT THE DYNAMIC LEARNING MAPS ALTERNATE ASSESSMENT SYSTEM

The Dynamic Learning Maps® (DLM®) Alternate Assessment System assesses what students with the most significant cognitive disabilities know and can do in grades 3–8 and high school. State departments of education determine which subjects and grades are assessed in each state. The DLM system provides accessibility by design and is guided by the core beliefs that all students should have access to challenging grade-level content, and that test administrators must adhere to the highest levels of integrity in providing instruction and in administering assessments based on this challenging content.

ABOUT THE KITE SUITE AND EDUCATOR PORTAL

The Kite® Suite was designed to deliver the next generation of large-scale assessments and was tailored to meet the needs of students with the most significant cognitive disabilities, who often have multiple disabilities. Educators and students use two of the four applications in the Kite Suite.

Only students log in to Kite Student Portal.

Kite Student Portal is the customized, secure interface test administrators use to deliver DLM alternate assessment to students. Students log in with their own unique username and password, which the test administrator provides. Once Student Portal is launched, students are prevented from accessing websites or other applications during the assessment. Practice activities and released testlets are also available through Student Portal with demo usernames and passwords. Educators and staff do not have accounts in Student Portal.

Staff and educators have accounts in Kite Educator Portal.

Kite Educator Portal is the administrative application in which staff and educators manage student data and retrieve reports. Users can access Educator Portal via https://educator.kiteaai.org. For information about uploading user, enrollment, and roster records in Educator Portal, see the DATA MANAGEMENT MANUAL on the DLM website.

HOW TO USE THE DLM WEBSITE

Additional resources for test administrators are available on the DLM website. In addition to the DLM Consortium-provided resources, state-specific resources may also be available. Bookmark your state webpage or save it to your favorites for quick access later.
To access resources for your state and role, follow these steps.

1. Go to the DLM website.
2. Hover over the States tab to reveal a list of states.
3. Select your state.

**Resources on the DLM Website**

The following table lists DLM resources designed for test administrators. These resources are available on most state webpages.

<table>
<thead>
<tr>
<th>Resource</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Test Administration Manual (PDF)</strong></td>

</tr>
<tr>
<td>Test Updates Page (webpage)</td>
<td>Provides breaking news on test administration activities. Register to receive alerts when new resources become available. See Test Updates.</td>
</tr>
</tbody>
</table>
This manual will discuss Educator Portal as it relates to the two state models, Year-End and Instructionally Embedded.

**Year-End Model**
Year-End model states have required testing in the spring assessment window but may optionally participate in the instructionally embedded assessment window during the fall and winter months. Those states are

- Alaska
- Colorado
- Delaware
- Illinois
- Maryland
- New Hampshire
- New Jersey
- New Mexico
- New York
- Oklahoma
- Pennsylvania
- Rhode Island
- Utah
- West Virginia
- Wisconsin

Plus, the District of Columbia and Miccosukee. See [States Affiliated with BIE](#) on the DLM website.

**Instructionally Embedded Model**
Instructionally Embedded model states have required testing in two instructionally embedded windows, a fall window and a spring window. Those states are

- Arkansas
- Iowa
- Kansas
- Missouri
- North Dakota

**Restrictions for Year-End Model States in the Spring Assessment Window**
Access to the Test Management screen in Educator Portal in the spring assessment window is restricted for a test administrator (educators with the Educator Portal role of Teacher) until:

- All Required Test Administrator Training modules are completed with a passing score of 80% or higher on each post-test.
- The security agreement in Educator Portal is read, agreed to, and signed.

**HINT:** For a Year-End model state participating in the instructionally embedded assessment window, the ability to create plans and assign testlets in the Instruction and Assessment Planner is also restricted until those two requirements are complete.
Users who have not completed each requirement will receive one of the following error messages.

- Access to Test Management is restricted due to incomplete Required Test Administrator Training. You must complete all Required Test Administrator Training before receiving access to Test Management.
- Access to Test Management is restricted because the user has not accepted and completed the annual security agreement. All previously accepted security agreements expire the first week of August. You must read, sign, and accept this year’s security agreement in Educator Portal before receiving access to Test Management.
- Access to Test Management is restricted due to missing annual requirements. All previously accepted security agreements expire the first week of August. You must read, sign, and accept this year’s security agreement in Educator Portal and complete all Required Test Administrator Training before receiving access to Test Management.

**Restrictions in the Instruction and Assessment Planner For Instructionally Embedded States**

Test administrators (educators with the Educator Portal role of Teacher) will not be able to create plans for students and assign testlets in the Instruction and Assessment Planner until the assessment window is open and the following have been completed.

- They have read, agreed to, and signed the security agreement.
- They have completed all Required Test Administrator Training modules with a passing score of 80% or higher on each post-test.
- The student is listed on their rosters for the correct subjects for the DLM alternate assessment.
- The First Contact survey has been completed and submitted for each student on their rosters.

**HINT:** Ensure the student is assigned to the correct grade level and subject in Educator Portal.

The data manager or assessment coordinator can correct grade or roster information and help with any of the above problems.

**Common View Access Issues**

A user’s role in Educator Portal may limit their access to view tabs, features, or data. If a user cannot access needed information, they may need to be assigned a new or additional role in Educator Portal. Go to Assign a User Role or Multiple Roles in the DATA MANAGEMENT MANUAL.
EDUCATOR PORTAL PROCEDURES

MANAGE USER ACCOUNT FOR ALL STATES

ACTIVATE EDUCATOR PORTAL ACCOUNT

This procedure is required for all first-time DLM alternate assessment users.

HINT: If you already activated your Kite Educator Portal account and received your username and password, proceed to Getting Started in Educator Portal on page 11.

1. Users will receive a Kite® Suite activation email message from kite-support@ku.edu.

The activation email is sent only after the state or district data manager uploads your user information into Educator Portal. If you did not receive an activation email message, then ask your data manager to resend the Kite activation email or wait for them to upload your user information.

2. Select the link in the message. The Activate User screen appears.
3. Fill out the fields and select **Activate**.

![Activate User Form](image)

4. You will receive a confirmation message. Select **Back To Login**.

![Confirmation Message](image)

**GETTING STARTED IN EDUCATOR PORTAL**

HINT: Kite Educator Portal is a secure, web-based application that may be accessed using any supported web browser. For a list of supported web browsers, see [KITE Suite Requirements](#) on the DLM website.

To log in to Educator Portal, follow these steps.

1. Using a supported web browser, go to [https://educator.kiteaai.org](https://educator.kiteaai.org).
2. Complete these fields on the Sign In screen.
   - Username (usually your email address, all lowercase)
   - Password (case sensitive)
3. Select **Sign In**.

To reset your Educator Portal password, follow these steps.

1. Go to [Educator Portal](#).
2. Select **Forgot Password?**

   ![Sign In to Educator Portal](image)

3. Enter your Username.

   ![Forgot Password](image)

4. Select **Submit**.

5. A notification will appear stating that the password reset request has been received.

   ![Forgot Password](image)

   **Thank you. Your password reset request has been received. Please contact technical support if you continue to experience problems.**
6. **kite-support@ku.edu** will send a password reset email within one hour. If this automated message does not arrive after an hour, check junk or spam folders.

7. Select the link in the message.

8. Enter your Username and type a new password. Confirm the new password.

9. Select **Submit**.

10. Select **Return to Kite Login Page**.
**CHANGE PASSWORD**

To change your password, follow these steps.

1. Select My Profile.

![](MY_PROFILE.png)

2. Select the **Change Password** tab.
3. Complete these fields in the tab.

![My Profile](My_Profile.png)

4. Select **Save**.
5. Select X to close the pop-up window.

Never give out, loan, or share your password with anyone. Allowing others to access your Educator Portal account may cause unauthorized access to private information. Access to educational records is governed by federal and state law.

**COMPLETE THE SECURITY AGREEMENT**

All educators with an account in Educator Portal must read, agree to, and sign the security agreement. The security agreement expires each year during the last week of July or the first week of August and must be renewed through Educator Portal. Test administrators are expected to deliver the DLM assessments with integrity and maintain the security of testlets.

If test administrators do not agree to the security agreement and complete the Required Test Administrator Training, they will not have access to student information in the Instruction and Assessment Planner nor on the Test Management screen in Educator Portal and cannot deliver assessments.
HINT: Ask your district assessment coordinator for additional guidance on state and district test security policies and procedures for reporting testing irregularities.

1. To complete the security agreement, go to My Profile.

2. Select the Security Agreement tab.

3. Choose the first option to agree to follow the standards, then type in your name.

4. Select Save.

HINT: If you accidentally select DO NOT agree in the security agreement, go back to My Profile and agree to follow the standards.
**Change Display Name**

The display name is the name that shows when users log in to the application. The default display name is the first name and last name that were defined when the user account was created by the data manager. Changing your display name is optional.

To edit your display name, follow these steps.

1. Select **My Profile**.

   ![My Profile](image)

2. Select the **Edit Display Name** tab.

3. Type your **Display Name**.

   ![Edit Display Name](image)

4. Select **Save**.

5. Select **X** to close the pop-up window.

**Change User Role View**

If users require multiple roles (because of responsibilities in different buildings or districts), the data manager can set up access with those roles, and users are able to switch roles to view the students in each building or district. The role name is followed by the organization and assessment program. Select the drop-down arrow to choose the desired role, organization, and assessment program. The role must be selected before the organization(s) and assessment program(s) matching that role become available.
CHANGE DEFAULT ROLE, ORGANIZATION, AND ASSESSMENT PROGRAM

The default role, organization, and assessment program impact the view that appears when users first log in to Educator Portal. Data managers define the default role, organization, and assessment program for each user when creating accounts. Changing these is optional.

To change the default role, organization, and assessment program, follow these steps.

1. Select My Profile.

2. Select the Change Default Role tab.
3. Choose a new default role, if desired.

![Image showing the default role setup with Teacher as the role, Training School as the organization, and DLM as the assessment program.]

4. Select **Save**.

5. If the role spans across more than one organization or assessment program, the default for those roles can be set through the drop-down menus for each in Change Default Role in Educator Portal.

![Image showing a My Profile page with District Test Coordinator as the role, Demo as the organization, and DLM as the assessment program.]

**NOTE:** Kansas has more than one assessment program in Educator Portal. Therefore, some Kansas users may have more than one program option in the drop-down menu.

6. Select **X** to close the pop-up window.

**MANAGE STUDENT DATA FOR ALL STATES**

Procedures in this section are the primary responsibility of the test administrators (i.e., users with the Teacher role in Educator Portal). Building- and district-level Educator Portal users may also use these procedures to manage student data, although their view of the screens in
Educator Portal differ from a test administrator’s view. Data managers should refer to the DATA MANAGEMENT MANUAL for recommended procedures.

All users are responsible for confirming that student data is accurate and for correcting inaccurate data. Ensuring accurate data at the beginning of the school year helps guarantee accurate test administration and Individual Student Score Reports at the end of the school year. Actions such as validating the correct grade and checking the spelling of names are vital to this process.

VIEW AND CHECK STUDENT DATA

HINT: When a student leaves or joins a classroom after a required assessment window has opened, their test administrator may need to notify the district or building test coordinator who has the permissions in Educator Portal to add, exit, or transfer the student as needed. The student can then receive testlets and have accurate records.

Every year, the First Contact survey must be submitted for each student. Although not required, the Personal Needs and Preference (PNP) Profile should be reviewed every year to take advantage of supports that may benefit a student.

- **Option 1:** As soon as students are enrolled and rostered to their teacher, a teacher can complete the PNP Profile and First Contact Survey. Refer to Complete the PNP Profile on page 28 and Complete the First Contact Survey on page 39.
- **Option 2:** As soon as the instructionally embedded window opens for a state and the student is enrolled and rostered to their teachers, a teacher can complete both the First Contact survey and the PNP Profile within the Instruction and Assessment Planner. More information about the Instruction And Assessment Planner can is on page 55.

To view and check student records, follow these steps.

1. Select **Settings**.

2. Select **Students** from the drop-down menu.
3. Select **Search**.

![Search interface](image)

**HINT:** If applicable, apply filters in the Select Organization fields to choose the necessary level (e.g., if a test administrator is responsible for students from more than one district or building).

