All screenshots, data dictionaries, and templates shown or referred to in this manual are accurate on the publication date noted above.

When this manual is updated, the publication date will also be updated. A summary of changes is included in the Appendix under Document History.
ABOUT THIS MANUAL

Although this manual contains a large amount of information, it is important to read it in its entirety. To effectively sort information for ease of use, the manual is organized into three categories (Table 1).

Table 1

Test Administration Manual Organization

<table>
<thead>
<tr>
<th>Category</th>
<th>Information Included</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introduction</td>
<td>Provides an orientation to the Dynamic Learning Maps® (DLM®) project, the assessment system, and the DLM testlets.</td>
</tr>
<tr>
<td>Assessment</td>
<td>Provides information on the preassessment process, spring assessments, and preparation for future years.</td>
</tr>
<tr>
<td>Systems</td>
<td>Provides an overview of Kite® Student Portal, with step-by-step instructions and screenshots. Go to the EDUCATOR PORTAL USER GUIDE for detailed information on all Educator Portal processes.</td>
</tr>
</tbody>
</table>
FINDING HELP

When the information in this manual and resources from the state Dynamic Learning Maps® (DLM®) webpage do not lead to solutions, these contacts can provide additional support (Table 2).

HINT: Print this page and keep it handy!

**When Contacting the DLM Service Desk**

- **Do not send any Personally Identifiable Information (PII)** for a student via email or Live Chat in Educator Portal. Sending PII is a federal violation of the Family Education Rights and Privacy Act (FERPA). PII includes information such as a student’s name or state identification number. Each state has unique PII requirements. Check with your assessment coordinator to find out what student information can be legally sent by email or Live Chat in your state.
- **Do send**
  - your contact information (email address and name)
  - your school name (include the district if contacting state-level personnel)
  - error messages, including the testlet number if applicable to the problem

AUDIENCE AND PURPOSE

The TEST ADMINISTRATION MANUAL for the Dynamic Learning Maps® (DLM®) alternate assessment provides test administrators with the key knowledge and tools needed to prepare for and administer the assessment. Test administrators (e.g., educators, examiners, proctors, or teachers) prepare students for and administer the assessments to them.

To learn about updates to test administration resources, such as this manual, subscribe to Test Updates on the DLM website.
The following checklists detail the critical steps for test administrators to follow. Refer to the checklists while reading this manual and while preparing for the Dynamic Learning Maps® (DLM®) alternate assessment. Follow the provided links to go to topics in this guide for more information or to access other resources. The checklists are organized into four sets of tasks for different parts of the school year:

1. Before Beginning Assessments (Table 4)
2. Spring Assessments (Table 5)
3. Preparing for Next Year (Table 6)
4. Instructionally Embedded Assessments (optional, but recommended) (Table 7)

This section is a general overview. Specific step-by-step guidance on how to use the system is provided in the EDUCATOR PORTAL USER GUIDE.

1. BEFORE BEGINNING ASSESSMENTS

Table 4

**Before Beginning Assessments Checklist**

<table>
<thead>
<tr>
<th>Step</th>

ABOUT THE DYNAMIC LEARNING MAPS® ALTERNATE ASSESSMENT SYSTEM

Educators use the Dynamic Learning Maps® (DLM®) Alternate Assessment System to assess what students with the most significant cognitive disabilities know and can do in the DLM assessed subjects in grades 3–8 and high school. The department of education policy in each state determines the subjects and grades that are assessed. The DLM Alternate Assessment System provides accessibility by design and is guided by the core beliefs that all students should have access to challenging, grade-level content, and that based on this challenging content, test administrators must adhere to the highest levels of integrity, both in providing instruction and in administering the assessment.

STUDENTS

As defined by the U.S. Department of Education, students with the most significant cognitive disabilities have a disability or multiple disabilities that especially affect intellectual functioning and adaptive behaviors. When adaptive behaviors are significantly affected, students are unlikely to develop the skills needed to live independently and to function safely in daily life when they reach adulthood. The DLM alternate assessment is designed for students for whom general education assessments are not appropriate, even with accessibility supports.

Students taking the DLM alternate assessment require extensive direct instruction and substantial supports to achieve measurable gains. They should receive academic instruction aligned to grade-level content standards, but at a reduced depth, breadth, and complexity.

Check with your assessment coordinator or look on your DLM state webpage for the subjects and grades assessed in your state.
The Dynamic Learning Maps Foundations for English Language Arts and Mathematics

The DLM learning map models are highly connected representations of how academic skills are acquired as reflected in research literature. Both English language arts (ELA) and mathematics have a fully developed learning map model. ELA and mathematics are assessed in each grade 3-8 and high school.

Nodes in the maps represent discrete knowledge, skills, and understandings in either ELA or mathematics, as well as important foundational skills. The maps go beyond traditional learning progressions by including multiple and alternate pathways through which students may develop content knowledge. The ELA learning map model includes more than 2,000 nodes. The mathematics learning map model includes more than 2,300 nodes, and both subject maps include more than 150 foundational nodes associated with them. More than 10,000 connections exist between the nodes in the combined maps.

Essential Elements

The DLM content standards for ELA, mathematics, and science are called Essential Elements and are the learning targets used for the assessments. The purpose of the Essential Elements is to build a bridge from grade-level content standards to academic expectations for students with the most significant cognitive disabilities.

ELA and Mathematics Essential Elements

ELA and mathematics Essential Elements are linked to the common core state standards. ELA and mathematics learning map models each have small sections of critical concepts or skills called nodes that are needed to learn the Essential Element for the subject. These small sections are at different levels of complexity and are called linkage levels.

ELA and Mathematics Linkage Levels

The DLM alternate assessment provides testlets for ELA and mathematics at five linkage levels. The Target linkage level is based on nodes that align to the knowledge and skills described by the Essential Element and indicate a student’s performance in relationship to the grade-level target. Then, multiple pathways on the map were carefully inspected to identify nodes that link to the Target linkage level, both preceding and extending beyond it.

The least complex linkage level is called Initial Precursor. Testlets developed at that linkage level reflect foundational nodes in the DLM map, which are skills and understandings necessary for learning subsequent academic content (e.g., “focus attention”). Testlets at this level are typically intended for students who do not yet have symbolic communication. Initial Precursor testlets are administered by the test administrator, who follows the instructions within the testlet, observes the student’s behavior, and then records the student’s responses in the testlet in Student Portal.

Two linkage levels are between the Initial Precursor and the Target linkage levels: Distal Precursor and Proximal Precursor. Testlets at the Distal Precursor and Proximal Precursor linkage levels allow students to develop the knowledge, skills, and understandings needed to reach the Target. Testlets at these linkage levels may be either teacher-administered like those
at the Initial Precursor linkage level, or they may be computer-delivered testlets, depending on the skills being tested.

Testlets at the Successor linkage level give students the opportunity to take the next step beyond the expectations described by the Essential Element at the Target linkage level.

The Precursor, Target, and Successor linkage levels are typically computer-delivered, although sometimes, depending on the skills being assessed, they also may be teacher-administered testlets.

For all ELA and mathematics Essential Elements that are available for assessment, resources describing their linkage levels and nodes are provided on the Instructional Resources page on the DLM website. An Excel workbook, titled Professional Development Modules Supporting Essential Elements, is also available. This workbook cross-references each Essential Element to the relevant professional development modules (Figure 1). The workbook includes one tab for ELA and one for mathematics.

Figure 1. Professional Development Modules Supporting Essential Elements workbook.

http://dlmpd.com

BLUEPRINTS

Testing blueprints are a subset of Essential Elements used to develop assessments. The Essential Elements in the blueprints were selected by DLM Consortium state education leaders along with DLM staff. Testing all ELA and mathematics Essential Elements in the blueprints is required during both the fall and spring assessment windows. The ELA and mathematics blueprints contain Essential Elements from specific ELA and mathematics claims and conceptual
areas for each grade. Test administrators are guided by the blueprint requirements in making their Essential Element selections for instruction and assessment.

**THE RELATIONSHIP BETWEEN ENGLISH LANGUAGE ARTS AND MATHEMATICS ESSENTIAL ELEMENTS, NODES, AND MINI-MAPS**

Understanding the DLM alternate assessment involves understanding the components of the system. For ELA and mathematics, these components include the DLM learning map model, claims, conceptual areas, Essential Elements, nodes, linkage levels, and mini-maps.

Each DLM learning map model is a large and complex representation of how students can develop academic knowledge and skills. These maps highlight multiple potential pathways that students may follow to develop knowledge and skills in ELA and mathematics.

Claims organize the DLM learning map model so that the maps can drive the assessment system and support test administrators in setting instructional priorities at each grade level. DLM claims are broad statements about what students are to learn and what the assessments measure.

Subareas of the claims, called conceptual areas, identify large areas of conceptually-related skills in the DLM learning map model and connect the maps to the overall claims. Conceptual areas are organized around common cognitive processes (Figure 2.)

*Figure 2.* The components of the DLM Alternate Assessment System.
Essential Elements represent grade-level targets for students with the most significant cognitive disabilities. Essential Elements are embedded in the DLM learning map model and are related to small clusters of nodes within the maps called mini-maps.

Figure 3 is an example of a mathematics mini-map with nodes associated with one Essential Element.

**Figure 3. Mathematics mini-map.**

![Mathematics mini-map diagram](image)

Each testlet spans a portion of the DLM learning map model that contains nodes at one linkage level. Each linkage level contains one or more nodes related to an identified Essential Element. Linkage levels precede, correspond to, or go beyond the expectation expressed in the Essential Element. Linkage levels specify a student’s performance in relation to the grade-level target.
ELA and mathematics each have five linkage levels:

1. Initial Precursor (IP)
2. Distal Precursor (DP)
3. Proximal Precursor (PP)
4. Target (T)
5. Successor (S)

The mini-maps also include untested nodes, which are designated with a UN. Although not tested for an Essential Element, they are still important as part of the pathway.

HINT: A PDF with each tested Essential Element and its associated mini-map is available for ELA and mathematics on the Instructional Resources page. These mini-maps show how students gain the knowledge and skills that help them achieve the Target linkage level for the Essential Element. Use the link to the Instructional Resources page for ELA and mathematics on your state page on the DLM website.

**SCIENCE**

NOTE: Check your state’s DLM webpage for the subjects tested in your state.

In 2014, five DLM member states began a two-phase development of a science assessment following the DLM model. Since that time, most of the consortium states have joined the effort.

Phase I of science development included a 2016 spring operational assessment based on alternate science content standards at three levels of complexity for three grade bands. Phase II, which is in progress, includes the development of a learning map model for science. Several professional development modules are available and more are in progress.

**Essential Elements for Science**

The DLM science Essential Elements are the learning targets for the science assessments. These Essential Elements are specific statements of knowledge, skills, and understandings, including Science and Engineering Practices, and are linked to the grade-level expectations identified in the National Research Council’s Framework for K–12 Science Education. The purpose of the Essential Elements is to build a bridge from the general education science content standards to the science academic expectations for students with the most significant cognitive disabilities.