4. Sort, filter, move columns left or right, hide columns, and search as needed.

![Table interface](image)

**HINT:** Users can customize the view of each table in order to make work easier and more efficient. Select the kebab menu (three vertical dots) in a column header to sort the column in ascending or descending order, filter, add or remove columns from the table, and lock specific columns in place. Select and drag a column header to reorder the columns in the table to best suit your needs.

5. Review the **State Student Identifier, First Name, Last Name, and Grade** fields for accuracy. Data in these fields will appear on the Individual Student Score Report. Make any necessary corrections before proceeding.
   - If all fields are accurate for all students, go to the next step.
• If one or more fields contain incorrect information for one or more students, then **Stop! Do not proceed until student data is correct.** Do not enter First Contact survey or PNP Profile data for these students. Do not attempt to test these students. Contact your assessment coordinator or data manager to have the information corrected.

6. Use the scroll bar to view the PNP Profile survey column. Does the link read Custom?
   • If yes, go to the next step.
   • If no, go to Complete the PNP Profile on page 28 of this manual. The PNP Profile is not required, but many supports are available in the PNP Profile that could benefit a student. However, select only those supports that a student is used to using so the student is not confused during testing.

7. Scroll to view the First Contact survey column. Does the link read Complete?
   • If yes, go to the next step.
   • If no, go to Complete the First Contact Survey on page 39 of this manual.

8. To view an individual student record, select anywhere in the row for the desired student. The row will be highlighted. Then select the **View** button in the bottom left of the table.

9. The View Student Record overlay appears. Educator Portal users with roles that permit editing will see the word “Edit” in the upper-right corner of the screen. However, test administrators will not have the option to edit a student’s record.
HINT: A user with the Educator Portal role of Teacher can access the student’s username and password on the View Student Record pop up only if the Required Test Administrator Training has been completed and the security agreement has been signed. Other users will not have access to the student’s credentials.

</code></pre>

**VIEW AND CHECK ROSTER**

The data manager creates roster records that links students to educators. Test administrators are responsible for confirming that students who appear on their roster(s) are eligible to participate in the assessment and that they are rostered to each subject area in which they will be assessed.
HINT: Review the About Dynamic Learning Maps section of the Test Administration Manual to learn more about eligibility for DLM alternate assessments. Also, some states provide state-specific eligibility and participation requirements. When provided, they are on the DLM webpage for the state under the Supplemental Resources tab.

To access all rosters, follow these steps.
1. Select Settings.

2. Select Rosters from the drop-down menu.

3. If applicable, apply all necessary filters in the provided fields to choose the level needed.
4. Select Search.

5. Sort, filter, move columns left or right, hide columns, and search as needed. Select on a roster in the table to view students currently assigned to that roster.
HINT: Users can customize the view of each table in order to make work easier and more efficient. Select the kebab menu (three vertical dots) in a column header to sort the column in ascending or descending order, filter, add or remove columns from the table, and lock specific columns in place. Select and drag a column header to reorder the columns in the table to best suit your needs.

6. For users with the role of Teacher, the View Roster screen will appear as below.

Educator Portal users with roles that permit editing will be able to make edits on the View/Edit Roster screen (i.e., selecting a new educator and adding or removing students).
HINT: Rosters cannot be changed after a state’s spring assessment window closes.

7. Check the roster data.

<table>

<td>-------</td>
</tr>
<tr>
<td>If</td>
<td>Then</td>
</tr>
<tr>
<td></td>
<td>the student’s correct grade level is identified.</td>
</tr>
<tr>
<td>No rosters appear.</td>
<td>Work with the data manager to provide student and educator data for the roster files. The data manager will create the roster records in Educator Portal.</td>
</tr>
</tbody>
</table>

8. Review the First Name and Last Name fields for accuracy.
   - If all fields are accurate for all students, go to the next step.
   - If one or more fields contain incorrect information for one or more students, then provide the data manager with the correct information. Go the next step while the data manager works to correct the information.

   HINT: Building- and district-level users may edit data as they complete this procedure. Teachers, however, will need to request help from a building- or district-level user if they find incorrect roster information.

9. After editing data, select Save.
10. Select X to close the pop-up window.

**COMPLETE THE PNP PROFILE**

The Accessibility Manual contains additional information about best practices and policies and about the selection and use of the accessibility supports available in the DLM Alternate Assessment System.

Test administrators enter each student’s personal needs and preferences in the PNP Profile so that students may receive customized access to their assessments. Not all students require a customized testlet. Best practice is to review the PNP Profile to ensure the student has the most positive experience possible. Most, but not all, building and district roles and test administrators can edit and submit the PNP Profile. For a complete list of which user roles have permission to edit or submit the PNP Profile, go to the Data Management Manual section called Roles and Permissions in Educator Portal.
HINT: Test administrators will need about 15–20 minutes to complete each student’s PNP Profile. Test administrators must have the student’s Individualized Education Program (IEP) on hand or know which supports the student currently receives.

To enter data in the PNP Profile, follow these steps.

1. Select **Settings**.

2. Select **Students** from the drop-down menu.

3. If applicable, apply filters in the Select Organization fields to choose the level needed. Settings for teachers will auto-populate.

4. Select **Search**.
5. In the list of students, select anywhere in the row for the desired student. The row will highlight. Then select the **View** button in the bottom left of the table.

![View Students: Select Criteria](image)

6. On the View Student Record window, select the link next to PNP Profile.

![View Student Record - Sarah Jefferson](image)

**HINT:** The PNP Profile link will state “No Settings,” as shown above, until the PNP Profile has been edited and saved, then the link will state “Custom.”
7. The **Summary** tab appears, showing Student Demographics on the left and the Current Profile Settings on the right. The other tabs at the top of the page provide four categories of accessibility options.

8. To edit or change the student’s PNP profile settings, select **Edit Settings**.

![Profile Settings](image.png)

**HINT:** While moving through the tabs, be sure to select **Save** on each tab. This action will display a message that the profile attributes have been successfully saved.

Some PNP Profile options are automatically set to Activate by Default. Users cannot deselect these options.
9. Select the **Display Enhancements** tab to review and select any desired options. Use the vertical scroll bar on the right, if necessary, to view all available options.
The following table describes the Display Enhancement options.

<table>
<thead>
<tr>
<th>Number</th>
<th>Field or Button</th>
<th>Action/Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Magnification</td>
<td>Magnification provides screen magnification during testing, with options of 2x, 3x, 4x, or 5x magnification. Students using higher levels of magnification may need to scroll on their device to navigate the screen, or have the testlet projected for ease of access.</td>
</tr>
<tr>
<td>2</td>
<td>Overlay Color</td>
<td>The overlay color is the background color of the test. The default color is white. Users may choose a different color by selecting the small arrow in the bottom-right corner of the color box.</td>
</tr>
<tr>
<td>3</td>
<td>Invert Color Choice</td>
<td>The invert color choice will cause the test background to appear black with white lettering. Users can change the display to a different color scheme.</td>
</tr>
<tr>
<td>4</td>
<td>Contrast Color</td>
<td>The contrast color section allows users to choose from several background and text color schemes.</td>
</tr>
</tbody>
</table>

**HINT:** When Spoken Audio is selected, words are highlighted in yellow as they are spoken. If yellow overlay color or yellow contrast color options are selected, the yellow highlighting used with Spoken Audio will make the words disappear. If yellow overlay or yellow contrast optimize a student’s access to the assessment, the test administrator must read aloud to the student instead of using Spoken Audio.

10. Select **Save** to save all Display Enhancements selections.
11. Select **Language & Braille** to review and select the support option related to language and braille.

12. Select **Save**.
HINT: Each state decides which braille file type will be available for use. Either EBAE or UEB or both file types will be available for selection, depending on the state’s decision. Braille is to be selected only if the student is proficient in reading braille. Braille is not to be selected for emerging braille readers. Other options, such as alternate forms, are suitable for a student with a visual impairment who does not read braille.

The following table lists the availability of Braille testlets to either assessment model.

<table>
<thead>
<tr>
<th>Subject</th>
<th>Grades</th>
<th>Linkage Levels</th>
<th>Window</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELA and mathematics</td>

<td>3–8 and high school</td>
<td>Target level only</td>
<td>Spring Assessment Window only</td>
</tr>
</tbody>
</table>

13. Select **Audio & Environment Support** to review and select support options related to read aloud and switch use.
The following table describes Audio & Environment Support options.

<table>
<thead>
<tr>
<th>Number</th>
<th>Field or Button</th>
<th>Action/Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Spoken Audio</td>
<td>When Spoken Audio is selected, Voice Source automatically selects Synthetic. Human read aloud is always an available option and can be selected under Other Support. Under Spoken Preference, Text &amp; Graphics is automatically selected. You have the option to change this selection to Text Only or NonVisual.</td>
</tr>
</tbody>
</table>
| 2      | Single Switches*  | **Scan Speed (seconds):** The number of seconds an item or row will be highlighted and available for selection before the system moves to the next item or row. The scan speed must be equal to or greater than the value entered under Automatic Scan–Initial Delay.  
**Automatic Scan–Initial Delay:** Specify whether scanning will begin automatically when a page appears.  
**Value in seconds:** Determines how long the system waits to begin scanning items after a page appears.  
**Manual Override:** The system will wait for the user to select the switch to initiate scanning on a page.  
**Automatic Scan Repeat Frequency:** How many times the system will repeat the scan cycle before stopping when a selection is not made. |

* Single-switch access is to be selected for students requiring one-switch automatic scanning.

14. Select **Save** to save all information and move to the next tab.
15. Select **Other Supports** to review and select any additional support options.
The following table describes Other Supports options.

<table>
<thead>
<tr>
<th>Number</th>
<th>Field or Button</th>
<th>Action/Description</th>
</tr>
</thead>
</table>
| 1      | Supports Provided by Alternate Form | **Alternate Form–Visual Impairment:** Most testlets are designed for all DLM students. For a limited number of Essential Elements and linkage levels, alternate forms are provided for students with visual impairments. Alternate forms are teacher-administered, not braille. Selecting Alternate Form–Visual Impairment in the student’s PNP Profile will direct the system to deliver that form when available.

An Alternate Form–Visual Impairment will have the letters BVI in the title of the test session and will contain alternate text descriptions of pictures for the test administrator to read to the student. If neither a braille form nor an Alternate Form–Visual Impairment testlet are available for an Essential Element or linkage level, a standard form of the testlet will be delivered. |
| 2      | Supports Requiring Additional Tools | **Two-switch system:** Two-switch scanning does not require activation in the PNP Profile. The Kite Student Portal automatically supports two-switch step scanning, with one switch set up to emulate the Tab key to move between choices and the other switch set up to emulate the Enter key to select the choice when highlighted.

**Individualized manipulatives:** Educators may use supports that are familiar to students (e.g., abacus, unit cubes, interlocking blocks, counters, linking letters, etc.).

**Calculator:** Educators may use a calculator unless the Testlet Information Page (TIP) specifically indicates a calculator may not be used. |
<p>| 3      | Supports Provided Outside the System | <strong>Human read aloud:</strong> The test administrator may always read the assessment to the student. Read aloud the text on the screen and, if needed, refer to the alternate text provided as part of most TIPs for standardized descriptions of pictures and graphics. Descriptions of pictures and graphics are only to be read aloud to students who have visual impairments. |</p>
<table>
<thead>
<tr>
<th>Number</th>
<th>Field or Button</th>
<th>Action/Description</th>
</tr>
</thead>
</table>
|        |                | **Sign interpretation:** For students whose primary mode of receptive communication is sign, test administrators may sign the assessment to the student using American Sign Language, Exact English, or personalized sign systems. Sign language interpreters are to use the alternate text provided in the TIP for picture descriptions.  
**Language translation:** State policy determines whether translation can be used. Typically, test administrators may translate the assessment for students who are English learners and whose best receptive communication is a language other than English. Language translations are not provided via the computer.  
**Test administrator enters responses for student:** If students are unable to select their response options themselves, they may indicate their selected responses through normal response types and/or forms of communication, such as eye gaze, and then test administrators may key in those responses. This is only to be used when students are unable to independently and accurately record their responses into the system.  
**Partner assisted scanning (PAS):** A strategy in which test administrators assist students with scanning, or going through, students’ response options. Students make indications when their desired choices are presented. |

16. Select **Save**.  
17. Select **X** to close the pop-up window.

**HINT:** To edit existing PNP Profile settings before testing begins, refer to Complete the PNP Profile on page 28. After the available and appropriate supports are selected and saved, the test administrator may check the **Summary** tab to review the current profile settings.
**Changing PNP Profile Settings During Testing**

To change a PNP Profile setting during testing, follow this process.

1. The test administrator exits the testlet by using the **EXIT DOES NOT SAVE** button. Contact the district assessment coordinator to verify that the use of **EXIT DOES NOT SAVE** is allowed in the state.
2. Go to the PNP Profile and select or deselect the desired support settings.
3. Save the new selection(s) in the PNP Profile before exiting.

The following table shows how soon a change appears in a testlet after updating the PNP Profile.

<table>
<thead>
<tr>

</table>
**Complete the First Contact Survey**

The First Contact survey is the first step in determining the initial placement of students in the DLM alternate assessment. The First Contact survey is a collection of background information about students who are eligible for the DLM alternate assessment. The survey goes beyond basic demographic information and includes questions on topics such as communication, assistive technology devices, motor and sensory impairments, and academic performance. The test administrator enters information in the survey about each of these for each student in Educator Portal. Detailed information about the First Contact survey is available in the Accessibility Manual. Also, the Test Administration Manual has an appendix which lists all First Contact survey questions.

The First Contact survey settings follow the student from year to year. However, the survey must be reviewed, updated, and submitted each year. If the survey is not submitted, testlets will not be assigned to the student.

**Hint:** Educator Portal presents the previous year’s First Contact survey responses from the matching student record. The test administrator updates items based on changes in the student’s data and learning capabilities. The survey must be submitted each year, even if no changes are made.

Questions marked with an asterisk must be completed, because the system assigns each student to a specific linkage level for the first testlet based on responses to these questions. All questions should be completed to support the ongoing development of improved instructional and assessment resources for students who have the most significant cognitive disabilities.

When completing the First Contact survey, test administrators will need to provide information about each student’s primary disability, sensory capabilities, motor capabilities, computer...
access, communication abilities, and academic skills. Some screens in the First Contact survey have drop-down menus that expand, filter, or branch, requesting more information based on answers provided to the first part of the question.

**HINT:** Set aside approximately 20–30 minutes to complete a new survey, or 10–20 minutes to update an existing survey for each student. If desired, preview the survey questions in the Test Administration Manual appendix.

Only users with the role of District Test Coordinator, Building Test Coordinator, and Teacher have permission to complete, edit, and submit the First Contact survey. Other users may only access the First Contact survey.

Test administrators can use the following steps to enter data in the First Contact Survey if their instructionally embedded window is not open. If completing the survey in the Instruction And Assessment Planner, follow the steps on page 15.

1. **Select Settings.**

   ![Settings Menu]

2. **Select Students** from the drop-down menu.

   ![Students Menu]

   **HINT:** If applicable, apply filters in the Select Organization fields to choose the necessary level. For users with the Teacher role, the organization information auto-populates.

3. **Select Search.**

   ![Search Criteria]

4. To view a student’s First Contact Survey status, select the link in the First Contact column. You might need to use the table’s horizontal scroll bar at the bottom of the grid to scroll to the right to have access to the additional column.
HINT: The First Contact Survey can also be accessed by going to the State Student Identifier column, selecting a student’s number, and viewing the student record.

5. The First Contact survey column will show one of four status options.
   - **Not Started**: No fields have been completed.
   - **In Progress**: Some fields are completed and saved. The survey has not been submitted.
   - **Ready to Submit**: All required fields are completed. The survey has not been submitted.
   - **Completed**: All required fields are completed. The survey has been submitted.

6. Read the information on the Welcome screen. Verify the student’s name, then select **Start Survey**.
HINT: The First Contact survey includes nine tabs, each containing a section of the survey. Each tab will display either blue or orange circles. Blue circles indicate that all questions for that tab have been completed, while orange circles indicate that one or more questions have not been completed.

The First Contact survey does not have to be completed in one sitting. In progress surveys will be saved so that users can complete the survey later. When resuming a survey, select Edit Survey at the top of the screen and then complete and submit the survey. Users must complete the First Contact Survey in order to access testlets at the opening of the assessment window.

7. Complete the survey on the student’s primary disability and placement. Select Next.

HINT: Pay attention to tabs with a vertical scroll bar on the right to be sure all required questions are answered. Tabs with multiple sections may have multiple circles. The Next button will not be available until all required questions have been answered.
8. On the **Sensory Capabilities** tab, complete the survey on the student’s hearing and vision sensory capabilities. Completing the vision part of the First Contact survey where a test administration might mark that the student requires the use of braille does NOT automatically assign a braille testlet when available. In order to acquire a braille testlet, the test administrator must also select the braille support in the PNP Profile.

```
8. On the Sensory Capabilities tab, complete the survey on the student’s hearing and vision sensory capabilities. Completing the vision part of the First Contact survey where a test administration might mark that the student requires the use of braille does NOT automatically assign a braille testlet when available. In order to acquire a braille testlet, the test administrator must also select the braille support in the PNP Profile.
```

9. Select **Next**.
10. On the **Motor Capabilities** tab, complete the survey on the student’s motor capabilities and health. Select **Next**.

11. On the **Computer Instruction** tab, complete the survey on the student’s primary use of a computer during instruction. Select **Next**.
12. On the **Communication** tab, complete the survey on the student’s expressive and receptive communication abilities and needs. Select **Next**.

13. On the **Language** tab, complete the survey on the student’s language preferences. Select **Next**.
14. On the Academic tab, complete the survey on the student’s skills in reading, mathematics, and writing. Select Next.

![Academic Tab Image]

15. On the Complete tab, you must select Submit Survey to submit all answers and exit.

![Complete Tab Image]

HINT: If editing a First Contact Survey after completion and submission, the test administrator must select the Submit Survey button on the Complete tab again to save it, even if no changes have been made.

After selecting Submit Survey, the link in the First Contact column in the View Students table will read Completed. To make changes to a student’s First Contact Survey, select the Completed link for the student and make all necessary changes.
The First Contact survey must be submitted before Educator Portal will allow assessment participation in any window. If the First Contact Survey is submitted after the opening of a window, then assessment participation is delayed by 24 hours.

**NOTE FOR KANSAS ONLY:** Kansas is the only DLM Consortium state that uses Educator Portal to test both the general education students and DLM students.

Rarely, the Not Applicable status will appear in the First Contact survey column. Kansas DLM test administrators who encounter the Not Applicable status will need to ensure that they are logged in as a DLM user and that the student’s information has been loaded properly into the system.

**MANAGE SPRING ASSESSMENTS FOR YEAR-END MODEL STATES**

Procedures in this section are the primary responsibility of the test administrator (users with the Educator Portal role of Teacher). Screenshots will show the test administrator view. Each state selects the subjects tested. Testlets in those DLM subjects are required during the spring assessment window. One testlet at a time for each subject is delivered. The number of testlets delivered varies by subject and grade level.

However, all students in the same grade level and subject receive the same number of testlets during the spring assessment window. Specifics about the number of testlets and information about the structure of the testlets can be found in the **TEST ADMINISTRATION MANUAL**.

**THE TEST MANAGEMENT PAGE**
The following table describes the Test Management page.

<table>
<thead>
<tr>
<th>Number</th>
<th>Field or Button</th>
<th>Action/Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Include Completed</td>
<td>Select this box to include all completed testlets in your search. If you do not select this box and select Search, then the table will only populate current testlets available to your student(s).</td>
</tr>
<tr>
<td>2</td>
<td>Search</td>
<td>Select Search to populate the test session table.</td>
</tr>
<tr>
<td>3</td>
<td>View Tickets</td>
<td>To download multiple test tickets into one PDF, first select the individual test session rows from the table to include in the PDF, then select View Tickets. A PDF will open with the test tickets for each selected row.</td>
</tr>
<tr>
<td>4</td>
<td>Test Session Name</td>
<td>Test Session Names typically include the student’s name, the system ID, and the collection name.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>DLM - &lt;Student Last Name&gt;&lt;Student First Name&gt; - &lt;Student System ID&gt; - &lt;Test Collection Name&gt;</td>
</tr>
<tr>

</tr>
<tr>
<td>10</td>
<td>Scroll Bar</td>
<td>Use the scroll bar to access additional information such as Grade, Roster Name, School ID, and School Name</td>
</tr>
<tr>
<td>11</td>
<td>Number of Items</td>
<td>Displays the total number of rows (items) with available testlets.</td>
</tr>
</tbody>
</table>

**View Student Username and Password**

Educators view student usernames and passwords in Educator Portal. Students must have a username and password to access Student Portal and take the DLM alternate assessment.

**HINT:** Each student’s username and password are the same for all DLM alternate assessments for the current testing year. If the student participated in the instructionally embedded assessment, the student will use the same credentials for the spring assessments. Field test testlets also use the same username and password.

You will need a PDF reader to complete this procedure.

To view student usernames and passwords, follow these steps.

1. Select **Manage Tests**.
HINT: An error message will appear if a user with the Educator Portal role of Teacher has not passed all Required Test Administrator Training modules or has not completed the security agreement in Educator Portal.

2. Select **Test Management** from the drop-down menu.

HINT: Users with the Educator Portal role of Teacher will have the Test Management page as it appears in the following screenshot. District- and building-level users will have additional choices in drop-down menus to filter results and will need to make selections for each required option.

3. Select **Search**. A list of test sessions will display.

HINT: If no students appear in the table after selecting Search, work with the assessment coordinator or data manager to confirm that a roster for each applicable subject has students connected to you.

4. Select the PDF icon under Tickets next to the name of the desired test to open the test ticket as a PDF.
HINT: The Test Progress column on the Test Management screen shows the number of testlets that have been completed by a student out of the number of testlets required for a subject during the spring assessment window. For a Year-End model state, all subjects being tested by the state will display. For an Instructionally embedded model state, only science testlets will display.

For each test ticket, the Test Progress column will indicate a specific testlet (e.g., testlet 1 of 9, testlet 2 of 9, and so on). Field test testlets will not be included in the number of testlets required and will instead be indicated by an NA in the Test Progress column.

By default, Test Management only displays testlets that still need to be taken, one per subject. Completed testlets can be included by selecting the Include completed box above the chart.

5. The **Username** and **Password** fields are the student’s login credentials for Student Portal.

HINT: The student’s username and password may be printed. These are secure documents and should be handled accordingly. They should be securely destroyed when all testing for the student is completed.

6. Compare the students with available testlets to the students expected.
   - If all students appear, the test administrator may begin to administer assessments.
   - If a student does not appear, verify that the First Contact Survey is completed. Remember, there is a 24-hour delay after submitting the survey.
RETRIEVE TESTLET INFORMATION PAGE (TIP) FOR YEAR-END MODEL STATES

This procedure describes retrieving the Testlet Information Page (TIP) for operational testlets for Year-End model states during the spring assessment window, for field test testlets for either model during the fall or spring window, and for science testlets for the instructionally embedded model states during the spring window.

HINT: You may print the TIP, but please remember that TIPs must be treated as secure documents and handled accordingly.

Most TIPs have multiple pages that include alternate text for human read aloud for students who are blind or visually impaired. Alternate text attachments may be lengthy and are to only be printed when needed. TIPs are subject-specific. Science TIPs for testlets at the Initial linkage level contain picture-response cards for the student to view. Best practice is to print these in color. Use the TIP to prepare for testlet administration.

TIPs are located on the Test Management screen. To view the TIPs, follow these steps.

1. Select Manage Tests.

HINT: To view a list including completed or expired test sessions, select the boxes next to the search button.

- **Year-end model states**: For the spring assessment window, users will access administrative information from the Test Management screen for ELA, mathematics, and science.
- **Instructionally embedded model states**: For the spring assessment window, users will access administrative information from the Test Management screen for science only.

2. Users in both models who have the Educator Portal role of Teacher will have the Test Management screen as it appears in the following screenshot. District- and building-level users will have drop-down menus to filter results and will select options for each starred menu. Select Test Management from the drop-down menu.

3. Select Search.
4. Select the PDF icon in the Test Information column for the desired test to open the test ticket as a PDF.

5. Review the TIP. When the student finishes the testlet, securely shred the TIP. It is a secure testing document. Also shred the TIPs that were printed for any testlets the student was assigned but did not take.

**Retrieve Braille Ready File for Year-End Model States**

In the spring assessment window, some alternate assessments include Braille Ready Files (BRF) of testlets to support student needs in ELA, mathematics, and science. A student’s PNP Profile must be marked for braille in order for the system to deliver a braille form, if available.