Science Essential Elements are divided into grade bands: elementary, middle school, and high school. Each grade band’s assessment is designed to assess a specific set of Essential Elements called the blueprints and are available on your state’s webpage on the DLM website.
Science: The Relationship Between the Science Blueprint, Essential Elements, and Linkage Levels

In the DLM science blueprint, the major assessed science subjects are called domains and are assessed across all grade bands. The domains in the DLM science blueprint are physical science, life science, and Earth and space science. Within each domain, three to four core ideas have been selected for use in instruction and assessment. Core ideas are the key organizing principles in science and are taught and learned over multiple grades at increasing levels of depth and sophistication. Each core idea is further narrowed into topics. Essential Elements were developed from the content in the domains, core ideas, and topics.

Essential Elements specify academic learning targets. In science, each Essential Element has three linkage levels:

- Initial
- Precursor
- Target

The highest science linkage level is the Target linkage level and is most aligned to the content of the grade-level standard. The Initial and Precursor linkage levels are less complex than the Target linkage level and provide access to the Target at a reduced depth, breadth, and level of complexity. Testlets at the Initial linkage level are typically intended for students who do not yet have symbolic communication.

For testlets at the Initial linkage level, the test administrator observes the student’s behavior as directed by the Educator Directions in the testlet. The test administrator then records responses for the student in Student Portal. Testlets at the Precursor linkage level allow students to develop the knowledge, skills, and understanding needed to reach the target. Testlets at the Precursor linkage level and Target linkage level are most often computer-delivered and typically taken by the student on the computer. More information about teacher-administered and computer-delivered testlet types comes later in this manual, beginning on page 44.

Table 8 is an example of a middle school physical science Essential Element with the corresponding linkage levels. Notice the reduced breadth, depth, and complexity of the expectation from level to level, as well as the embedded practice, which focuses on carrying out investigations.

Table 8

<table>
<thead>

<tbody>
<tr>
<td><strong>Essential Element</strong>: EE.MS-PS2-2</td>
</tr>
<tr>
<td><strong>Target level</strong>: Investigate and predict the change in motion of objects based on the forces acting on those objects.</td>
</tr>
<tr>
<td><strong>Precursor level</strong>: Investigate and identify ways to change the motion of an object (e.g., change an incline’s slope to make an object go slower, faster, farther).</td>
</tr>
<tr>
<td><strong>Initial level</strong>: Identify ways to change the movement of an object (e.g., faster, slower, stop).</td>
</tr>
</tbody>
</table>
Instructional Activities are available for science on the state’s DLM website. Filter by Teacher > Assessment Resources > Science.

Professional development modules for science can be accessed by selecting Professional Development at the top of the DLM website.

ABOUT KITE® STUDENT PORTAL AND EDUCATOR PORTAL

The Kite Suite was designed to deliver the next generation of large-scale assessments and was tailored to meet the needs of students with the most significant cognitive disabilities who often have multiple disabilities. Educators and students will use different parts of the Kite Suite.

Students have accounts in Kite Student Portal.

Kite Student Portal is the customized, secure interface that test administrators use to deliver the assessment to students. Educators and staff do not have accounts in Student Portal. Either the student will sign in using their own unique username and password, or their test administrator will sign in for the student.

The most current version of Kite Student Portal must be used and can be found on the Kite Suite page on the DLM website.

Once Student Portal is launched, other websites or applications cannot be accessed during the assessment. Student Portal on iPads has an auto-lock feature that prevent users from using other apps while Student Portal is in use.

Practice activities and released testlets are also available in Student Portal using demo usernames and passwords.

Staff and educators have accounts in Kite Educator Portal.

Kite Educator Portal is the administrative application where educators manage student data and retrieve reports and extracts. Educators will access Educator Portal online using a browser. For information on working within Educator Portal, go to the Educator Portal User Guide on the DLM website.

HOW TO USE THE DLM WEBSITE

The DLM Consortium provides resources for test administrators on the DLM website. Additionally, state-specific resources may also be available there.

To access resources for your state and role, follow these steps:

1. Go to the DLM website.
2. Select **FOR STATES** at the top menu banner to reveal a list of states.
3. Select your state.

HINT: Bookmark your state page for quick access later.

**Resources on the DLM Website**

Table 9 lists DLM resources designed for test administrators. These resources are available on most state webpages.

OVERVIEW

The Dynamic Learning Maps® (DLM®) alternate assessment is designed to help plan and track a
student’s learning throughout the year. Assessments are available in the optional instructionally
embedded assessment window and in the required spring assessment window.

Instructionally embedded assessments are optional but recommended (Table 10). During the
fall and winter months, test administrators access these assessments using the Instruction and
Assessment Planner in Educator Portal. Reporting features are available in Educator Portal that
help test administrators plan and adjust instruction. The optional instructionally embedded
assessments do not contribute toward students’ Individual Student Score Reports and do not
predict nor guarantee students’ overall performance during the spring assessment window. The
optional window closes before the opening of the spring assessment window.

Testing students in the spring assessment window is required. Each state sets dates for this
window. During the window, all eligible students take testlets that cover all Essential Elements
on the blueprint for each subject. Results from the spring assessment window will reflect
student performance each school year and are used for accountability purposes.

**TESTLETS**

Students with the most significant cognitive disabilities who qualify for the DLM alternate assessment require extensive, repeated, and individualized instruction and ongoing supports that are not temporary or transient. These students often have difficulty retaining information in working memory for extended periods of time. Therefore, testlets were created to be brief, containing only a few items. Each testlet begins with an engagement activity designed to activate prior knowledge, motivate the students, and provide a context (Sinha ray et al., 2014).

These small testlets were created to be delivered to students over a period of several weeks to avoid placing undue stress upon the students and to best meet their needs. The assessment also allows continued instruction to occur throughout the state’s assessment window. Assessing the student is to be individualized and should not be conducted in a group setting, as is done with standardized assessments for students who are assessed on the general education standards.

**REQUIRED SPRING ASSESSMENTS**

During the required spring assessment window, students receive 6–10 testlets in each subject, depending on the grade, subject, and state. The testlets are delivered one testlet at a time in each subject and are administered using Kite® Student Portal. (Details are in the Number of Testlets for Spring Assessments table on page 113 of this manual.)

Each testlet is packaged and delivered separately. Each state sets the dates of its own spring assessment window, and the test administrator determines when to schedule the assessment of each Essential Element within that window. Consult your state-specific documentation for more information about those dates.
FIELD TEST TESTLETS

During the spring assessment window, after a student completes all the required operational testlets in a subject, the student may receive a field test testlet in each subject in which the student is rostered. The linkage level of the field test testlet may be one linkage level below, one above, or the same as the operational testlets.

The naming convention for each subject’s spring field test testlets will begin with FT SP (i.e., FT SP ELA RL.3.1 IP 123).

OPTIONAL INSTRUCTIONALLY EMBEDDED ASSESSMENT WINDOW

Test administrators have the option to administer instructionally embedded assessments during the fall and winter months. After completing the First Contact survey, test administrators may use the Instruction and Assessment Planner to create plans and administer assessments. (The Educator Portal User Guide has directions for how to use the Instruction and Assessment Planner. Additionally, videos are available on your state’s webpage showing how to use the Instruction and Assessment Planner. Go to Educator Resource Videos to learn more about this window.)

During the optional instructionally embedded assessment window, test administrators can assess a student at least once on each Essential Element chosen in the Instruction and Assessment Planner. The system recommends a linkage level for each Essential Element based on selections the test administrator made in the First Contact survey. The test administrator may accept the system recommendation or choose a different linkage level.

Key steps for administering the instructionally embedded assessments begin on page 87 of this manual. Step-by-step procedures are found in the Educator Portal User Guide in the Use the Instruction and Assessment Planner section.

DURATION OF THE ASSESSMENT ADMINISTRATION

Table 11 provides an average total duration in minutes for taking the required testlets in each subject during the spring assessment window. Students may take testlets separately across multiple assessment sessions as long as they complete all testlets within the assessment window dates designated by each state. The listed minutes in the tables do not include the test administrator’s preparation time for the assessment. Teacher-administered testlets at the lowest linkage levels will likely take more preparation time than computer-delivered testlets.
Table 11

*Spring Assessment Total Duration per Subject in Minutes*

<table>
<thead>
<tr>
<th>Spring assessment subject</th>
<th>Average overall duration in minutes*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading</td>
<td>90–135</td>

</tr>
</tbody>
</table>

* Duration in minutes does not include assessment preparation time.

**ASSESSMENT RESULTS**

Testlets taken during the optional instructionally embedded assessment window are scored and the results can be found in the Fall Performance Report accessed in the Instruction and Assessment Planner or in the Student Progress Report accessed in reports in Educator Portal. The results from the testlets administered during the instructionally embedded assessment window do not contribute to nor impact the end-of-year Individual Student Score Reports.

---

**NOTE:** Results are not available for writing testlets administered during the instructionally embedded assessment window.

Assessment results from the spring assessment window are provided in the end-of-year Individual Student Score Reports. More about how results are calculated can be found on page 86, Access Individual Student Score Reports.

KEY STEPS

Test administrators should prepare for the Dynamic Learning Maps® (DLM®) alternate assessments by completing the key steps in Table 13. Gray-shaded steps are described in more detail in this section of this manual. Other steps are defined in the DLM resources listed in the Checklists for Test Administrators on page 10 of this manual.

Table 13

Key Steps in Preparing for the DLM Alternate Assessment

<table>
<thead>
<tr>
<th>Steps</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Confirm student eligibility to participate in the DLM alternate assessment.</td>
</tr>
<tr>
<td>2. Share information about the DLM alternate assessment with parents or guardians, preparing them for their student’s assessment experience.</td>
</tr>
<tr>
<td>3. Read this TEST ADMINISTRATION MANUAL.</td>
</tr>
<tr>
<td>Steps</td>
</tr>
<tr>
<td>-------</td>
</tr>
<tr>
<td>4. Use the resources on your state’s DLM webpage to become familiar with the DLM Consortium, the assessed subjects, and the procedures to prepare for the assessment.</td>
</tr>
<tr>
<td>5. Gain access to Educator Portal.</td>
</tr>
<tr>
<td>6. Agree to the security agreement in Educator Portal.</td>
</tr>
<tr>
<td>7. Complete the Required Test Administrator Training.</td>
</tr>
<tr>
<td>8. Review state-specific guidelines on required and recommended professional development modules. Complete as needed.</td>
</tr>
<tr>
<td>9. Use the ACCESSIBILITY MANUAL and work with IEP teams to determine which accessibility supports must be provided for each student taking the DLM alternate assessment. Record the chosen supports in each student’s Personal Needs and Preferences (PNP) Profile.</td>
</tr>
<tr>
<td>10. Review state-specific requirements for documenting DLM accessibility supports. Adjust supports in a student’s IEP as necessary.</td>
</tr>
<tr>
<td>11. Review student demographic information in Educator Portal for accuracy and correct if needed.</td>
</tr>
<tr>
<td>a. Ensure all student data are correct.</td>
</tr>
<tr>
<td>b. Ensure all roster data are correct.</td>
</tr>
<tr>
<td>12. Update and save each student’s PNP Profile.</td>

<tr>
<td>13. Update and submit each student’s First Contact survey.</td>
</tr>
<tr>
<td>14. Ensure that the most current Kite® Student Portal is installed on students’ assessment devices. Contact your technology personnel for help.</td>
</tr>
<tr>
<td>15. Become familiar with DLM practice activities and released testlets.</td>
</tr>
<tr>
<td>a. Access practice activities and released testlets using student demo accounts.</td>
</tr>
<tr>
<td>b. Check compatibility of students’ devices with Student Portal by allowing students ample time with practice activities and released testlets.</td>
</tr>
</tbody>
</table>

**AGREEING TO THE SECURITY AGREEMENT**

Test administrators are expected to deliver the DLM alternate assessment with integrity and maintain the security of testlets. The security agreement expires the first week of August every year and must be renewed annually in Educator Portal. Test administrators must read and agree to the security agreement. Figure 4 is an example of the security agreement text.
Figure 4. Example of the Security Agreement text.