The Kite system assigns the braille testlets the same way that non-braille testlets are assigned; they are adaptive and are delivered one at a time. The BRF will appear when the testlet is assigned and is accessible in the Test Information column. As each testlet is assigned to the student, the educator embosses the testlet locally. After the student completes the testlet, the test administrator transfers the student’s responses into the accompanying testlet in Student Portal, then the link to the BRF will no longer be available. Therefore, test administrators must plan well in advance for this process.

Braille testlets for some Essential Elements are available in the instructionally embedded assessment window during the fall and winter months for some ELA and mathematics Essential Elements at upper linkage levels. Go to the ACCESSIBILITY MANUAL for more information regarding braille, such as which braille forms are offered, which linkage levels have braille, and what the system does when a braille file is not available for an Essential Element or linkage level.
HINT: Braille testlets are only available at the upper linkage levels. The DLM alternate assessments are never to be considered as an assessment of the student’s braille language skills, but rather an assessment where the student can demonstrate their knowledge, skills, and understanding of the DLM Essential Elements.

After the Braille Ready File is retrieved, follow steps 5–7 below. Year-End model states testing only in the spring assessment window follow these steps.

1. Select **Manage Tests**.
2. Select **Test Management** from the drop-down menu.
3. Select **Search**.
4. Select the braille icon in the Test Information column.

5. Save the BRF to an external drive by using special software for BRFs.
6. Open and emboss the BRF.
7. After the student finishes the testlet, and the test administrator transfers the student’s responses from the embossed testlet to the testlet in Student Portal, shred the embossed testlet. Also shred any embossed testlets the student was assigned but did not take. Do not save BRFs to a computer. Instead, save them to an external drive and delete them when the process is complete.
USE THE INSTRUCTION AND ASSESSMENT PLANNER FOR INSTRUCTIONALLY EMBEDDED MODEL STATES

Instructionally Embedded model states require the administration of instructionally embedded assessments to cover the blueprint during the fall window and again during the spring window.

NOTE: Test administrators in Year-End model states can also use the Instruction and Assessment Planner to create plans and assign testlets during the fall and winter months in their instructionally embedded assessment window. Assessing students during this window is optional but recommended for Year-End model states. Ask for state guidance about testing requirements during the optional instructionally embedded assessment window. Be aware that some of the requirements for Instructionally Embedded Model states are different from those for Year-End Model states, although the steps are very similar.

Test administrators using the Instruction and Assessment Planner follow the steps below. To access the Instruction and Assessment Planner, follow these steps.

1. Select Manage Tests.

2. Select Instruction and Assessment Planner from the drop-down menu.

STUDENT ACTIVITY TABLE

When users with the Teacher role open the Instruction and Assessment Planner, each student rostered to them will automatically appear in the Student Activity Table on the initial page. Students are listed numerically by grade level and then alphabetically by default. The test administrator can filter the students by grade and by student name, if desired. The following graphic details the Student Activity Table.
The following table describes the Student Activity table.

<table>
<thead>
<tr>
<th>Number</th>
<th>Field or Button</th>
<th>Action/Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Filter by grade, if desired</td>
<td>If you have students in multiple grades, go to the Select box to filter results by grade in the Student Activity Table.</td>
</tr>
<tr>
<td>2</td>
<td>Filter by student name, if desired</td>
<td>After filtering by a specific grade, go to the Select box to filter by a specific student.</td>
</tr>
<tr>
<td>3</td>
<td>Student Name and State ID</td>
<td>The student’s name is a hyperlink. Select the student’s name to display the View Student Record page where more student demographic information is available.</td>
</tr>
<tr>
<td>4</td>
<td>First Contact Survey</td>

</tbody>
</table>

*Instructionally embedded model states only.

**HINT:** Test administrators must complete the student’s First Contact Survey prior to creating a plan for a student. A triangular caution symbol on the Student Activity Table indicates an incomplete First Contact Survey. A checkmark symbol indicates a completed and submitted First Contact survey.
**CREATE A PLAN**

Procedures in this section are the primary responsibility of the test administrator. To choose an Essential Element for instruction, follow these steps.

1. Select **Manage Tests**.

2. Select **Instruction and Assessment Planner** from the drop-down menu.

**HINT:** All district- and building-level users, including test administrators and proctors, can create plans for students. District- and building-level users will choose a district and/or school from the drop-down menu(s) and select **Search**. Users with Teacher and Proctor roles will not have drop-down menus because their school is already known.

3. If the First Contact survey is complete, select the arrow icon in the selected student’s View/Create plans row in the Student Activity Table for the desired subject (ELA, MATH, or SCI).

**NOTE:** Science is not available for spring testing using the Instruction and Assessment Planner.

4. The Student View Page has two main sections: the informational section at the top of the page and the larger blueprints section in the lower portion of the page. Icons, directions, and other important information is in the top informational section.
Student View Page
The following is an example of the Student View Page.

![Student View Page](image)

The following table describes the informational section of the Student View Page.

<table>
<thead>

</tr>
</tbody>
</table>

*Instructionally embedded model states only.

All states will see the directions between the quick links and the icons: Select an Essential Element and linkage level.
These two messages appear only for Instructionally Embedded model states.

- After completing all blueprint requirements, students may receive a field test testlet. To access the Testlet Information Page for the field test, go to the Test Management tab.
- Between the close of the fall window and the opening of the spring window, test administrators may still view student plans and print the Fall Essential Element Status Report. No other work may be completed.

On the right side of the screen, use the vertical scroll bar to access more of the blueprint section on the Student View Page.

The short description for each linkage level for an Essential Element is in a cell or field called a card. The card for each linkage level will have various quick links that can be selected.

**HINT:** A quick link is a term used for a connection between documents or applications which enables materials to be quickly accessed.
The following table describes the blueprint section of the Student View Page.

<table>
<thead>
<tr>
<th>Number</th>
<th>Field or Button</th>
<th>Action/Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Blueprint Requirements*</td>
<td>Grades 3–8 students have four requirements to meet in each window for both ELA and mathematics. High school students have three requirements for ELA and one requirement for mathematics in both windows. Each blueprint requirement is sectioned with a border around it. The directions for each requirement are found at the top of each bordered section. The claim and conceptual area descriptions are included in the bordered requirement. The number of Essential Elements within each bordered requirement may be different, and the directions for each requirement may be different. Year-End model states will not have these requirements during their optional instructionally embedded assessment window.</td>
</tr>
<tr>
<td>2</td>
<td>Recommended Linkage Level Icon</td>
<td>The flag icon indicates the recommended linkage level based on responses provided by the test administrator in the student’s First Contact Survey.</td>
</tr>
<tr>
<td>3</td>
<td>Begin Instruction</td>
<td>Begin Instruction is the initial status of a specific Essential Element card selected for instruction. When the user selects the <strong>Begin Instruction</strong> quick link, the date is documented on the card and the status changes to Instruction in Progress.</td>
</tr>
<tr>
<td>4</td>
<td>Instruction in Progress</td>
<td>Indicates if a plan has been created and instruction has begun outside of Educator Portal. The date of this action is also included in the card.</td>
</tr>
<tr>

<td>Testlet Assigned</td>
<td>The teacher completed instruction for the Essential Element and assigned a testlet. At that time, a testlet becomes available for the student in Kite Student Portal.</td>
</tr>
<tr>
<td>7</td>
<td>Testlet Complete</td>
<td>The student completed the testlet associated with the specific Essential Element in Kite Student Portal.</td>
</tr>
<tr>
<td>8</td>
<td>Star Icon</td>
<td>The student showed mastery at the specific linkage level for the Essential Element.</td>
</tr>
<tr>
<td>Number</td>
<td>Field or Button</td>
<td>Action/Description</td>
</tr>
<tr>
<td>--------</td>
<td>----------------</td>
<td>--------------------</td>
</tr>
<tr>
<td></td>
<td></td>
<td>HINT: The icon will display an X if the student did not show mastery for that linkage level.</td>
</tr>
<tr>
<td>9</td>
<td>Requirement Complete</td>
<td>The icon displays if the blueprint requirement is met (not visible in screenshot).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>HINT: In the example above, the blueprint requirement has not yet been met, therefore the icon is blank and shows as Not Complete. Once the blueprint requirement is met, the circle fills in to become solid and includes a check mark with the word Complete, as shown below.</td>
</tr>
</tbody>
</table>

*Instructionally embedded model states only.

1. Choose Essential Elements in the appropriate linkage level according to the blueprint requirements detailed at the top of each requirement section.
HINT: Blueprint requirements are only displayed for Instructionally Embedded model states. Year-End model states will not have any blueprint requirements in the Instruction and Assessment Planner during their optional instructionally embedded assessment window. Instead, Year-End model states meet their blueprint requirements with assessments during their required spring assessment window, which is managed in Test Management.

For both assessment models, a flag icon in each Essential Element header indicates the recommended linkage level for instruction based on First Contact Survey responses.

<table>
<thead>
<tr>
<th>Essential Element</th>
<th>Initial Precursor</th>
<th>Distal Precursor</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELA.EE.RI.3.1</td>
<td>attend to object characteristics</td>
<td>identify familiar people, objects, places, events</td>
</tr>
</tbody>
</table>

2. Select the Essential Element for instruction. Select the linkage level. For ELA and mathematics, five linkage level cards, one for each linkage level, display in each Essential Element row. At a glance, each card displays a short description of the linkage level.

HINT: Science Essential Elements display only three linkage level cards.

3. Select the kebab menu (three vertical dots) icon in the appropriate linkage level card to access the pop-up box displaying the long linkage level description along with an icon that links to the mini-map for the selected Essential Element. Download the mini-map for instructional supports.
HINT: A mini-map is a small cluster of nodes associated with each ELA and mathematics Essential Element within the learning map model. Downloading the mini-map PDF for the Essential Element provides a short, three- to five-page document showing the relationship of the nodes in the mini-map.

When selecting the mini-map icon for science, the user will access a similar type of document to those for ELA and mathematics. However, the science documents displays the relationship of linkage levels in each science Essential Element, but not the nodes of a learning map model. At this time, the learning map model for science is not yet fully developed.

Downloading the mini-map for the writing Essential Elements will display sequential pages for each of the writing Essential Elements in a single PDF. Therefore, this PDF is much longer. The test administrator will need to scroll down through several pages in order to view its entirety.

4. Select **Begin Instruction.** The card displays **Instruction In Progress** with the date.

5. Provide instruction outside of Educator Portal. After the test administrator believes appropriate instruction has been provided to the student, and the student is ready for the assessment, the test administrator returns to the Student View Page in the Instruction and Assessment Planner. On the linkage level card for the Essential Element, select the kebab menu on the card and select **Instruction Complete Assign Testlet.**
HINT: Sometimes the test administrator will decide that a specific Essential Element or linkage level should not be tested. If the test administrator does not plan to assign the student a testlet after instruction is complete, the option for **Instruction Complete Do Not Assign Testlet** should be selected. By selecting this option, a testlet in Student Portal will not assign to the student. The **Instruction In Progress** mark will be removed from the Student Activity Table, and the linkage level will revert to its original status for that Essential Element. If desired later, it can be selected again.

6. After selecting **Assign Testlet**, a pop-up box will ask the test administrator to confirm and assign a testlet. Once the testlet is assigned, the card in the Student Activity Table will display Testlet Assigned with the date. Select **Continue**.

![Assign Testlet?](image)

Assign Testlet cannot be reversed.

Select **Continue** to assign testlet or **Cancel** to go back and review.

7. Once the testlet is assigned, select the kebab menu in the card to download the Testlet Information Page.

![Testlet Information Page](image)
The Braille Ready File icon will be visible if the Essential Element at the specific linkage level has a braille equivalent.

**Retesting the Same Essential Element and Linkage Level**

Test administrators can select the same Essential Element and linkage level more than one time, if desired. At least one testlet is available for every Essential Element at every linkage level. In the following example, the student took a testlet for this Essential Element at the same linkage level two times; once on July 23 where the student did not master the linkage level (X icon) and again on July 29 where the linkage level was mastered (star icon).
Sometimes more than one testlet at a linkage level is not available. A message will display that all testlets at this linkage level have been assessed, as displayed in this example.

![Example of a message indicating all testlets at a linkage level have been assessed.]