<table>
<thead>
<tr>
<th>My Profile</th>
</tr>
</thead>
<tbody>
<tr>
<td>Overview</td>
</tr>
</tbody>
</table>

The Kite Suite provides opportunities for flexible assessment administration; however, all assessments delivered during the school year are secure. Test administrators and other educational staff who support implementation are responsible for following the Kite test security standards:

1. Assessments (testlets) are not to be stored or saved on computers or personal storage devices; shared via email or other file sharing systems; or reproduced by any means.
2. Except where explicitly allowed as described in the Test Administration Manual, electronic materials used during assessment administration may not be printed.
3. Those who violate the Kite test security standards may be subject to their state's regulations or state education agency policy governing test security.
4. Educators are encouraged to use resources provided by Kite Suite, including practice activities and released testlets, to prepare themselves and their students for the assessments.
5. Users will not give out, loan or share their password with anyone. Allowing others access to an Educator Portal account may cause unauthorized access to private information. Access to educational records is governed by federal and state law.

Questions about security expectations should be directed to the local assessment coordinator.

☐ I have read this security agreement and agree to follow the standards.

Save

NOTE: If DLM staff discover that an account has been accessed by someone other than the account owner, the account will be considered compromised and will be sequestered until the state assessment administrator contacts the DLM Service Desk requesting the account be reopened.

Contact your assessment coordinator for additional guidance on test security in your state and district and for procedures for reporting assessment irregularities.

COMPLETE TRAINING AND PROFESSIONAL DEVELOPMENT

The DLM Consortium provides required training for test administrators, professional development for instructional support, and supplemental training (Table 14).
Table 14

**Available Training and Professional Development**

<table>
<thead>
<tr>
<th>Required Test Administrator Training</th>
<th>Professional Development for Instruction</th>
<th>Supplemental Training</th>
</tr>
</thead>
<tbody>
<tr>
<td>• All test administrators must pass the Required Test Administrator Training modules with a score of 80% or higher.</td>
<td>• All professional development modules are strongly recommended.</td>
<td>• All supplemental training is strongly recommended.</td>
</tr>
<tr>
<td>• Critical content for managing and delivering the DLM alternate assessment is covered.</td>
<td>• The professional development modules support academic instruction for students who take the DLM alternate assessment.</td>
<td>• Supplemental training addresses a variety of DLM materials and system navigation topics.</td>
</tr>
<tr>
<td>• State administrators decide which format(s) to offer for new test administrator training: self-directed, facilitated, or both.</td>
<td>• Most modules are created for students at the Target linkage level. Teachers who have students who take testlets at lower linkage levels will need to adjust the module information for their students.</td>
<td>• Supplemental training includes short helplet videos—typically one to five minutes long on a single topic. A couple of longer presentations are also available.</td>
</tr>
<tr>
<td>• All returning test administrator training is self-directed only.</td>
<td>• Several modules are available for students with foundational presymbolic communication.</td>
<td>• Supplemental training modules do not include a quiz.</td>
</tr>
<tr>
<td>• Test administrators will not be able to deliver testlets until training is passed with a score of 80% or higher.</td>
<td>• Watching the professional development modules is strongly recommended.</td>
<td></td>
</tr>
</tbody>
</table>

**NOTE:** Your district assessment coordinator may provide a training plan tailored to your state and for training beyond what is provided by the DLM Consortium.
**Required Test Administrator Training**

Test administrator training is required for any educator administering the DLM alternate assessment. State policy determines

- the roles in Educator Portal that are automatically enrolled for the required training
- the courses that are offered (New Test Administrator Required Training, Returning Test Administrator Required Training, or both)
- the course format to be used (self-directed, facilitated, or both)

Test administrators access the Required Test Administrator Training in an online educational platform from the [Training Courses](#) website. Test administrators each have their own unique username and password. The course content is consistent across the consortium states. In all states, educators assigned the Educator Portal role of Teacher are automatically enrolled in required training.

Test administrators who will be administering the DLM alternate assessments for the first time are enrolled in the New Required Test Administrator Training course. Test administrators who administered the assessments in the immediately preceding year are typically enrolled in the Returning Required Test Administrator Training course. A returning test administrator is identified from Educator Portal records. Sometimes due to state policy, a returning test administrator is required to take the course for new test administrators.

HINT: Go to the Guide to DLM Required Test Administrator Training located on the DLM website for complete information.

The training for new test administrators consists of four modules that must be completed in order. When the test administrator first signs in to [Training Courses](#), only the first module in the course is initially available. Each module ends with a post-test, which must be passed with a score of 80% or higher before the next module becomes available. If a post-test is not passed, test administrators may repeat the module and its post-test as many times as needed until a score of 80% or higher is achieved for the module. When all modules are successfully completed, participants receive a certificate of completion, which they are strongly advised to download, print, and save.

The four required modules in the New Test Administrator Training course are as follows:

1. Overview
2. Understanding and Delivering Testlets
3. Test Administration and Scoring
4. Preparing to Administer the Assessment

The Returning Test Administrator Training course consists of only one module, which takes approximately one hour. This module is a review of the four modules in the course for new test administrators. The returning course ends with a post-test. The post-test must be passed with a score of 80% or higher on the first attempt. If unsuccessful, additional training on the applicable
section(s) will be required. The additional training may take 30 minutes or up to 2.5 hours, depending on the section(s) that must be repeated. When this module is successfully completed, participants also receive a certificate of completion, which they are strongly advised to download, print, and save.

The New Test Administrator Required Training is available in a self-directed format, a facilitated format, or both formats, depending on the state administrator’s decision. All post-tests must be completed on the Training Courses website, even if required training is delivered in the facilitated format. Training for returning test administrators is available only in the self-directed format. Along with the required training, states may also include one or two additional short helplet videos to assist test administrators.

More information about the contents of each module, training formats, and procedures for completing required training is provided in the Guide to DLM Required Test Administrator Training located on the DLM website.

**Professional Development for Instructional Support**

- Professional development for instruction is strongly encouraged. Modules focus on teaching and learning in the areas of English language arts, mathematics, science, and several foundational topics. Other modules are available, which provide important information regarding components of the DLM Alternate Assessment System. A variety of materials and multiple methods to access the materials are available.

- Each online, self-directed module lasts approximately 30 to 45 minutes and focuses on a single topic related to the instruction of students with the most significant cognitive disabilities. Post-tests accompany the modules.

- Facilitated modules for groups cover the same content as self-directed modules.

- Some recorded webinars on instruction are available for teachers.

- Instructional resources supply lesson supports, writing resources, and enhanced descriptions of the Initial Precursor and Distal Precursor for the most frequently used Essential Elements. The descriptions provide a clear connection between the Initial Precursor, Distal Precursor, and Target linkage levels.

- Educators across the consortium are encouraged to collaborate by using DLM Instructional Supports Facebook.

- Most educators are required to participate in regular, ongoing professional development. Some state agencies give continuing education credits for the DLM professional development modules. If your state gives continuing education credits, then print the certificate that is emailed upon the completion of each professional development module and provide the documentation to your assessment coordinator.

**Supplemental Training**

Supplemental training materials include short helplet videos on common Educator Portal procedures and best practices (e.g., Getting Started in Educator Portal and View Test Tickets and TIPs). Go to your state’s DLM website > filter by the Teacher role > Assessment Resources > scroll to Educator Resource Videos. Also, go to the Instructional Resources for YE States webpage.
REVIEW STUDENT DEMOGRAPHIC INFORMATION

Test administrators must have an accurate list of students for whom they are responsible. Before each assessment window, test administrators must review the student names that appear on their rosters in Educator Portal. Check with your assessment coordinator for review deadlines and procedures for correcting records. Questions to ask include the following:

- Do all my eligible students appear on my list of students?
- Is each student assigned to the correct grade level?
- Are there any students on my list who are not assigned to me or who are not eligible for the DLM alternate assessment?
- Do any student records have typos or misspellings?

If any errors are discovered, ask the assessment coordinator to make corrections. Some student information can be found on the student’s Individual Student Score Report (e.g., the student’s name and grade). Having the information presented correctly will be important to students and their parents or guardians.

Detailed procedures for checking this information are in the Manage Student Data section of the EDUCATOR PORTAL USER GUIDE.

NOTE: The correct grade and subject must be provided for the system to deliver grade-appropriate testlets. If a student has been rostered to the incorrect grade and has started testing, the student will need to begin testing all over in the correct grade.

COMPLETE OR UPDATE THE PERSONAL NEEDS AND PREFERENCES PROFILE SETTINGS

The DLM alternate assessment offers a variety of accessibility supports, which can be selected in a student’s PNP Profile on Educator Portal. The ACCESSIBILITY MANUAL describes a six-step process for evaluating and choosing appropriate supports for each student.

Most states provide guidelines that their IEP teams are required to use when making decisions about accessibility supports for a student during testing. Some states provide their state-specific guidelines as an appendix in the ACCESSIBILITY MANUAL on their DLM state website.

Accessibility supports in the student’s PNP Profile in Educator Portal include those required to meet the student’s needs in their IEP and other supports for which a student may show a preference but are not required in the IEP. The selected supports then become available during testing. Test administrators are to review accessibility supports with the IEP team at least once per year.

If the original PNP Profile selections do not allow the student to fully access the content of the testlets as expected, the test administrator may adjust accessibility features listed in the PNP Profile between testlets to provide more appropriate supports. Go to the ACCESSIBILITY MANUAL for help in choosing and changing PNP Profile settings. The assessment coordinator can provide further IEP guidance if needed.
Procedures for choosing and saving the PNP Profile settings in Educator Portal are in the EDUCATOR PORTAL USER GUIDE in the section, Complete the Personal Needs and Preferences Profile.

COMPLETE AND SUBMIT THE FIRST CONTACT SURVEY SETTINGS

The First Contact survey is a series of items that go beyond basic demographics and cover a variety of areas, including communication, academic skills, and attention. The test administrator enters the responses for each eligible student on their rosters.

Responses to the survey items are used to provide an optimal system match between the student and linkage level for each Essential Element in the blueprint for each subject being tested. The items are categorized into the following sections:

- Special Education
- Sensory Capabilities
- Motor Capabilities and Health
- Computer Instruction
- Communication (Expressive and Receptive)
- Language
- Academics

THE OPTIONAL INSTRUCTIONALLY EMBEDDED ASSESSMENT WINDOW

When the optional instructionally embedded assessment window opens in the fall, the test administrator can easily open the First Contact survey in the Instruction and Assessment Planner, respond to items in the survey, and then submit it. The data is analyzed and used to determine the recommended linkage level for each Essential Element for each subject in the Instruction and Assessment Planner. Test administrators can begin the Essential Element selection process immediately after submitting the survey and can accept the system-recommended linkage level or select a different one.

THE REQUIRED SPRING ASSESSMENT WINDOW

During the required spring assessment window, the data in the First Contact survey determines the assignment of the linkage level for the first Essential Element in each subject being tested. If the survey has been submitted before the opening of the spring assessment window, the first testlet in each subject will be available on opening day. However, if the survey is submitted after the opening of the spring assessment window, delivery of the first testlet in each subject will be delayed 24 hours from the time the survey is submitted.

RESOURCES FOR COMPLETING THE FIRST CONTACT SURVEY

Use the following resources for step-by-step instructions and guidance in completing the First Contact survey and the PNP Profile. Test administrators can choose to complete these tasks in one of two places: by selecting the icons on the View Student screen in Educator Portal or by selecting the icons in the Instruction and Assessment Planner after the opening of the optional instructionally embedded assessment window.
• **EDUCATOR PORTAL USER GUIDE**: Complete the First Contact Survey section.
• **A complete list of First Contact survey questions**: Appendix in this manual.
• **Completing the First Contact Survey and PNP Profile helplet video**: A 13-minute demonstration on how to complete the First Contact survey and the PNP Profile. It is available on the Educator Resource Videos page of your state’s DLM website.

**PREPARE FOR ASSESSMENT WITH PRACTICE ACTIVITIES AND RELEASED TESTLETS**

The DLM Consortium provides two practice activities and many released testlets to support educators and students preparing for the assessment (see the Glossary on page 106 for the definition of released testlets):

- Practice activities are designed to familiarize users with how testlets appear in Student Portal. One practice activity is for test administrators, and the other is for students.
- Released testlets are similar in content and format to operational DLM testlets.

Access practice activities and released testlets using Student Portal in the practice section. Use demo student usernames and passwords provided in this manual to complete both types of activities as many times as desired.

**HINT:** Some released testlets are available in PDF format on the DLM website. These may be helpful to provide to parents and guardians. Student Portal does not have to be installed on a computer to view these testlets.

If you have questions or technical problems with the practice activities or released testlets, contact your assessment coordinator or local technology personnel.

**RELEASED TESTLETS**

Released testlets are like actual operational testlets. They are selected from a variety of Essential Elements and linkage levels from grade 3 through high school. These testlets contain items that align to Essential Elements at designated linkage levels. New released testlets are added periodically.

Some released testlets are teacher-administered and some are computer-delivered testlets. Teacher-administered testlets are typically at the lower linkage levels. Test administrators also administer all writing testlets. Computer-delivered testlets are typically at the higher linkage levels.

The usernames and passwords for released testlets are available on page 41 of this manual or can be found in the Guide to Practice Activities and Released Testlets on the DLM website.

In Student Portal, released testlets are labeled by their subject, Essential Element, grade, and linkage level (Figure 5).
Table 15 describes the labels from the image.

To access the Essential Elements, linkage levels, and nodes used in ELA, mathematics, and science assessments, select your state > select the Teacher role > select Instructional Resources and select the subject.

The following sections describe the step-by-step procedure to access the practice activities and released testlets.

**Practice Activities**

Sign in to Student Portal with the demo usernames and passwords. Select Other (Figure 6).

**Teacher Practice Activity**

The teacher practice activity is a tutorial on testlets that are administered directly by the teacher. Teacher-administered testlets are used when the student has presymbolic communication and cannot interact directly with the computer or when the content is difficult to assess on the computer (e.g., some higher linkage level mathematics testlets).

In this type of testlet, the teacher reads the instructions aloud on the testlet screens and follows them. The test administrator enters the student’s responses to activities or exchanges
that occur outside the system. The test administrator may go forward and backward within a testlet as much as needed before submitting the responses.

Most teacher-administered testlets require test administrators to gather materials to be used in the assessment prior to the assessment. Testlet Information Pages (TIPs) list those materials. Remember that substitutions can be made as necessary unless expressly noted on the TIP. Directions for how to prepare for the testlet are also provided as Educator Directions on the first screen of the testlet.

HINT: Practice activities do not include TIPs.

**STUDENT PRACTICE ACTIVITY**

The student practice activity is a tutorial designed for students to practice navigating a testlet. Computer-delivered testlets are used when the content can be assessed directly by the computer, and when students can directly interact with the system by selecting their own responses and by using assistive devices or other supports as needed.

Students may navigate using a mouse, Tab and Enter keys on a keyboard, or switches. If students can engage with the content, but cannot advance the screens or input responses independently, teachers may navigate the screens and record student responses on the student’s behalf. Specific supports and practices that are not allowed are described further in the Practices Not Allowed section on page 80 of this manual.

Several types of items are available in student practice activities:

- **Multiple-choice items**: The student selects one or more correct responses.
- **Sorting items**: The student selects and moves objects from one place to another. Some items require the student to choose the object and its destination. Others require students to drag and drop an image. Students who use switches may need help navigating some of these screens.
- **Matching items**: The student identifies how pairs of items are related to one another.

**STUDENT ACCOUNTS FOR PRACTICE ACTIVITIES AND RELEASED TESTLETS**

Practice activities and released testlets are available through several practice student accounts. Each practice account has certain PNP Profile settings, as described in the ACCESSIBILITY MANUAL. The supports are summarized in Table 16.

These accounts are available for all ELA, mathematics, and science practice activities and released testlets.
Table 16

</tbody>
</table>

* demo.sue29 is also available for ELA writing and science.

**No special settings are required for two-switch users. Use Tab to navigate and Enter to select. Two-switch users may use any of the above demo logins except demo.sue30 and demo.sue35 because those two logins are designated especially for practice for single-switch scanning users.

NOTE: Check your state’s DLM webpage for the subjects tested in your state.

For step-by-step directions on accessing practice activities and released testlets in Student Portal, go to Access Practice Activities and Released Testlets on page 94 of this manual.

TROUBLESHOOT ACCESS IN EDUCATOR PORTAL

Avoid Common Pitfalls

Save time and avoid errors by completing these steps before assessing students.

NO ACCESS TO THE INSTRUCTION AND ASSESSMENT PLANNER OR TEST MANAGEMENT

Users with the role of Teacher in Educator Portal will not have access to the Instruction and Assessment Planner or the Test Management screen in Educator Portal until

- rosters have been created that link their students to them.
• they have passed all Required Test Administrator Training modules with a score of 80% or higher on each post-test; they will receive a message that access is restricted until training is passed.

**NO STUDENT TESTLETS**

During the spring assessment window, a student is not assigned testlets until the following steps are completed correctly:

- The student is listed on the test administrator’s roster (one roster per subject).
- The student is rostered to the correct subjects for the DLM alternate assessment. In states where students take the end-of-instruction high school biology assessments, the student will be rostered to the subject “science” and the course “biology.”
- The First Contact survey is complete and submitted.

**HINT:** Ensure each student is assigned to the correct grade level in Educator Portal. If a student has been rostered to the incorrect grade and has started testing, the student will need to begin testing all over in the correct grade, and their previously completed testlets may no longer be available.

The assessment coordinator can help with any of the above issues.

COMPUTER-DELIVERED TESTLETS

Overview

Testlets delivered directly to students via a computer are designed with the assumption that students can interact independently with the computer. Students can use special devices such as alternate keyboards, touch screens, or switches, as necessary.

Computer-delivered testlets in the Dynamic Learning Maps® (DLM®) alternate assessment are most common at the upper linkage levels for reading, mathematics, and science assessments.

Some students may test at upper linkage levels but cannot interact directly with the computer due to physical limitations. For these students, the test administrator may navigate the screen on behalf of the student and enter the student’s responses.

The Testlet Information Page (TIP) that accompanies each computer-delivered testlet may have few, if any, materials to be gathered since everything the student needs for taking the test is available on the computer screen. However, the TIP may have other pertinent information for the test administrator to know.

Writing testlets are always administered by test administrators outside of the system, even if the student normally receives computer-delivered testlets in ELA reading, mathematics, and science. Writing testlets are described in the Teacher-Administered Testlets section beginning on page 57 of this manual.

HINT: Screenshots in the following sections of this manual demonstrate how a testlet is expected to appear on an assessment device. If a testlet is difficult to view on the assessment device, check the device’s display settings and the screen resolution. The screen resolution should be 1024 × 768. Also, check the student’s PNP Profile settings to ensure the most appropriate settings have been selected. After doing this, if the issues cannot be resolved, contact your technology personnel or your assessment coordinator.

General Structure of Computer-Delivered Testlets

Testlets in English language arts (ELA), mathematics, and science are each delivered differently based on research about effective instructional practices for students with the most significant cognitive disabilities. Testlets in all subjects begin with an engagement activity to motivate
students, activate prior knowledge, and prepare students for the cognitive process required in the items.

**Computer-Delivered ELA Reading Testlet Structure**

Students taking DLM ELA testlets are assessed on both writing and reading skills. Although a writing testlet is always teacher-administered, a reading testlet can be either teacher-administered or computer-delivered, depending on the student.

During a reading testlet, students participate in two readings of a text. The first reading serves as the engagement activity and provides students with an opportunity to build a mental representation of the entire text before responding to items. The second reading includes items embedded within the text or placed at the end of the text, as appropriate.

---

**NOTE:** Occasionally, an item is embedded within a text that does not assess reading comprehension of the text itself. Instead, the item addresses the linkage level skill for the Essential Element being assessed.

---

The first screen in ELA reading testlets directs students to read the text (Figure 7).

*Figure 7. Screenshot of the instructions for an ELA reading testlet in Kite Student Portal.*

Read the story. After you read the story, you will read the story again and answer the questions.

Students will read through the text. They may have the text read aloud by the computer if Spoken Audio is selected in the student’s Personal Needs and Preferences (PNP) Profile (Figure 8). For all testlets, test administrators are permitted to read aloud to students. The student is then directed to read the text a second time and respond to items. Although some students taking computer-delivered reading testlets may require support to navigate from one screen to the next or to enter their responses, most students at the upper linkage levels will independently read the text and respond to the items.
Figure 8. An ELA reading testlet in Kite Student Portal with spoken audio (the READ icon) enabled.