After reading the Testlet Information Page and gathering the materials, administer the testlet in Student Portal. Once the testlet is submitted, come back to the Instruction and Assessment Planner to access the results.

If the Student View Page was open during the administration of the testlet, select the refresh button in the upper-left corner of the web browser to display the results.

The card on the Student Activity Page will update to one of three statuses.

1. **Testlet Complete with a star**, indicating mastery.
2. **Testlet Complete with an X**, indicating mastery was not achieved.
3. **Testlet Complete with a dash**, indicating results are not yet ready. The dash will only display for writing testlets because they are scored outside of Educator Portal. Their results are published in Educator Portal in the Student Individual Score Report.
After a testlet is complete, the TIP is no longer available. If the student received a Braille Ready File, it is also no longer available.

If another testlet is available, the **Begin Instruction** action button can be selected. In the following example another testlet is available.

![Image of testlet](image)

**HINT:** A Braille Ready File may not be available for a second testlet for an Essential Element at a linkage level, even if the first testlet did have a Braille Ready File.

The Student Activity Table updates with every action that occurs for an Essential Element at a linkage level, showing data about the student for each subject tested. Use the **back** button under the Home icon in the upper left to return to the Student Activity Table.

![Image of Student Activity Table](image)

At a glance, the test administrator can see if blueprint requirements have been met, how many plans have instruction in progress, if testlets are assigned but have not been tested, and the total number of completed testlets.
FIELD TEST TESTLETS FOR INSTRUCTIONALLY EMBEDDED MODEL STATES

After the blueprint requirements are met for a student in each subject, one field test testlet may be available. To access the Testlet Information Page (TIP) for the field test testlet, select the Test Management hyperlink on the Student View Page. This action takes the test administrator directly to the Test Management section of Educator Portal where the Testlet Information Page and the Test Ticket for the field test testlet are available. Administer the field test testlet in Student Portal using the student’s credentials.

BETWEEN THE FALL AND SPRING WINDOWS FOR INSTRUCTIONALLY EMBEDDED MODEL STATES

Between the close of the fall window and the opening of the spring window, the Student Activity Table will be grayed out. Users may still view student plans and print the Fall Essential Element Status Report. However, no other work may be undertaken during this time period.
ACCESS THE ESSENTIAL ELEMENTS STATUS REPORT IN THE INSTRUCTION AND ASSESSMENT PLANNER

The Essential Elements Status Report is a per student per subject report that captures everything from the Student View Page and the Student Activity Table together in one PDF report at the date and time the report is accessed. The report is accessed in the Instruction and Assessment Planner at the top of the Student View Page. The report includes all Essential Elements and linkage levels on the blueprint for the subject. Users will observe various stages of instruction and testing and the associated dates.

During the fall window, the Essential Elements Status Report is available and can be printed at any time by selecting the printer icon.

![Fall Window](image)

At the close of the fall window, the fall Essential Elements Status Report becomes a static report. It continues to be available by selecting the leaf icon at the top of the Student View Page. With the opening of the spring window, the spring version of the report becomes available by selecting the printer icon.

![Spring Window](image)

The Essential Elements Status Report is especially designed for test administrators, but any state, district, or building educator may also find it useful. Information on the Essential Elements Status Report complements the DLM Blueprint Coverage Report. More information about that report can be found later in this manual at Understanding the DLM Instructionally Embedded Monitoring Extract for Instructionally Embedded Model States on page 96.

The Essential Element Status Report for each subject and student is 3–4 pages long, depending on the subject. The following is an example of the upper part of an Essential Elements Status Report for fictional student Lindon Dukes.
**THE SPRING WINDOW FOR INSTRUCTIONALLY EMBEDDED MODEL STATES**

When the spring window opens, all plans and actions from the fall window will have been removed from the Instruction and Assessment Planner. Only the Fall Essential Element Status Report remains available and accessed using the leaf icon.

In the Student Activity Table, Blueprint Requirements Met in the top row will revert to 0 out of the number of requirements, depending on the grade and subject (i.e., 0 of 4). Neither the First Contact Survey nor the PNP Profile need be submitted again unless the test administrator wants to make changes in them.

In the Student Activity Table, the column for science will no longer be visible. During the spring window, administrative information for all science assessments is in the Test Management section of Educator Portal. For science, the system will assign both the Essential Elements and
linkage level for the student until the science blueprint is covered. Although testing science in the fall window is optional, science assessment in the spring window is required.

All the steps and processes for ELA and mathematics during the spring window are the same as they were during the fall window. Test administrators may select the same Essential Elements and linkage levels for ELA and mathematics as they did during the fall window, or they may select others. In addition to the spring version of the Essential Element Status Report, other reports and extracts are also available in Educator Portal through the Reports tab. These are described in the next section of this manual.

Year-End Model states will no longer have any access to the Instruction and Assessment Planner tab in Educator Portal once their optional instructionally embedded assessment window closes.
ACCESS REPORTS AND DATA EXTRACTS

Reports and data extracts are available through Educator Portal. Each Educator Portal role has a specific set of permissions in the system. Use the following key and table to determine which reports and extracts are available for each role.

Key of abbreviation and definition.

<table>

REPORTS

Aggregate Reports

Understanding Aggregate Reports for All States

Testing results are summarized in the Aggregate reports across a state, district, school, or class. The reports are in a PDF or CSV format. The number of students tested by grade, subject, and performance level is included in the report. Aggregate reports do not contain individual student data.

Reports are released based on user role. Therefore, state-level users have access to state-level reports, district-level users have access to district-level reports, and so on. Teachers have access to class-level aggregate reports but only for the students rostered to them.

Users may filter their reports to receive more specific data (e.g., a district user may generate a report for just one school within their district).
**Accessing Aggregate Reports for All States**

To access an Aggregate report, follow these steps.

1. Select **Reports**.

   ![Diagram of Reports](image1)

2. Select **Alternate Assessment** from the drop-down menu.

   ![Diagram of Alternate Assessment](image2)

3. Select the **End-of-Year** tab.

4. Choose the applicable Aggregate report. Depending on the user’s role and permissions, only the Aggregate reports that are applicable will display.

   ![Diagram of Aggregate Report Selection](image3)
5. Select all appropriate filters, then select the report file icon to view the report as a PDF or CSV file.

HINT: Aggregate reports for 2020–2021 will become available in the summer of 2021.

**MONITORING SUMMARY REPORT**

The Monitoring Summary Report can be accessed at the state, district, and school level, depending on the user’s Educator Portal permissions. The report displays by organization, grade, and subject. The report can be viewed in Educator Portal or downloaded and saved as a PDF. Users with the Educator Portal role of Teacher do not have access to this report.

**Accessing the Monitoring Report for All States**

To view the Monitoring Summary report, follow these steps.

1. Select **Reports**.

2. Select **Alternate Assessment** from the drop-down menu.

3. Select the organizational level. The report will appear in the space below the organizations. The Monitoring Summary Report is a status report, displaying data for the date on which it was accessed.
4. Select the blue **Save** button to download and print the report.

Understanding the Monitoring Summary Report for an Instructionally Embedded Model State

The following describes the columns in the report.

- **Instructionally Embedded Fall Window**: Aggregate files provided by grade for ELA, mathematics, and science.
- **Instructionally Embedded Spring Window**: Aggregate files provided by grade for ELA, mathematics, but not science. Science will display NA in these columns.
- **Spring Science Window**: Aggregate files provided by grade for science.

In the following example, at the time the report was accessed for this district, the system displays aggregate data for both the fall and spring required instructionally embedded assessment windows, and for the required science spring assessment window.

The numbers displayed in each set of columns are the numbers of rostered students. Add together the numbers in each set of columns to equal the sum of all students rostered per grade, subject, and window.

---

**NOTE**: Understanding the column headings is important to understanding the data in them. No = no students.

During the required instructionally embedded **Fall Window**, ten students in grade 3 are rostered to ELA. Of those ten students, only one student had zero plans created. Of the nine students with plans created, three had taken no testlets. Four students had completed only one testlet. Two students had completed more than one testlet.

During the required instructionally embedded **Spring Window**, ten students in grade 3 are rostered to ELA. Of those ten students, all students had plans created. One student had taken...
no testlets. Four students had completed only one testlet. Five students had completed more than one testlet.

During the Spring Science window, in this state, grade 3 students are not required to take science testlets and are not rostered to science. Therefore, NA displays.

The following image is an example for an instructionally embedded state.

![Monitoring Summary Report](image)

**Understanding the Monitoring Summary Report for a Year-End Model State**

The following describes the columns in the report.

- **Instructionally Embedded Window**: Aggregate files provided by grade for ELA, mathematics, and science for the optional instructionally embedded assessment window during fall and winter months.

- **Year-End Window**: Aggregate files provided by grade for ELA, mathematics, and science for required testing during the spring assessment window.

In the following example for a Year-End Model state, the system displays aggregate data for both the optional Instructionally Embedded Window and the required Year-End window.

During the optional instructionally embedded window, four grade 4 students are rostered in ELA. Of those four students, one student had no plans created, two students with plans created had taken no testlets, one student had completed one testlet, and none of the students had completed more than one testlet. Only one grade 4 student is rostered to mathematics, but no plans were created for the student.

During the required spring assessment window, in the Year-End columns, eleven grade 4 students are rostered in ELA. Of those eleven students, all completed testing in ELA. Ten grade 4 students are rostered in mathematics and all ten completed testing.

To monitor individual student data in Year-End Model states, access the DLM Test Administration Monitoring extract, described in the Data Extracts section of this manual. This
extract accompanies the Monitoring Summary Report and displays individual student data across multiple columns.

The following image is an example for a year-end model state.

![Monitoring Summary Report](image)

**BLUEPRINT COVERAGE REPORT**

Understanding the Blueprint Coverage Report for an Instructionally Embedded Model State

HINT: The Blueprint Coverage Report will not display for Year-End Model states. Students in Year-End model states meet their blueprint requirements during the spring assessment window when each student is tested over the entire blueprint in each subject.

This report is only provided for states where the instructionally embedded assessments are required in the fall and the spring window. This report is a status report and compliments the data in the Essential Elements Status Report, which is accessed from the Instruction and Assessment Planner.

The Blueprint Coverage Report displays students grouped by district, school, subject, grade, window, and teacher. All students rostered to one teacher for one grade for one subject for one window are listed in columns side by side. The report lists each Claim and Conceptual Area in the blueprint. The top row of each claim includes the requirement for the claim and has an indication of whether a student has fully or partially met the requirement.

The report also displays the student’s testlet activity for each of the Essential Elements. Each Essential Element includes a short description, which matches the short description that appears for each Essential Element in the Student Activity Table in the Instruction and Assessment Planner.
In the following example, all students are fictitious. The key is used to interpret results. A solid dot is displayed by each Essential Element that was tested for each student, along with the date. A student could be tested more than once on an Essential Element.

Fictitious student, Lindon Dukes, was tested several times for Claim 1, Conceptual Area M.C1.3, and Essential Element M.EE 4 NBT 4. The date is provided each time a testlet is completed. In this example, the other two students are rostered but were not tested at the time the report was accessed.

If the test administrator had created a plan and began instruction, but if the student was not yet tested on that Essential Element, the cell will display an empty circle, meaning a plan was created but not yet tested. Lindon Dukes shows one plan created but not tested for Claim 2, Conceptual Area M.C2.1, and Essential Element EE.4.G.

On the top row of each requirement, a circle will display. The circle will be empty if the requirement is not fully met. That circle will fill in and include a checkmark once the student has met the blueprint requirement. This checkmark will align with the checkmark for the requirement in the Student Activity Table in the Instruction and Assessment Planner.

The key in the Blueprint Coverage Report indicates whether the student “met criterion.” Note that Wilburn Haynes and Garrett Read do not have any circles at all. This is because no plans have yet been created for them.

The Blueprint Coverage Report does not indicate the linkage level that was tested for the Essential Element nor if the linkage level was mastered. However, this information is available in the Essential Element Status Report accessed from the Instruction and Assessment Planner.

Note: All students listed in the examples are fictitious.

Accessing the Blueprint Coverage Report

To view the Blueprint Coverage report, follow these steps.

1. Select Reports.

2. Select Alternate Assessment from the drop-down menu.

3. Select the Instructionally Embedded tab.
4. Select **Blueprint Coverage** from the Instructionally Embedded drop-down menu.