Computer-Delivered Mathematics Testlet Structure
Mathematics testlets start with an engagement activity that provides a context for the items (Figure 9). The engagement activity does not require a response. Mathematics testlets are built around a common scenario or activity to investigate related facets of a student’s understanding of the targeted content as shown.

Figure 9. Screenshot of an engagement activity in a mathematics testlet in Kite Student Portal.
Science testlets begin with an engagement activity, just like testlets in ELA and mathematics. Each science testlet bundles together an engagement activity at the beginning of the testlet followed by three to five items. Science engagement activities can be one of four types:

- The first type of engagement activity is simply a single screen with one or two pictures along with a short sentence that introduces the science topic to be assessed. The items assess the Essential Element topic, not the engagement screen itself.
- A second type of engagement activity describes a scenario which taps prior knowledge or experience, introduces the concept to be addressed, and provides context for the items. The items assess information in the engagement activity and the Essential Element topic.
- A third type of engagement activity may be designed around a science story featuring an experiment or classroom activity that is presented twice, with items embedded within the second presentation of the activity or at the end of the second presentation. The items assess information in the engagement activity and the Essential Element topic.
- The fourth type of engagement activity is a short silent video (up to 30 seconds) and is only found in the upper grade bands and the upper linkage levels. Students will access the short video and then respond to three items that include still-frame photos from the video. The items assess information both from the video and the Essential Element topic.

The following is an example of a science story. The instructions at the beginning of the testlet tell students what they will be doing in this testlet (Figure 10). In this science story, the student is to read the text and answer some questions.
**Figure 10.** Screenshot of the instructions for a science testlet in Kite Student Portal.

Read the text. After you read the text, you will answer some questions.

**Figure 11.** Screenshot of a short story in a science testlet in Kite Student Portal.

Max sets a dinner table. Max uses paper plates and cloth napkins. Max wants to protect Earth’s resources when cleaning up.

**Computer-Delivered Item Types**

Students may encounter a variety of item types when taking computer-delivered testlets. Most testlets are designed for students to interact directly with the computer. Item types include the following:

- single-select multiple choice
• multiple choice-multi-select
• matching
• sorting
• select text

In general, the DLM alternate assessment uses the most straightforward item type that allows for quality assessment of the Essential Element. For this reason, complex item types are used only occasionally at upper linkage levels. The previously described practice activities include one or more examples of the above item types.

The most common type of computer-delivered item is a single-select multiple-choice item with text response choices (Figure 12). All science testlets include only single-select multiple-choice items.

Figure 12. Screenshot of a single-select multiple-choice item in a testlet in Kite Student Portal.

![Single-select multiple-choice item](image)

The first cake pan Jenny uses has a length of 9 inches. The pan has a width of 10 inches. The pan has a height of 2 inches. What is the volume of the pan, in cubic inches? [volume = length x width x height]

- 21 cubic inches
- 90 cubic inches
- 180 cubic inches

Students may also experience single-select multiple-choice items with image response choices (Figure 13).
Multiple-choice multi-select items provide students with the opportunity to make more than one response choice (Figure 14).

In some items, students may be asked to match responses from two lists (Figure 15).
Students may also encounter items asking them to sort words or images into categories. For students who use a mouse to interact with the computer, the system uses a drag-and-drop format to sort items. In Figure 16, the student selects the circle and then drags it into a box on the right, either by selecting the mouse button and moving the mouse or, if taking the assessment on an iPad or interactive whiteboard, by touching the object and dragging it to the desired location. Students who are unable to use the drag-and-drop format may direct the test administrator to sort the items.

The final type of computer-delivered item that students might experience is select text. Select-text items are used only in some ELA assessments. Response choices are marked with a box around the word, phrase, or sentence. After the student makes a selection, the outline around
the word, phrase, or sentence becomes bold and highlighted in transparent yellow (Figure 17). To clear a selection, the student selects it again.

**Figure 17.** Screenshot of a select-text item in a testlet in Kite Student Portal.

[Insert image of a select-text item]

**RESPONSE SELECTION FOR COMPUTER-DELIVERED ITEM TYPES**

The procedures for selecting item responses in computer-delivered testlets are the same for all subjects. When the student first accesses an item, the responses will appear as shown in Figure 18.

**Figure 18.** Screenshot of an item in a testlet in Kite Student Portal.

[Insert image of an item]

Once a student selects a response, a box appears around the response choice (Figure 19). The student can select **NEXT** or **BACK** to navigate through the testlet screens. The response choice will stay selected.
If the student wants to change a response at any time during the testlet, they may go back to the screen that displays that item and simply select another response choice (Figure 20).

**Figure 20.** Screenshot of the selection of a new response to an item in Kite Student Portal.

No Response Option
All testlets at the lowest linkage level and a few teacher-administered testlets at higher linkage levels include No response as a response option. However, not all testlets include No response as one of the options. If an item does not offer the No response option, and the student does not respond to the item in the testlet, the test administrator should leave the item unanswered.
Whether No response is available for selection or if the item is left unanswered, the item is scored as incorrect. When a student has not responded to any items in a testlet, the testlet must still be submitted for the student. If the student can produce an intentional response but does not do so (e.g., due to distractions or behavior problems), and if state policy allows, the test administrator can use the EXIT DOES NOT SAVE button and begin the testlet again when the student is more engaged.

**System Timeout**
The DLM alternate assessment is administered individually and is not timed. Students may take as much time as needed and may work in settings that are most appropriate for them. The student may take as many breaks as needed throughout the completion of a testlet. During the administration of a testlet, Student Portal can sit inactive for as long as 90 minutes before timing out.

After 88 minutes and 30 seconds of inactivity in the testlet, the system provides the student with this warning message: “Your session is about to expire. Select Extend Session to continue where you left off. Time Remaining: XX mins and XX seconds” (Figure 21).

*Figure 21. Kite Student Portal session expiration warning.*

- If the student does nothing and no activity occurs before the countdown reaches 0, the system logs the student out of the testlet and returns to the login screen. The testlet returns to an unused status, and the system retains no answers.
- If the student selects **Extend Session**, the system disregards the idle time, closes the prompt, and returns to the screen where the student had been working.
- If the student selects **Logout**, the system logs the student out of the testlet and returns to the login screen. The testlet status returns to unused, and the system retains no answers.

While DLM test administration procedures are designed to be flexible and allow students to take breaks during a testlet, most students who experience an extended interruption during test administration have difficulty retaining information in working memory after the interruption. Research shows that an extended interruption during test administration can adversely affect student performance (SinhaRay et al., 2014). Thus, Student Portal was designed to time out after an extended period of inactivity without retaining the responses, allowing the student to begin the assessment afresh when ready.
**Computer-Delivered Assessment Arrangement**

Prior to test administration, evaluate how to arrange the computer or other assessment devices for the student and test administrator. All arrangements for computer-delivered testlets should maximize the student’s independence and interaction with the computer.

Assessing students in a familiar environment is helpful, but the test administrator must ensure that the student is able to concentrate without distractions from other students.

Assessing students with the most significant cognitive disabilities should be individualized and not conducted in a group setting.

**Maximize Student Interaction with the Computer-Delivered Testlet**

The arrangement should maximize student interaction with the testlet using the computer or other assessment devices based on the student’s needs. For instance, if the test administrator sits with a student, the student should sit directly in front of the computer and the test administrator should sit off to the side, as shown in Figure 22.

*Figure 22. Seating arrangement of test administrator and student during assessment administration.*

If the test administrator sits next to a student who can use the mouse without assistance, the test administrator should sit on the side of the student opposite from the mouse so the student has space to move the mouse and the test administrator is not tempted to move the mouse for the student. A student who takes the assessment on an iPad may be able to hold the iPad and respond to items independently. If not, the test administrator may hold the iPad in a position that provides maximum visibility for the student.

**Maximize Student Independence**

Although test administrators should continually monitor students, the assessment arrangement should maximize student independence and minimize test administrator involvement. For students who may need assistance during the assessment, the test administrator can sit close to the student to monitor the assessment. On the other hand, if the student can work
independently, the test administrator should keep more distance while making sure the student takes enough time and responds to all items.

**TEACHER-ADMINISTERED TESTLETS**

**Overview**

All testlets at the lowest linkage level, some mathematics testlets at higher linkage levels, and all writing testlets are designed to be administered directly by the test administrator. In teacher-administered testlets, the test administrator is responsible for setting up the assessment, delivering it to the student, and recording student responses in the testlet in Kite® Student Portal.

**General Structure of Teacher-Administered Testlets**

All teacher-administered testlets have some common features:

- The classroom setup is similar where the teacher needs to be able to view the screen, read the instructions, and enter their observations of the student or the student’s responses.
- Directions and scripted statements guide the test administrator through the administration process.
- The TIP includes all assessment materials that the test administrator will need and must gather. The TIP should be reviewed several hours or even days before testing to allow the test administrator to be ready for test administration.
- The testlet includes an engagement activity and items.
- Science testlets at the Initial linkage level usually have picture response cards that must be printed ahead of time and used during testing. Best practice is to print these pictures in color.

**Standardized Instructions for All Teacher-Administered Testlets**

Teacher-administered testlets are standardized. Anything in quotes and bold print should be presented verbatim to the student. The two exceptions to this rule:

- when the student uses sign language interpretation or language translation supports as allowable and described in the DLM ACCESSIBILITY MANUAL and on the TIP
- when a material is substituted; the test administrator must then use the name of the substituted materials when reading the item to avoid confusing the student

**Show and Say Instructions in All Teacher-Administered Testlets**

Test administrators will encounter two instructions for presenting items or directions to students: **SHOW** and **SAY**. However, because of hearing and vision limitations, some students may not be able to hear what is said and others may not be able to see what is shown. **SHOW** means that the test administrator should present the materials to the student using sensory modalities appropriate for that student. **SAY** may require nonverbal communication appropriate for the student’s sensory modalities, such as signing.
Figure 23 is an example of an item screen that may be embedded in the second reading of an ELA text. The Educator Directions tell how to interact with the student. The test administrator must read directly to the student the lines presented in bold after SAY. The administrator also must perform the actions for the student described after SHOW.

Figure 23. Screenshot of an item screen that may be embedded in the second reading of an ELA text in Kite Student Portal.

All teacher-administered items have response options that reflect possible student responses to the statement or questions in the item. The test administrator evaluates the student’s response, chooses the best description of what is observed, and records the choice in the testlet. The test administrator must be familiar with the student’s typical modes of expressive communication because any mode for communicating a response is acceptable.

TEACHER-ADMINISTERED READING TESTLETS

In teacher-administered reading testlets, items focus on the cognitive skills that precede conventional literacy. These items are not traditional reading-comprehension questions, but rather are designed to assess the skills identified in the DLM learning map model as critical precursors to reading for meaning. These types of items are embedded in the context of a shared reading and are intended to mirror early literacy instruction. Items assess skills such as identifying familiar materials or identifying words that describe familiar people.