5. Select the appropriate report criteria in the available drop-down menus.

6. Select **View**.

7. To save as a PDF, select **Save** and the file will automatically download.
The following image is an example for an instructionally embedded state.

<table>

**NOTE:** The Blueprint Coverage Report contains students’ Personally Identifiable Information (PII), including the student’s name, school, and grade, among other data. Treat any printed report as a secure document and handle accordingly.

**STUDENT PROGRESS REPORT**

**Understanding the Student Progress Report for an Instructionally Embedded Model State**

The Student Progress Report displays the conceptual area(s), the Essential Elements, and the linkage levels tested on the date the report is accessed. The Student Progress Report contains similar data to the Essential Element Status Report, which is available until the spring window closes. The Student Progress report is available to the end of July.

During the fall window, the report summarizes a student’s progress for the required assessment of ELA and mathematics Essential Elements and the optionally assessed science Essential Elements.
During the spring window, the report summarizes a student’s progress for the required assessment of ELA and mathematics Essential Elements, but not science. Although science testing is required in the spring window, science results are not reported until the end-of-year Individual Student Score Reports become available in the summer or early fall, depending on the state.

**Understanding the Student Progress Report for a Year-End Model State**

The Student Progress report summarizes a student’s progress during the optional instructionally embedded assessment window for ELA, mathematics, and science. The results from testlets delivered during the required spring assessment window are not reported until the end-of-year Individual Student Score Reports become available in the summer or early fall, depending on the state.

**Accessing the Student Progress Report for All States**

NOTE: The Student Progress Report contain students’ Personally Identifiable Information (PII), including the student’s name, school, grade, and State Student Identifier, among other data. Treat any printed report as a secure document and handle accordingly.

To view the Student Progress Report, follow these steps.

1. Select Reports.

![Reports Menu](image)

2. Select Alternate Assessment from the drop-down menu.

![Alternate Assessment Menu](image)

3. Select the Instructionally Embedded tab.
4. Select **Student Progress** from the drop-down menu.

5. Complete filters.

6. Choose a student. Select **View Report**.
   - The Individual Student Progress Report will display for each selected student. The date, the student’s name, district, and school are provided on the report. This is a secure document and must be treated appropriately. Choose **Save** to download and print the report.
The following is an example of a Student Progress Report.

**CLASS ROSTER REPORT**

**Understanding a Class Roster Report for an Instructionally Embedded Model State**

The Class Roster report displays the most recent assessment and current instructional goals for one or more students on a roster. The information is only valid for testlets assigned in the Instruction and Assessment Planner during the fall window and again in the spring window. This is a secure report containing student PII.

The report uses a series of numbered filters at the top of the screen to filter the data to display. The report displays one or more students rostered to a single test administrator for one subject at a time. This report displays the Essential Element and the linkage level with both the short and long descriptor and whether it was recently assessed. The report also includes instructional goals for the student if a plan was created at a selected linkage level but was not yet assessed. If a user selects more than one student to view, the user needs to scroll down the screen. This is also a secure report.
Understanding a Class Roster Report for a Year-End Model State

Users in Year-End model states will have the most recent assessment and current instructional goals for one or more students on a roster during their optional instructionally embedded assessment window if the test administrator used the Instruction and Assessment Planner. The report does not include data from the required spring assessment window.

Accessing the Class Roster Report for All States

To access the Student Progress Report, follow these steps.

1. Select **Reports**.

2. Select **Alternate Assessment** from the drop-down menu.

3. Select the Instructionally Embedded tab.

4. Select **Class Roster** from the drop-down menu.

5. Enter filters.
6. After selecting a roster, choose one or more students from the dropdown, then select **View Report**.

![Class Roster](image)

7. Optionally, select **Save** to save and/or print the report.

The following is an example of the Class Roster Report.

![Example of Class Roster Report](image)

**STUDENT SCORE REPORTS**

Aggregate Reports, Individual Student Score Reports, and Student Bundled Reports do not become available until mid-summer to early fall, depending on the state-determined dates. Each state decides which user roles have permission to access the reports. In many states, test administrators receive their Individual Student Score Reports from their district or building test...
coordinator instead of in Educator Portal. To help understand the reports, additional resources, including videos, are available on each state’s DLM webpage. Go to the Scoring and Reporting tab.

Understanding the Individual Student Score Reports for an Instructionally Embedded Model State

These summative reports present student results from all DLM required operational testlets taken in both the required fall and spring windows. Results from field test testlets are not calculated into the Individual Student Score Reports.

Understanding the Individual Student Score Reports for a Year-End Model State

The Individual Student Score Reports for Year-End model states are from only the required spring assessment window. Neither the results from testlets taken during the optional instructionally embedded assessment window nor field test testlets are calculated into the Individual Student Score Reports.

Accessing Individual Student Score Reports for All States

To access Individual Student Score Reports, follow these steps.

1. Select Reports.

2. Select Alternate Assessment from the drop-down menu.

3. Select the End-of-Year tab.
4. Select either **Student (Individual)** or **Students (Bundled)**. User role permission to access these reports is determined by state policy.

5. Complete the filters, then select a student’s name to view the individual student score report.

6. For Bundled Student Score Reports, open PDF files for individual grades, which can then be downloaded and saved.

**Student Report Archive**

**Understanding the Student Report Archive for All States**

Depending on state policy, users may have permission in Educator Portal to access Individual Student Score Reports for students from previous years (beginning with 2015–2016). By using the Student Report Archive feature, state-authorized users will access a table with PDF links to the Individual Student Score Reports for previous years by grade and subject. The Student Report Archive does not include aggregate or bundled reports or any other extracts or reports. Other reports and extracts may have been archived locally by your district or state. Check with your assessment coordinator.

In most states, test administrators receive their Individual Student Score Reports from their district or building test coordinator instead of in Educator Portal. In a state that allows test administrators permission to access to the Student Report Archive, they will only have access to archived reports for students to which they are currently rostered. If a test administrator wants to view a report for a student to which they were previously rostered but are not currently, they must contact their assessment coordinator.
Accessing the Student Report Archive for Any State

To access the Student Report Archive, follow these steps.

1. Select **Reports**.

2. Select **Student Report Archive** from the drop-down menu.

3. Enter Student Last Name or Student State Identifier (ID).

4. Select **Search**.

**DATA EXTRACTS**

The following data extracts are available for select users. If the user does not have permission to view the extract, it will not appear in the list of extracts in Educator Portal.

<table>
<thead>
<tr>
<th>Name of Data Extract</th>

<td>The hour, minute, and second the file was created.</td>
</tr>
</tbody>
</table>

**ACCESSING ALL EXTRACTS FOR ALL STATES**

View data extracts by following these steps.

1. Select **Reports**.
2. Select **Data Extracts** from the drop-down menu.

3. Select the **New File** button for the extract you wish to view.

4. DLM is the default for states using the DLM alternate assessments. Other filters may be optional or required (required fields are marked with an asterisk).
5. Some users may have extract filters to select. Select filters and select **OK**.

![Create Extract Filters](image)

6. If you accessed the report previously, you will receive the message below. Select **Yes** to proceed.

![Create Extract confirmation](image)

**HINT:** Each request for an extract replaces the previous extract. Users may save extracts and archive them as needed.

7. Accessing and downloading the data in some extracts, especially statewide extracts, may take several minutes. During the download process, the File field transitions from “In Queue” to “In Progress,” and finally to displaying the CSV icon. Select the CSV icon to access the extract.

<table>
<thead>
<tr>
<th>Extract</th>
<th>Description</th>
<th>Requested</th>
<th>File</th>
<th>Action</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>
8. Follow the browser’s procedure for viewing or saving the CSV file to your computer.

**UNDERSTANDING THE CURRENT ENROLLMENT EXTRACT FOR ALL STATES**

The Current Enrollment extract includes all records for students who are enrolled in the user’s organization. The records include those uploaded by a data manager via an Enrollment Upload Template file, manually with the user interface, or by a web service.

**HINT:** Think of a CSV file as an unformatted Excel file. The inability to apply formatting mostly impacts fields with leading zeroes.

A student who is enrolled in more than one school will have more than one record (e.g., ELA and mathematics in one school and science in another school).

**Name of the Extract**
When saving the Current Enrollment extract, the file will have the following name:

Kite_Enrollment_Extract_OrgID_UserID_MM-DD-YY_HH-MM-SS.csv

**Fields in the Extract**
The extract includes information about each student.

---

**UNDERSTANDING THE DLM BLUEPRINT COVERAGE SUMMARY EXTRACT FOR INSTRUCTIONALLY EMBEDDED MODEL STATES**

The DLM Blueprint Coverage Summary extract is only available for Instructionally Embedded model states. This extract displays the percentage of students who have fully met blueprint requirements for each subject, grade, and criterion. Depending on Educator Portal user permissions, users can retrieve the summary at the state, district, and school level.

**HINT:** This extract is only available in Instructionally Embedded Model states.

**Name of the Extract**
When saving the DLM Blueprint Coverage extract, the file will have the following name:

DLM_Blueprint_Coverage_Summary_OrgID_UserID_MM-DD-YY_HH-MM-SS.csv

**Fields in the Extract**
The extract is sorted by district and school information, teacher, subject, and grade.

Some columns on the file are described in the following table.

<table>
<thead>
<tr>
<th>Column Heading</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Criterion</td>
<td>Conceptual area.</td>
</tr>
<tr>
<td>Fall Window # Students Testing</td>
<td>Number of students currently rostered in the Fall window.</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>-------------------------------------------------------------</td>
</tr>
<tr>
<td>Fall Window % Students Met</td>
<td>Percentage of those rostered students who have met the full requirements for the conceptual area in the Fall window.</td>
</tr>
<tr>
<td>Spring Window # Students Testing</td>
<td>Number of students currently rostered in the Spring window.</td>
</tr>
<tr>
<td>Spring Window % Students Met</td>
<td>Percentage of those rostered students who have met the full requirements for the conceptual area in the Spring window.</td>
</tr>
</tbody>
</table>

**UNDERSTANDING THE DLM INSTRUCTIONALLY EMBEDDED MONITORING EXTRACT FOR INSTRUCTIONALLY EMBEDDED MODEL STATES**

HINT: This extract is only available in Instructionally Embedded Model states.

Only Instructionally Embedded Model states will have the DLM Instructionally Embedded Monitoring extract. This extract enables state-, district-, and building-level users with appropriate Educator Portal permissions to quickly monitor the progress their students are making towards meeting full blueprint requirements. Test administrators also have access to this extract for the students rostered to them.

This extract is a large file and may take several minutes to access the data in it. A student will **not** appear on this extract until enrolled and rostered to at least one sub-ject in the current school year.

The data in the extracts display in columns for:

- **ELA blueprints requirements in both windows:** the requirements vary from four requirements in grades 3–8 to three requirements in high school.
- **Mathematics blueprint requirements in both windows:** the requirements vary from four in grades 3–8 to one requirement in high school.
- **Number of science assessments administered in the fall window:** the data reported in the extract will be the number of testlets taken per student in the fall window since testing science is optional and does not have blueprint requirements during that window.
- **Science blueprint requirements in the spring window:** the data reported in the extract will be the number of testlets that were completed out of the number required to meet the science blueprint requirements. The number of testlets completed will vary per student, but the total number required to meet the blueprint for each student will be either nine for most states or ten for states assessing high school end-of-instruction biology (i.e., 1 of 9, 2 of 9, 7 of 9, and so on).
Name of the Extract
When saving the DLM Instructionally Embedded Monitoring extract, the file will have the following name:

DLM_Instructionally_Embedded_Blueprint_Monitoring_Extract_OrgID_UserID_MM-DD-YY_HH-MM-SS.csv

Fields in the Extract
The following table describes fields in an extract.