Shared reading strategies that an educator might use during the first reading of a text include the following:

- encouraging engagement and interaction
- discussing words
The test administrator engages in shared reading strategies with the student during the first reading of the text in a reading testlet. During the second reading of the text, the test administrator must refrain from using shared reading strategies and instead focus on administering the items that are embedded in the second reading or placed at its conclusion.

**Structure of Teacher-Administered Reading Testlets**

First, the text is presented in its entirety. The test administrator reads the text aloud using shared reading strategies to maximize student engagement. Then, the text is presented again with items either embedded within the reading or placed at its conclusion. This type of testlet is often used at the Initial Precursor level, where students do not have the skills to directly interact with the computer. Teacher-administered testlets are also used for some testlets at higher linkage levels in the lower grades when the student is working with a familiar text.

For more information about shared reading strategies, go to the professional development module called Shared Reading that is available on the Professional Development page of the DLM website.

Figure 24 is an example of the directions provided on the first screen in a teacher-administered reading testlet. This screen provides hints about a shared reading strategy. After this screen, the story screens begin.
In teacher-administered reading testlets, Educator Directions also appear between parts of the testlet (Figure 25).

The following is an example of a transition screen displayed after the test administrator has read a text with the student for the first time. The transition screen tells the test administrator that the first reading is over, and the second reading is about to begin. During the second reading, the student will respond to items embedded within the second reading or placed at its conclusion.
**Figure 25.** Screenshot of the Educator Directions in a teacher-administered reading testlet in Kite Student Portal.

**ALTERNATE TEXT FOR TEACHER-ADMINISTERED READING TESTLETS**

When administering a testlet to a student who uses human read-aloud support and requires verbal descriptions of images, use the alternate text available in supplemental pages of the TIP. Each page of the TIP shows the onscreen text and images for the first and second presentations of the text. Descriptions of the images are printed below the picture and are labeled Alt Text (e.g., a picture of a dog is presented, then below the picture are the words, “Alt Text: a dog”). For students who require verbal descriptions of the images, read the text on the screen, then read the alternate text description exactly as it appears on the TIP.

**CLASSROOM SETUP FOR TEACHER-ADMINISTERED READING TESTLETS**

The student, the test administrator, and the computer screen should be arranged in a triangle during a teacher-administered reading testlet. Both the student and test administrator need to have access to the text during the shared reading activity. The test administrator should have the best access of direction pages and item screens. When the item screens appear, the test administrator needs to be able to enter responses easily. The triangle arrangement usually works, but the test administrator may need to shift position slightly so that screens containing the ELA text can easily be displayed to both student and test administrator. Leave space near the student for any manipulatives that will be used.

**TEACHER-ADMINISTERED WRITING TESTLETS**

Every day in our classrooms, all students, including those with the most significant cognitive disabilities, are being prepared for life beyond their school years. A student’s ability to communicate about their needs and wants is essential for safety and fulfillment in their adult life. Their ability to communicate includes being able to write in some meaningful way.
Therefore, writing Essential Elements and writing assessments were developed. Information about each writing Essential Element is available on the Currently Tested Essential Elements in English Language Arts page under Instructional Resources.

The DLM writing testlets assess students’ mastery of the precursor skills that lead to writing and their ability to communicate using writing. These skills focus on understanding letters and words and the expression of ideas through words. Testlet response options that refer to “writing” or “the student wrote” can include any method the student uses for writing. The writing testlets all have some common features:

- Writing testlets are always teacher-administered and are required for every student in every grade.
- To meet blueprint requirements, each student receives a writing testlet in the spring assessment window.
- Writing testlets assess a combination of two to six writing Essential Elements, depending on the grade.
- The student always works outside of Student Portal and interacts with the test administrator. Only the test administrator interacts with the testlet in Student Portal.
- Writing testlets are at one of two levels, emergent or conventional.
- The level of the writing testlet recommend by the system for the student is determined by the test administrator’s responses to items in the writing portion of the First Contact survey. Performance from testlets assessing other Essential Elements is not used to recommend the linkage level of the writing testlet.
- Emergent Writing testlets are used for students who do not yet have or are working on early symbolic understanding.
- Students in grades 3–8 who are assigned the Emergent Writing testlet are assessed on only the writing process. These students are not expected to produce a written product.
- Students in high school who are assigned the Emergent Level writing testlets are also tested on the writing process, but these students are expected to produce a written product as well.
- Emergent Writing testlets are a combination of the Initial and Distal Precursor linkage levels (Figure 26).

Figure 26. Process for an Emergent Writing testlet.

Students who have symbolic understanding and can use more traditional writing tools to communicate take a writing testlet that combines linkage levels at the Proximal Precursor, the Target, and the Successor linkage levels. Writing testlets at this level are called a Conventional Writing testlets because they are a little more typical of a traditional writing assessment (Figure 27).
Students who take Conventional Writing testlets are assessed on the writing process and they are also expected to produce a written product.

Figure 27. Process for a Conventional Writing testlet.

Many students taking the DLM alternate assessment will need a test administrator to assist them in obtaining a writing tool that offers students access to all 26 letters of the alphabet. For both the Emergent and Conventional Writing testlets, students are to use the orthography-based tools they use for writing during everyday instruction.

The following supports are allowed for writing testlets:

- pens, pencils, markers, crayons
- whiteboards
- traditional keyboards using word-processing software
- adapted keyboards that include all 26 letters of the alphabet
- tablet computer keyboards using word-processing software
- alternate keyboard (e.g., onscreen or switch-enabled keyboard)
- alternate pencils, including alphabet flip charts
- eye-gaze displays of letters
- letter-by-letter dictation of any sort
- word-prediction software

Word prediction is an intelligent word-processing feature that can alleviate writing breakdowns for a range of students simply by reducing the number of keystrokes necessary for typing words. It removes motor barriers to typing to reduce the gap between generating ideas and capturing them in writing.

The following supports are not allowed for writing testlets:

- whole-word or sentence dictation; to test the full criteria of writing Essential Elements, students are not allowed to dictate whole words or sentences.
- speech-to-text software
- selection of pictures or words from a word bank

**Pictures, Symbols, or Use of a Word Bank**

Pictures, symbols, or words from a word bank are not allowed and may not be substituted for words in a sentence. This practice is forbidden because the meaning that an individual assigns to a picture or symbol depends upon the individual’s motivation; neurological and developmental status; sensory abilities; cognitive, communication, and language skills; and world experience (Mineo Mollica, 2003). Furthermore, the ability to learn the meaning of
pictures or symbols is directly related to an individual’s understanding of the word associated with the picture or symbol.

In other words, individuals who understand the meaning of the spoken word learn the associated picture or symbol rather easily while individuals who do not understand the spoken word need more time to learn the meaning of the picture or symbol (Romski & Sevcik, 1996, 2005). Because students who participate in the DLM alternate assessment have universally impaired cognitive and language skills, it is not possible to ensure that each student’s understanding of pictures and symbols introduced in the assessment will match the intended meaning.

**Writing Topic**

For both levels of writing testlets, the test administrator and the student participate in an engagement activity related to choosing a topic to write. The testlet does not include preselected topics for writing assessments.

- In Emergent Writing testlets at the Initial Precursor and Distal Precursor linkage levels, the students often choose from a list of topics that they have been exposed to during instruction.
- In Conventional Writing testlets, students also write about familiar topics. If able, they independently select a subject on which to write. The topic is to be an informational one that is relevant to instruction and familiar to the student.

**Tasks in Writing Testlets**

The test administrator has two types of tasks in writing testlets:

1. The test administrator evaluates a process used in writing. Testlet items are presented to the test administrator while the student works through the writing testlet.
2. The test administrator evaluates the student’s final writing product.

For the first type of task, test administrators will perform the following steps (Figure 28):

1. Give the student a verbal prompt from the onscreen Educator Directions. As apparent in the following image, the verbal prompt may be “SAY: You are going to write about a person, place, or object today. What would you like to write about?”
2. The test administrator may present the student with a list of familiar topics that have been used during instruction, or the student may think of a topic without any prompting.
3. The testlet screen prompts the test administrator to ask the student to engage in writing tasks.
   - An example of a verbal prompt may be “SAY: Write about [topic] using words that describe [topic].”
   - The test administrator says the prompt aloud to the student, inserting the actual topic selected for the writing testlet.
4. The test administrator is directed to WAIT and OBSERVE the student’s writing process in response to the prompt. It is **very important** for the test administrator to give the student enough time to respond.

5. The test administrator evaluates the student’s behavior according to the description in the response options. The test administrator then chooses the description that best matches the student’s writing process.

*Figure 28. Screenshot of the Educator Directions for a writing testlet in Kite Student Portal.*

**Educator Directions:**

*SAY: “You are going to write about a person, place, or object today. What would you like to write about?”*  

Give the student time to make a choice about a topic used in shared reading and during instruction. If the student is unable to select a topic, select a topic for the student to write about. When the student is ready to begin, select “NEXT.”

**EXAMPLE:** If the student’s behavior could be described by two response options, the test administrator selects the response option that represents the higher of the two options. In the following image, if the student wrote some words related to the topic and some words that were not related to the topic, the test administrator has two response options from which to select: “Wrote at least one word related to the topic,” or “Wrote a word or words that were not related to the topic.” In this case, the test administrator would select the higher of the two options: “Wrote at least one word related to the topic.”

The response options in Figure 29 are as follows:

- Wrote facts, details, or other information related to the topic.
- Communicated about facts, details, or other information related to the topic, but did not write.
- Wrote at least one word related to the topic.
- Wrote a word or words that were not related to the topic.
- Wrote letters.
- Wrote marks or selected symbols other than letters.
- Did not communicate or write about the topic.
When a student’s performance does not exactly match any response option, the test administrator selects the option that best matches the student performance (Table 17).

Table 17

Student Performance and Test Administrator Responses During an Assessment

<table>
<thead>
<tr>
<th>Student’s Performance</th>
<th>Test Administrator’s Response</th>
</tr>
</thead>
<tbody>
<tr>
<td>The student wrote complete sentences about the topic using at least two descriptive words.</td>
<td>The test administrator selects the response, “Wrote facts, details, or other information related to the topic.”</td>
</tr>
<tr>
<td>The student wrote incomplete sentences but still conveyed ideas and information about the topic using at least two descriptive words.</td>
<td>The test administrator selects the response, “Wrote facts, details, or other information related to the topic.”</td>
</tr>
<tr>
<td>The student did not write anything about a topic.</td>
<td>The test administrator selects the response, “Did not communicate or write about the topic.” If that response is not available, the test administrator would choose “No response” if available, or leave the item blank.</td>
</tr>
</tbody>
</table>
The second type of task found in most Conventional Writing testlets requires the test administrator to evaluate the student’s final writing product. The evaluation items may be in single-select or multiple-choice multi-select format. The test administrator completes this task only after the student has finished writing. The test administrator will:

- look at the writing the student produced
- evaluate the student’s writing product
- choose the description that matches the highest level of the student’s writing

**HINT:** This task can be completed without the student present, but the task must be completed within the same assessment session. The evaluation cannot be completed if a testlet times out, after using EXIT DOES NOT SAVE, or by logging in later.