<table>
<thead>
<tr>
<th>Column Heading</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>State</td>
<td>Name of Instructionally Embedded model state.</td>
</tr>
<tr>
<td>District</td>
<td>District in which the student is enrolled and rostered.</td>
</tr>
<tr>
<td>School ID</td>
<td>The unique code that has been assigned to the school in which the student is enrolled as listed in the state organizational table.</td>
</tr>
<tr>
<td>School Name</td>
<td>The school in which the student is enrolled that aligns to the school ID header as listed in the state organizational table.</td>
</tr>
<tr>
<td>Grade</td>
<td>The grade in which the student is enrolled.</td>
</tr>
<tr>
<td>Student Last Name</td>
<td>Student’s last name.</td>
</tr>
<tr>
<td>Student First Name</td>
<td>Student’s first name.</td>
</tr>
<tr>
<td>State Student ID</td>
<td>The student’s State Student Identifier.</td>
</tr>
<tr>
<td>Window</td>
<td>Fall or Spring window.</td>
</tr>
<tr>
<td>ELA Educator Last Name</td>
<td>Last name of the test administrator(s) to which the student is rostered for ELA.</td>
</tr>
<tr>
<td>Blueprint Requirement ELA % Met</td>
<td>Students in grades 3–8 have four requirements. This column presents the percentage of the blueprint requirements met during the fall window and again in the spring window. Those values will be: 0%, 25%, 50%, or 100%. Students in high school have three requirements. This column presents the percentage met during the fall window and again in the spring window. Those values will be 0%, 33%, 67%, or 100%.</td>
</tr>
<tr>
<td>Total Number of ELA Testlets Taken</td>
<td>Total number of ELA testlets taken during either the fall window or in the spring window.</td>
</tr>
<tr>
<td>ELA Blueprint Requirement 1</td>
<td>If the student is rostered to ELA in the enrolled school, Met or Not Met displays. If a student is not rostered to ELA in the enrolled school, NA will display.</td>
</tr>
<tr>

</tbody>
</table>

**Understanding the DLM Test Administration Monitoring Extract for Year-End Model States**

HINT: This extract is only available in Year-End model states.

Only Year-End Model states will have access to the DLM Test Administration Monitoring extract. This extract enables state-, district-, and building-level users with appropriate Educator Portal permissions to quickly monitor testing participation for each student in the optional instructionally embedded assessment window, and to monitor the progress students make towards meeting blueprint requirements in the required spring assessment window. Test administrators also have access to this extract for students rostered to them.

Testlet counts are included for each subject. Therefore, a student will appear on a separate line for each subject to which they are rostered. A student will not appear on this extract until enrolled and rostered to at least one subject in the current school year.

The extract has three subsections:

- **The Instructional # Testlets**: data are displayed in four columns and are from testlets administered during the optional instructionally embedded assessment window.
- **The End-of-Year # Testlets**: data are displayed in four columns and are from testlets administered during the required spring assessment window.
- **Field Test # Testlets**: data are displayed in one column and are for the number field test testlets administered during the spring assessment window. Zero or one field test testlet is available for each student in each subject.
Name of the Extract
When saving the DLM Test Administration Monitoring extract, the file will have the following name:
Kite_DLM_Test_Administration_Status_Extract_OrgID_UserID_MM-DD-YY_HH-MM-SS.csv

Fields in the Extract
The following table includes information about the optional assessments available during the instructionally embedded assessment window.

<table>
<thead>
<tr>
<th>Column Heading</th>
<th>Definition</th>
</tr>
</thead>
</table>
The following table includes information from the required assessments available during the spring assessment window.

<table>
<thead>
<tr>
<th>Column Heading</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>End of Year # Testlets Not Started</td>
<td>The number of testlets assigned to the student by the system but not yet administered.</td>
</tr>
<tr>
<td></td>
<td>The system assigns testlets one at a time per subject. Therefore, only one testlet per subject will display as not started.</td>
</tr>
<tr>
<td>End of Year # Testlets In Progress</td>
<td>The number of testlets that are in progress or not yet submitted in Student Portal at the time the extract is accessed.</td>
</tr>
<tr>
<td></td>
<td>Testlets can be taken one at a time in Student Portal. Therefore, the number of testlets in progress will display as 0 or 1.</td>
</tr>
<tr>
<td>End of Year # Testlets Completed</td>
<td>The number of testlets that have been completed by the student. By the end of the state’s spring assessment window, the numbers in this column should be equal to the numbers in the End of Year # Testlets Required column.</td>
</tr>
<tr>
<td>End of Year # Testlets Required</td>
<td>The number of testlets required to meet blueprint requirements for each subject. This number will vary depending per grade and subject.</td>
</tr>
<tr>
<td>Field Test # Testlets Completed</td>
<td>The number of field test testlets that were administered to a student. Zero or one field test testlet is available for each student in each subject.</td>
</tr>
</tbody>
</table>

**UNDERSTANDING THE FIRST CONTACT SURVEY EXTRACT FOR ALL STATES**

The First Contact Survey extract is a CSV file that lists learner characteristic settings for the students enrolled in a district or school. Only students who have First Contact Survey settings are included in the file.

**Fields in the Extract**

The file contains a column for every possible First Contact Survey setting and indicates whether a learner characteristic has been selected for a student. If a characteristic has multiple settings, the details of those settings are listed. For example, Hearing can be set to one of several classifications. The file lists the classification of the hearing loss and at what decibel levels.

The following results may appear in the extract.

- **N/A**: The characteristic has not been selected because the selection is dependent on another item being checked.
- **Not Selected**: A characteristic has not been selected (e.g., Uses Sign Language).
- **Selected**: The characteristic has been selected on the student’s First Contact Survey.

Some columns on the file are described in the following table.

<table>
<thead>
<tr>
<th>Column Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Last Modified Time</td>
<td>The date and time that the First Contact survey settings were last modified.</td>
</tr>
<tr>
<td></td>
<td>The format used is MM/DD/YYYY HH:MM AM/PM and time zone.</td>
</tr>
<tr>
<td>Last Modified By</td>
<td>The name of the person who made the last change to the First Contact survey settings.</td>
</tr>
</tbody>
</table>

**Understanding the PNP Settings Counts Extract for All States**

The PNP Settings Counts extract is a CSV file that lists the total number of students who have a particular setting on their PNP Profile.

**HINT**: This CSV file will have one line of data summarizing the PNP settings for the user’s selected organization.

**State-, District-, and School-Level Users**

Depending on the user role, filters are available for selecting a choice of three summary levels: State, District, or School.

**Name of the Extract**

When saving the PNP Profile Counts download, the file will have the following name:

Summary_PNP_Profile_OrgID_UserID_MM-DD-YY_HH-MM-SS.csv

**Fields in the Extract**

The report includes columns of information about the PNP Profile settings in use. Unlike the PNP Profile extract, PNP Profile settings are summarized by category. The extract provides a count of the total number of students who have the support selected in their PNP Profile.

**NOTE**: Kansas users will also have data on a separate line for their general assessment included in this extract since Kansas uses Educator Portal for both their general assessment and the DLM alternate assessment. Other states will only have DLM assessment settings.
UNDERSTANDING THE PNP SETTINGS EXTRACT FOR ALL STATES

The PNP Settings extract is a CSV file that lists the accessibility (PNP Profile) settings for the students enrolled in a particular district or school. Only students who have PNP Profile settings are included in the file. The file contains a column for every possible PNP Profile setting and indicates if that setting has been chosen for a student.

Name of the Extract
When you save the PNP Settings extract, the file will have the following name:

Educator_Portal_PNP_OrgID_UserID_MM-DD-YY_HH-MM-SS.csv

Fields in the Extract
The file includes information about a student’s PNP Profile settings. Each of the possible PNP Profile settings are included in the file.

Review the example below. The student names are fictitious.

<table>
<thead>
<tr>
<th>Student Last Name</th>
<th>Student First Name</th>
<th>Last Modified Time</th>
<th>Last Modified By</th>
<th>Display - Magnification</th>
<th>Display - Magnification Activate by Default</th>
<th>Display - Magnification Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Woods</td>
<td>Richelle</td>
<td>02/13/2021 11:27 AM CST</td>
<td>Kite Trainer</td>
<td>Selected</td>
<td>Selected</td>
<td>N/A</td>
</tr>
<tr>
<td>Jefferson</td>
<td>Sarah</td>
<td>01/12/2020 01:42 AM CST</td>
<td>Kite Trainer</td>
<td>Selected</td>
<td>Selected</td>
<td>N/A</td>
</tr>
</tbody>
</table>

The file indicates whether a support has been selected for a student. If a support has multiple settings, the details of those settings are listed. For example, the overlay color can be set to one of several predetermined colors. The file lists the hexadecimal value of the color selected (e.g., #87cffd) as well as the description of the color (e.g., Light Sky Blue).

The following results may appear in the extract.

- **N/A**: The support has not been selected. The selection is dependent on another item being checked.
- **Not Selected**: A support has been selected but Activate by Default has not been selected.
- **Selected**: The support has been selected on the student’s PNP Profile.

Some columns on the file are described in the following table.

<table>
<thead>
<tr>
<th>Column Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Last Modified Time</td>
<td>The date and time that the PNP Profile settings were last modified.</td>
</tr>
<tr>

</table>
**Understanding the Roster Extract for All States**

The Roster extract is a CSV file that shows all roster records by organization, depending on the user’s permissions or the organizational level selected. The extract includes all records whether created via a Roster Upload Template file, manually with the user interface, or by a web service.

**Name of the Extract**

When saving the Roster extract, the file will have the following name:

Kite_Roster_Extract_OrgID_UserID/MM/DD-YY_HH-MM-SS.csv

**Understanding the Security Agreement Completion Extract for All States**

The Security Agreement Completion extract is a CSV file that shows the status of all security agreement records by organization.

**Name of the Extract**

When saving the Security Agreement Completion extract, the file will have the following name:

Security_Agreement_Extract_OrgID_UserID/MM/DD-YY_HH-MM-SS.csv

**Fields in the Extract**

The fields in the Security Agreement Completion extract show each user’s location (state, district, and building), the user’s name, and security agreement status. If the security agreement has been completed, the extract will display the name entered in the agreement’s signature field and the date the agreement was signed.

The security agreement status column will show as accepted, rejected, or blank. A blank field means the security agreement has not been started.

**Understanding the Student Roster and First Contact Survey Extract for All States**

This extract is available to all Educator Portal users in all states. Using this extract can help users quickly monitor two components of testing readiness: student rosters and the submission of the First Contact survey. A student cannot participate in the DLM alternate assessment until these two components are completed.

Each student enrolled for the school year will appear on the extract, typically one line per student. Occasionally, a student is enrolled for different subjects in different organizations. Those students will have more than one line in the extract.

**Name of the Extract**

When saving the Student Roster and First Contact Survey extract, the file will have the following name:

Student_Roster_and_First_Contact_Survey_Extract_OrgID_UserID/MM/DD-YY_HH-MM-SS.csv

**Fields in the Extract**

The fields in the Student Roster and First Contact Survey extract display each student’s organization (state, district, school name, and school code) followed by the student’s demographic information (last name, first name, date of birth, grade, and State Student Identifier). Then a column displays the status of the First Contact Survey: Not Started, In
Progress, Ready to Submit, or Completed. The extract will include the educator’s name for each subject tested in the state, followed by whether the student is rostered to the educator for the subject: Rostered or Not Rostered.

**Understanding the Training Status Extract for All States**

The Training Status extract is a CSV file that shows a list of DLM users by organization and their training completion status.

**Name of the Extract**

When saving the Training Status extract, the file will have the following name:

DLM_PD_Training_Status_Details_OrgID_UserID_MM-DD-YY_HH-MM-SS.csv

**Fields in the Extract**

The fields in the Training Status extract show each user’s district, school, username, first and last name, email, user role, and training status. Training completion status will show in the extract as Yes or No under the heading called RTComplete (RT stands for Required Training).

**Understanding the Users Extract for All States**

The Users extract includes all records for Educator Portal users in the user’s organization. This includes those uploaded by a data manager via a User Upload Template file, manually with the user interface, or by a web service.

HINT: A single user will have multiple records if the user is assigned to multiple organizations (e.g., a teacher who serves students from multiple schools).

**Name of the Extract**

When you save the Users extract, the file has the following name:

Kite_User_Extract_OrgID_UserID_MM-DD-YY_HH-MM-SS.csv

**Fields on the Extract**

The extract includes information about the roles assigned to a user. If assigned to more than one organization, the user will appear on multiple lines in the CSV file. For example, if an educator works in more than one school, that user will appear in the file on a line for each organization.

All the user’s assigned roles for a particular organization appear on a single line of the CSV. For example, if the user is a Building Test Coordinator and a Teacher, an X will be in each column.
## GLOSSARY

This glossary compiles definitions and acronyms relevant to assessment for the Dynamic Learning Maps alternate assessment.

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>display enhancements</td>
<td>Options that change the testlet appearance on the student’s device screen, including magnification, overlay color, invert color choice, and contrast color.</td>
</tr>
<tr>
<td>Educator Portal</td>
<td>Educator Portal is a secure, web-based application designed to aid teachers and administrative users in the administration of assessments, including student enrollment and monitoring/tracking results. Users can access Educator Portal using any supported browser via <a href="https://educator.kiteaai.org/">https://educator.kiteaai.org/</a>. For information on working within Educator Portal, see the DATA MANAGEMENT MANUAL on the DLM website.</td>
</tr>
<tr>
<td>engagement activity</td>
<td>An activity at the beginning of a testlet that describes a scenario, taps prior knowledge or experience, and/or introduces the concept to be addressed. In English language arts reading testlets, the first reading of the text often serves as the engagement activity. In mathematics and science, the engagement activity provides context for the items. The engagement activity for some science testlets at the upper linkage levels include a short video without audio.</td>
</tr>
<tr>
<td>Essential Elements</td>
<td>Essential Elements are the content standards used for assessment for students with the most significant cognitive disabilities. Essential Elements are reduced in depth, breadth, and the level of complexity, and they build a bridge from the content in the grade-level standards to academic expectations. They are specific statements of knowledge and skills linked to the grade-level expectations identified in K–12 grade-level standards for English language arts and mathematics. Essential Elements in science are linked to the National Research Council’s Framework for K–12.</td>
</tr>
</tbody>
</table>
First Contact survey (IE Model)

A survey used to collect background information about students who are eligible for the DLM alternate assessments. The survey goes beyond basic demographic information and includes questions on communication, assistive technology devices, motor and sensory impairments, and academic performance.

In the fall window, data gathered from the core questions from the survey are used to recommend the linkage level for each Essential Element for all subjects. In addition to the core questions, data gathered from the science questions are used to recommend the linkage level for each science Essential Element.

In the spring assessment window, data gathered from the core questions are also used to recommend the linkage level for any ELA and mathematics Essential Elements that were not tested during the fall window.

In the spring assessment window for science, data gathered from the core questions plus the science questions are used to assign the linkage level of the student’s first science testlet.

In both windows, data gathered from the core questions plus data from the writing questions are used to recommend the linkage level for the writing testlet.

First Contact survey (YE Model)

A survey used to collect background information about students who are eligible for the DLM alternate assessments. The survey goes beyond basic demographic information and includes questions on communication, assistive technology devices, motor and sensory impairments, and academic performance.

In the optional instructionally embedded assessment window, data gathered from the core questions from the survey are used to recommend the linkage level for each ELA and mathematics Essential Element. In addition to the core questions, data gathered from the science questions are used to recommend the linkage level for each science Essential Element. Data gathered from the core questions plus data from the writing questions are used to recommend the linkage level for the writing testlet.

In the spring assessment window, data gathered from the core questions are used to assign the linkage level for the student’s first ELA and mathematics testlets.
Data gathered from the core questions plus data from the science questions are used to assign the linkage level of the student’s first science testlet.

In the spring window, data gathered from the core questions plus data from the writing questions are used to assign the linkage level for the writing testlet, instead of performance of previously completed testlets.

**First Contact survey (Science Only)**

A survey used to collect background information about students who are eligible for the DLM alternate assessments. The survey goes beyond basic demographic information and includes questions on communication, assistive technology devices, motor and sensory impairments, and academic performance.

In the optional instructionally embedded assessment window, data gathered from the core questions from the survey are used to recommend the linkage level for each ELA and mathematics Essential Element. In addition to the core questions, data gathered from the science questions are used to recommend the linkage level for each science Essential Element. Data gathered from the core questions plus data from the writing questions are used to recommend the linkage level for the writing testlet.

In the spring assessment window, data gathered from the core questions are used to assign the linkage level for the student’s first ELA and mathematics testlets.

Data gathered from the core questions plus data from the science questions are used to assign the linkage level of the student’s first science testlet.

In the spring window, data gathered from the core questions plus data from the writing questions are used to assign the linkage level for the writing testlet, instead of performance of previously completed testlets.

**Instruction and Assessment Planner (IE Model)**

A part in Educator Portal where test administrators perform assessment functions for a student during both the required fall and spring windows. Functions include selecting an Essential Element and linkage level for instruction and subsequent testing. Most data about the student can be accessed from the Instruction and Assessment Planner, including indication of mastery of an Essential Element at the tested linkage level and indication of when the blueprint requirements are met for each subject tested.
**Instruction and Assessment Planner (YE Model and Science)**

A part in Educator Portal where test administrators perform assessment functions for a student during the optional instructionally embedded assessment window. Functions include selecting an Essential Element and linkage level for instruction and subsequent testing. Most assessment data about the student is provided in the Instruction and Assessment Planner during this window, including a mastery of a tested Essential Element at a linkage level.

**Instructionally embedded assessment (IE Model)**

Instruction and assessment are closely integrated with assessment functions being performed throughout instruction in both the required fall and spring windows. Functions include educator-selected Essential Elements and linkage levels for instruction and subsequent testing. Most assessment data about the student is provided in the Instruction and Assessment Planner during each window, including a mastery indication for a tested Essential Element at a linkage level.

**Instructionally embedded assessment (YE Model)**

Occurs during the optional instructionally embedded assessment window where instruction and assessment are closely integrated with assessment functions being performed throughout instruction. Functions include educator-selected Essential Elements and linkage levels for instruction and subsequent testing. Most assessment data about the student is provided in the Instruction and Assessment Planner during this window, including a mastery indication for a tested Essential Element at a linkage level.

**Kite Student Portal**

Student Portal is a secure testing platform used by students to take testlets. Once launched, Student Portal prevents students from accessing unauthorized webpages or applications during testing.

All students taking the DLM alternate assessment will have unique accounts in Kite Student Portal. Test administrators do not have accounts in Student Portal.

In addition to operational testing in the Student Portal, practice activities and released testlets can be administered using Student Portal. The log in credentials for the practice activities and released testlets are unique to each one. Access the TEST ADMINISTRATION MANUAL for more information about Student Portal.
linkage level  ELA and mathematics: A small section of the DLM learning map model containing one or more nodes that represent critical concepts or skills needed to learn the Essential Element. ELA and mathematics each have five linkage levels: Initial Precursor, Distal Precursor, Proximal Precursor, Target, and Successor.

Science: An incremental level of complexity toward the learning target where an assessment was developed for the science Essential Elements. Science has three linkage levels: Initial, Precursor, and Target. Linkage levels are always related directly to grade-level Essential Elements but at different levels of cognitive complexity. The Target level is most closely related to the grade-level expectation.

Personal Learning Profile  A collective term used to describe a student’s personal needs and preferences settings entered in the PNP Profile in addition to information about the student entered in the First Contact survey in Educator Portal.

Personal Needs and Preferences (PNP) Profile  Student-specific information that informs Kite Student Portal about an individual student’s personal needs and preferences. The PNP Profile includes information the system needs to make the student’s user interface in Student Portal compatible with their accessibility needs. The PNP Profile includes information about display enhancements, language and braille, and audio and environmental supports. Educators who know the student provide the information in the profile found in Educator Portal.

plan  A plan is created in the Instruction and Assessment Planner in Educator Portal. A plan includes the educator-selected Essential Element and educator-selected linkage level and leads to the educator-assigned testlet for ELA, mathematics, and science during the fall window and ELA and mathematics during the spring window.

plan (IE Model)  A plan is created in the Instruction and Assessment Planner in Educator Portal only during the optional instructionally embedded assessment window. A plan includes the educator-selected Essential Element and educator-selected linkage level and leads to the educator-assigned testlet for ELA, mathematics, and science.
A plan is created in the Instruction and Assessment Planner in Educator Portal only during the optional instructionally embedded assessment window. A plan includes the educator-selected Essential Element and educator-selected linkage level and leads to the educator-assigned testlet for science.

**Student Activity Table (IE Model)**

A page in the Instruction and Assessment Planner in Educator Portal. The Student Activity Table provides an at-a-glance overview for all students rostered to the test administrator in the subjects in which the students are being tested during either the fall or spring window. The data in the Student Activity Table populates based on test administrator’s actions taken on the Student View Page for each student, i.e., how many testlets were administered and whether the students have met blueprint requirements.

The table also includes three icons providing easy access to the First Contact survey, PNP Profile, and the student’s credentials.

**Student Activity Table (YE Model and science only)**

A page in the Instruction and Assessment Planner in Educator Portal. The Student Activity Table provides an at-a-glance overview for all students rostered to the test administrator in the subjects in which the students are being tested during the optional instructionally embedded assessment window. The data in the Student Activity Table populates based on the test administrator’s actions on the Student View Page for each student, i.e., how many testlets were administered.

The table also includes three icons providing easy access to the First Contact survey, PNP Profile, and the student’s credentials.

**Student View Page (IE Version)**

A page in the Instruction and Assessment Planner in Educator Portal that displays details about one student at a time for each Essential Element and linkage level. During both the required fall and spring windows, test administrators use the Student View Page for several actions for each student, i.e., creating a plan and assigning a testlet. The system will display information about the student’s testing progress, including whether the student achieved mastery of an Essential Element at the linkage level tested. The system will also indicate on the Student View Page when the student meets blueprint requirements.
**Student View Page (YE and Science Only Version)**

A page in the Instruction and Assessment Planner in Educator Portal that displays details about one student at a time for each Essential Element and linkage level. During the optional instructionally embedded assessment window, test administrators use the Student View Page for several instruction and assessment actions for each student, i.e., creating a plan and assigning a testlet. The system will display information about the student’s testing progress, indicating whether the student achieved mastery of an Essential Element at the linkage level tested.

**testlet (IE Model)**

A short assessment that begins with an engagement activity and includes three to nine items, depending on the subject. Together the items increase the instructional relevance of the assessment and provide a better estimate of a student’s knowledge, skills, and understandings than can be achieved by a single assessment item. Each testlet assesses only one Essential Element except for the writing testlet, which assesses all writing Essential Elements together in one testlet. Testlets are either teacher-administered or computer-delivered. More specific information is found in the Test Administration Manual.

**testlet (YE Model)**

A short assessment that begins with an engagement activity and include three to nine items, depending on the subject. Together the items increase the instructional relevance of the assessment and provide a better estimate of a student’s knowledge, skills, and understandings than can be achieved by a single assessment item. Each testlet assesses only one Essential Element, except for the writing testlet, which assesses all writing Essential Elements together in one testlet.

Testlets are delivered one at a time in each subject. They are either teacher-administered or computer-delivered and they are adaptive, except for the writing testlet, which is always delivered last and linkage level assignment is not based on performance of previous testlets. More specific information is found in the Test Administration Manual.
**testlet**

*(Science Only)*

A short assessment that begins with an engagement activity and includes three to nine items. Together the items increase the instructional relevance of the assessment and provide a better estimate of a student’s knowledge, skills, and understandings than can be achieved by a single assessment item. All students receive 9 testlets. In states delivering end-of-instruction biology, students receive 10 testlets. Each testlet assesses only one Essential Element. Testlets are delivered one at a time, are adaptive, and are either teacher-administered or computer-delivered. More specific information is found in the TEST ADMINISTRATION MANUAL.

**Testlet Information Page (TIP)**

*(IE and YE Models)*

A PDF that is unique to each testlet and provides specific information to guide the test administrator in delivering the assessment.

The Testlet Information Page (TIP) for each testlet lists the materials needed or describes the attributes of the materials needed specific to a testlet.

The materials listed in the TIP are especially needed for the teacher-administered testlets at the Initial and Distal Precursor linkage levels in ELA and mathematics, and the Initial linkage level for science.

The TIP for testlets at the Initial level for science has picture response cards that must be printed before testing. Best practice is to print them in color.

Computer-delivered testlets require fewer materials than the teacher administered testlets.

**Testlet Information Page (TIP)**

*(science Only)*

A PDF that is unique to each testlet and provides specific information to guide the test administrator in delivering the assessment.

The Testlet Information Page (TIP) for each testlet lists the materials needed or describes the attributes of the materials needed specific to a testlet.

The materials listed in the TIP are especially needed for the teacher-administered testlets at the Initial linkage level for science. The TIP at the Initial level will have picture response cards that must be printed before testing. Best practice is to have them printed in color.

Computer-delivered testlets require fewer materials than the teacher administered testlets.