**Retention of the Writing Product**

Retention of a student’s written product is a policy decision made at the state or local level. The assessment coordinator can provide information about the policy requirements (i.e., how long to store and where to store students’ writing products).

For research and technical documentation, DLM staff may request test administrators to electronically submit their student’s final written product. When this request occurs, the test administrators and their assessment coordinators will be informed in advance about how to submit the student’s final written product.

**Teacher-Administered Mathematics Testlets**

With teacher-administered mathematics testlets, the Initial Precursor level is always a teacher-administered testlet. Some higher linkage level testlets in mathematics are also teacher-administered because the tested content requires assessment outside of Student Portal.

An example is a procedural node that asks the student to measure volume. Recognizing three-dimensional objects and manipulating them onscreen requires keen perceptual and motor skills, neither of which are essential to the student’s cognitive understanding of how to measure volume.

For students who are blind, who have visual impairments, or who have physical disabilities that impact their ability to take the testlet onscreen, the test administrator should directly administer the testlets to make them accessible. Also, some higher linkage level mathematics testlets are completely teacher-administered to make them accessible to the student.

**Structure of Teacher-Administered Mathematics Testlets**

All teacher-administered mathematics testlets are similar in their structure. They include instructions to the test administrator called Educator Directions. Figure 30 is an example of Educator Directions for an Initial Precursor mathematics testlet.
First, the directions tell the test administrator, in a general way, what will happen in the testlet. Second, the directions specify any materials that need to be collected. More information about the materials and recommended substitutions are on the TIP, which the test administrator must access before test administration.

The test administrator may make substitutions if the substitutions do not change what is being measured in the testlet, and the materials are still grouped as indicated in the testlet directions. The last part of the directions page outlines the needed materials, which items need the materials, and in what order the materials are presented in the item.

In addition, teacher-administered mathematics testlets contain an engagement activity, which occurs when the test administrator presents the materials used in the testlet and engages the student in exploring the materials. Figure 31 is an example of an engagement activity in a teacher-administered mathematics testlet.
Figure 31. Screenshot of an engagement activity in a teacher-administered mathematics testlet.

TEACHER-ADMINISTERED SCIENCE TESTLETS

NOTE: Check your state’s DLM webpage to see if your state tests DLM science.

Teacher-administered science testlets are administered similarly to that of mathematics testlets. Only the test administrator interacts with Student Portal. The student works outside of Student Portal and interacts with the test administrator. For most teacher-administered science testlets, picture response cards are used.

**Picture Response Cards for Teacher-Administered Science Testlets**

Initial linkage level science testlets are structured as a series of statements that the teacher reads to the student, and the TIP usually includes picture response cards that must be printed prior to test administration. Best practice is to print picture response cards in color. Administration of the testlet will not be possible without the picture response cards.

**Structure of Teacher-Administered Science Testlets**

All teacher-administered science testlets are similar in structure. They include instructions to the test administrator called Educator Directions. Figure 32 is an example of Educator Directions for an Initial linkage level science testlet.
The directions tell the test administrator, in a general way, what will happen in the testlet and will specify any materials that must be collected. The TIP lists these materials along with recommended substitutions. The test administrator may substitute materials if the substitutions do not change what the testlet measures. The last part of the directions page outlines the needed materials, which items need the materials, and in what order the item presents the materials.

Additionally, teacher-administered science testlets contain an engagement activity, in which the test administrator presents picture response cards or materials and engages the student in exploring the materials. Figure 33 is an example of an engagement activity in a teacher-administered science testlet.
Figure 33. Screenshot of an engagement activity in a teacher-administered science testlet in Kite Student Portal.

ACCESSIBILITY SUPPORTS

Accessibility supports that are appropriate for use during teacher-administered and computer-delivered testlets are fully described in the ACCESSIBILITY MANUAL. The following describes some supports in more detail.

LANGUAGE TRANSLATION

As disability-related cognitive and communication challenges for students with the most significant cognitive disabilities are unique, and because English learners speak a wide variety of languages, the DLM alternate assessment does not provide translated forms of testlets. Instead, the DLM alternate assessment supplies test administrators with instructions regarding allowable supports based on each student’s unique combination of language-related and disability-related needs and on the specific construct measured by a particular testlet.

The test administrator will receive a TIP for each testlet. The TIP includes information about exceptions to the general rule of allowable translation. For example, when an item assesses knowledge of vocabulary, the TIP will include a note that the test administrator may not define terms for the student on that testlet.

NOTE: Some states do not allow language translation. Check with your district assessment coordinator about language translation.
Unless exceptions are noted, test administrators may do the following:

- translate the text
- simplify testlet instructions
- translate words on demand
- provide synonyms or definitions
- accept responses in either English or the student’s native language

NOTE: Student Portal does not offer a digital dictionary. Students may use their version of a dictionary if needed, such as word lists and communication symbols. This dictionary should be familiar to the student and have been used during instruction.

**SIGN INTERPRETATION**

Students who are deaf or hard of hearing and who participate in the DLM alternate assessment may require additional supports beyond those available via the PNP Profile. Support needs may be different for computer-delivered testlets than for teacher-administered testlets.

Directions in teacher-administered testlets, tell the test administrator on how to organize and present the content to the student. Scripted directions tell the test administrator what to say or sign. The test administrator will need to determine if the student can understand a direct translation of the script or if the student will need an interpretation of the directions. If interpretation is needed, advance planning may be necessary.

If the need for interpretation is likely, the test administrator may sign in to Student Portal, launch the testlet, and review the screens to evaluate the need for interpretation. If administration will take place later, the test administrator should use the **EXIT DOES NOT SAVE** button (if allowed in your state) to leave the testlet.

For teacher-administered testlets, test administrators may do the following:

- translate the text (American Sign Language, Signed Exact English, or individualized)
- translate words on demand (e.g., English to American Sign Language)
- provide synonyms and definitions except when specifically forbidden on the TIP (e.g., when the item assesses knowledge of vocabulary)
- accept responses in the student’s sign language system (American Sign Language, Signed Exact English, or individualized) or through the student’s communication device
- reread the text if the student indicates a need

**OTHER PRACTICES ALLOWED**

Students who participate in the DLM alternate assessment have access to many accessibility supports. Test administrators may also be flexible with some aspects of testlet delivery. However, testlet delivery must be standardized in certain ways. This section describes general principles for additional allowable practices when the accessibility supports included in the PNP Profile do not meet the student’s needs. When possible, the additional supports must be consistent with the student’s current needs as documented in the IEP.
When making decisions about additional supports for computer-delivered testlets, test administrators must follow IEP team decisions and these two general principles:

- **Provide flexibility in student access and response mode.** For example, standard administration procedures define typical arrangements for the test administrator, student, and computer across different types of testlets. However, the test administrator may need to adapt the physical arrangement based on a student’s physical needs and use of special equipment. Another example of this flexibility is the substitution of materials as needed for the testlet.

- **Maintain consistency in the student’s interaction with the concept being measured.** All students do not have to interact with identical materials or respond using the same response mode, but all students do complete the same cognitive or linguistic task. Therefore, test administrators cannot rephrase questions or rearrange items. Simplified instructions, definitions, and flexible response modes are allowable supports for all students except when specifically excluded by the TIP. TIPs for testlets at the lower linkage levels provide direction for material substitutions to help the test administrator maintain this consistency. For a computer-delivered testlet, most of what the student needs is displayed on the screen in the testlet.

To determine whether a practice is allowed, go to Practices Allowed and Practices Not Allowed beginning on page 77 of this manual. Also, in the ACCESSIBILITY MANUAL, go to Supports: Allowed and Not Allowed.

**TESTLETS FOR STUDENTS WHO ARE BLIND OR HAVE VISUAL IMPAIRMENTS**

**Braille Form Types**

Uncontracted braille forms are available for some ELA, mathematics, and science Essential Elements at the upper linkage levels. Each state assessment administrator selects whether one, two, or all three braille codes are offered in the state. In the student’s PNP Profile, the test administrator selects the appropriate braille code for their student.

- EBAE
- UEB with Nemeth
- UEB Math/Science

For more information about braille codes, go to the Braille Authority of North America (BANA) website. The BANA position statement, Terminology: UEB Math/Science and UEB with Nemeth, was adopted in September 2020 and is available in a PDF on their website.

The DLM alternate assessment is designed to assess a student’s knowledge, skills, and understanding of the Essential Elements, not the student’s ability to use braille. Therefore, braille should only be selected if the student is proficient in reading braille and not selected for emerging braille readers. The Alternate Form-Visual Impairment option may be more suitable for a student with a visual impairment who is not proficient in reading braille.
**Form Availability**

Braille forms and the Alternate Form-Visual Impairment option are not available for all Essential Elements and linkage levels (Table 18). Based on availability for every Essential Element being tested, a student will receive one of three forms of a testlet as shown in the following list:

- A limited number of braille forms are available during both the instructionally embedded assessment window and the spring assessment window. Go to Table 18 for the subjects, grades, linkage levels, and window availability.
- A limited number of the Alternate Form-Visual Impairment option testlets are available during both the instructionally embedded assessment window and spring assessment window.
- Standard forms are always available for the assessment.

**HINT:** When braille or the Alternate Form-Visual Impairment option are selected in the PNP Profile, other supports may also be used, such as Spoken Audio, magnification, and human read aloud.

**Braille Form Delivery**

The test administrator marks options in the PNP Profile to have the system deliver a braille or alternate form when available. In the PNP Profile, braille is selected under the Language and Braille tab, while Alternate Form-Visual Impairment is selected under Other Supports.

The forms are delivered as follows:

- If a braille form is available, the system will deliver the braille ready file (BRF).
- If a braille form is not available, the system will check for an Alternate Form-Visual Impairment option testlet to deliver.
- If neither a braille form nor the Alternate Form-Visual Impairment option are available, the system will deliver a standard form.
HINT: When appropriate, TIPs contain information about adaptations for delivering the testlet, including alternate text descriptions of pictures and graphics for the test administrator to read to the student.

When the system delivers a braille form, it displays in Educator Portal with a braille icon (Figure 34).

Figure 34. Option for Braille Ready File in Educator Portal.

The test administrator downloads the braille ready file and embosses it. For the steps to retrieve, download, and emboss the testlet, go to the Retrieve Braille Ready File section of the Educator Portal User Guide.

Braille forms are transcribed to be as similar as possible to standard testlets, but embossed testlets may contain minor changes to help students more easily access or understand the information:

- Page numbers are included on all testlets to help with organization.
- Response options are lettered to help students communicate their responses so that test administrators can input the responses in Student Portal.
- Science texts are double-spaced to help students whose braille-tracking skills are not yet strong.

Tactile Graphics

Tactile graphics are a means of conveying non-textual information to students who are blind or have visual impairments. Tactile graphics may include tactile representations of pictures, maps, graphs, diagrams, and other images.
Tactile graphics are not included with the braille forms for the DLM alternate assessments. Instead, the instructions typically direct test administrators to use objects (especially objects that are familiar to the student) for concrete representations of content. Additionally, the test administrator may create tactile graphics to represent graphics that appear onscreen in the testlet. Go to the TIP for each testlet to learn about allowable objects.

**Braille Forms in the Optional Instructionally Embedded Assessment Window**

During the optional instructionally embedded assessment window in the fall and winter months, braille forms are available for some ELA and mathematics Essential Elements at higher linkage levels. After a braille testlet is submitted, the test administrator can begin instruction and assessment on the next Essential Element, which may also have a braille form available. The BRF for the testlet will need to be downloaded and embossed. The time for this process must be considered in the test administration time.

Braille forms are **not** available for science Essential Elements in the optional instructionally embedded assessment window.

**Braille Forms in the Spring Assessment Window**

In the spring assessment window, braille forms are available for some ELA, mathematics, and science Essential Elements at the upper linkage levels. All testlets are adaptive in this window, including braille forms of the testlets. After the first testlet is submitted, the next one will take up to 15 minutes to arrive. If the next testlet delivered also has a BRF available, the testlet will need to be downloaded and embossed. The time for this process must be considered in the test administration time.

**Submitting, Scoring, and Handling Embossed Braille Forms**

Every BRF has an equivalent computer-based version of the testlet in Kite Student Portal. As the student responds to each item on their embossed paper version of the testlet, the test administrator inputs the student’s responses into the testlet in Student Portal, then submits the testlet. The system scores the responses in the same way as non-braille forms are scored.

When the assessment is complete, the embossed paper form must be securely destroyed. Consult the assessment coordinator about the process used in your district for securely handling and destroying embossed braille testlets.

**Alternate Forms for Students Who Are Blind or Have Visual Impairments**

Most standard testlets designed for students taking the DLM alternate assessment are accessible for students who are blind or have visual impairments. However, certain Essential Elements are difficult to assess online for students who have visual impairments, even with supports such as Spoken Audio. For these specific Essential Elements and linkage levels, the system will assign the Alternate Form-Visual Impairment option, which is often called a Blind Visual Impairment (BVI) testlet. That option is only available for certain Essential Elements and linkage levels and only when the test administrator selects the Alternate Form-Visual Impairment option in the PNP Profile.
When the Alternate Form-Visual Impairment option is delivered, the testlet will contain the letters \textbf{BVI} in both the test ticket and Student Portal testlet name (e.g., SP \textbf{BVI} SCI MS.PS1-2 P 10455).

\textbf{TIPS for a Teacher-Administered Alternate-Form Testlets}

The TIP for a teacher-administered Alternate Form-Visual Impairment option will list materials that may require some advanced preparation by the test administrator. Special materials are recommended, but other familiar materials may be substituted as described in the TIP.

\textbf{TIPS for a Computer-Delivered Alternate Form Testlets}

If a standard form testlet includes images on the screen, the TIP will have an alternate text page with prewritten language that mirrors the description that the computer would read aloud if the student was using Spoken Audio. Alternate text is only included for images because the onscreen text of the stem and answer options can be read aloud to the student by the test administrator.

The TIP includes instructions for the test administrator on how to use materials to replicate the images on the screen into tactile options for the student. Instructions inform the test administrator when to present certain materials (e.g., prior to asking the question, after asking the question).

\textbf{Administration of Alternate Form-Visual Impairment Option Testlets}

The general procedures for administering alternate form testlets are the same as teacher-administered testlets described in previous sections. In addition, test administrators may find the following options particularly helpful when administering alternate form testlets:

- If the student also has a physical disability that makes manipulating objects difficult, take direction from the student or act on the student’s behalf by manipulating materials and selecting the responses indicated by the student.
- Computer Spoken Audio can be selected in the PNP Profile.
- Human read aloud can always be provided by the test administrator using the alternate text for images onscreen and describing any materials presented to the student that represent images shown on the screen. The alternate text is found at the end of the TIP.
- If any materials are being substituted, change the language in the testlet to match the substituted object. For example, if the testlet uses cakes in fractional pieces and the student has been learning fractions using pizzas, pizzas may be substituted, then also change cake to pizza when reading the text aloud.

To make a change regarding braille or alternate forms during assessment, consult the \textbf{Accessibility Manual} in the Customization for Each Student section.

\textbf{PRACTICES ALLOWED}

Items in the DLM testlets are designed to assess student knowledge, skills, and understanding related to the Essential Elements. To meet this goal, test administrators will need to use their best judgment and be flexible while administering the assessment, including providing supports
beyond PNP Profile options. The following supports are allowed in computer-delivered and teacher-administered testlets unless exceptions are noted on the TIP.

**Breaks**

Students may take breaks during or between testlets. Test administrators need to use their best judgment about the use of breaks. Although the goal is to complete a testlet in a single session, breaks may be needed when the student is fatigued, disengaged, or having behavioral problems that may interfere with the student being able to demonstrate what they know and can do.

**Individualized Student Response Mode**

The items in the teacher-administered testlets do not limit response modes to certain types of expressive communication; all response modes are allowed. Test administrators may need to represent response options outside of the system to maximize the student’s ability to respond. For example, for students who use eye-gaze technology to communicate, test administrators may represent the response options in an alternate format or layout to ensure the student can indicate a clear response.

**Special Equipment During Testing**

Some students may need special equipment to access the assessment material, such as a slant board for positioning or hook-and-loop objects on a communication board. Test administrators should use the equipment to maximize the student’s ability to provide a clear response.

**Navigation Across Screens**

For any student who has difficulty interacting directly with the computer because of a lack of experience, limited fine motor skills, or use of interactive devices, the test administrator may help the student navigate across screens.

**Entering Responses for a Student**

If a student is unable to enter a response into the computer but can indicate a response in some other fashion, such as through eye gaze, materials, or verbalization, the test administrator may enter the response into the testlet on behalf of the student. Again, the student’s method for responding to items should be consistent with the student’s usual means of expressing choices.

**Interactive Whiteboards**

If a student has a severe visual impairment and needs larger presentation of content than provided by the 5x magnification setting, the test administrator may use an interactive whiteboard or projector or a magnification device that works with the computer screen to enlarge the assessment to the needed size.

Some students do not have the fine motor skills they need to be able to select a response option on the screen of a typical average-sized computer device. When this occurs, the test administrator may project the testlet on a large whiteboard screen or a similar device. Using
the large display on the whiteboard screen allows students to use their gross motor skills to indicate their response options.

**Alternate Representations of Response Options**

Pictures or objects may not be used to represent text-based response options. For example, if response options are words (i.e., text), then the responses may not be represented by pictures or objects. However, if the onscreen response option is a picture of a circle, a square, and a triangle, the educator may represent the response options using shapes on a communication board or objects that are shapes.

Additionally, representing the response options in an alternate format is allowed if the representation does not favor one response over another. For instance, the correct response cannot always be closest to the student or in the same position each time.

**Graphic Organizers**

If the student is accustomed to using specific graphic organizers, manipulatives, or other supports during instruction, the use of those supports is allowable during the DLM alternate assessment.

**Blank Paper**

If the student requires blank lined or unlined paper, it may be provided to the student. However, once the student has written anything on it, the paper then becomes a secure assessment document. At the conclusion of the assessment session, the paper must be securely destroyed along with the TIP.

**Use of Reinforcement**

Natural or direct reinforcement may be used to promote appropriate participation in the administration of the assessment. Tangible reinforcement (e.g., stickers, tokens) or social reinforcement (e.g., praise, high fives) may be used to promote appropriate on-task behavior. These types of reinforcement should be used only for appropriate and continued participation, but they must not be used to sway or lead the student to the correct response.

**Generic Definitions**

If the student does not understand the meaning of a word used in the assessment, the test administrator may define the term generically and allow the student to apply that definition to the item in which the term was used. Exceptions to this general rule are noted on the TIP for specific testlets.
PRACTICES NOT ALLOWED

Although many supports and practices are allowable for computer-delivered and teacher-administered testlets, some practices are not allowed. These practices include the following:

- repeating the item activity after a student has responded or in any other way prompting the student to choose a different response
- using physical prompts or hand-over-hand guidance to direct the student to the correct response
- removing response options or giving hints to the student
- rearranging objects to prompt the correct response (e.g., putting the correct response closer to the student)

For questions regarding whether a support is allowable, test administrators must contact their assessment coordinator. If supports outside of those listed are provided for a student, some states require that a description of those supports be provided using a state reporting system. To avoid invalidating the student’s assessment, follow state-specific guidelines and get approval from the assessment coordinator before using other supports.

KEY STEPS

Test administrators prepare for the Dynamic Learning Maps® (DLM®) spring assessment by completing the key steps in Table 19. Gray-shaded steps are described in more detail in this section. The other steps are defined in other DLM resources listed in Checklists for Test Administrators beginning on page 10 of this manual.

Check your state’s DLM webpage or the Appendix to this manual (if provided by your state) for the dates of your spring assessment window.

Table 19

**Key Steps during the Spring Assessment Window**

<table>
<thead>
<tr>
<th>Steps</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Recheck student demographic information, PNP Profile setting, and survey responses.</td>

<tr>
<td>6. Using Student Portal, assess the student on the first testlet.</td>
</tr>
<tr>
<td>7. As other testlets become available, retrieve the TIP, gather materials, and assess the student in Student Portal.</td>
</tr>
</tbody>
</table>
RECHECK STUDENT INFORMATION

Before your state’s spring assessment window opens, confirm that you have the correct students on your roster, that each student is assigned to the correct grade, and that their First Contact surveys and PNP Profiles are up to date. Contact your assessment coordinator for help editing student information.

SCHEDULE AND ARRANGE ASSESSMENT SESSIONS

Test administrators will likely need to schedule several assessment sessions, including additional make-up sessions in case students are absent or not engaged in the assessment on the days originally scheduled.

Evaluating a student’s current behavior is very important in assessment. Not every day is a good day to assess. Therefore, use professional judgment and reschedule the assessment if a student is not having a good day on the intended assessment day. If the student gets tired or distracted during a testlet sooner than expected, allow the student to complete and submit the testlet, and then take a break from testing until the student is ready again. You can also use the **EXIT DOES NOT SAVE** button and return later (if your state allows this option). If **EXIT DOES NOT SAVE** is chosen during a testlet, any responses the student had made up to that point will not be saved. The testlet will revert to the unused status. When the student is ready again, testing can begin afresh.

Testlets may be administered in a classroom, computer lab, multipurpose room, or other school setting. However, the space must be quiet, free from distractions, and located where the testlet is not visible to other students.

Recommendations for configuration of the computer, test administrator, student, and other materials are provided on page 44 and in Teacher-Administered Testlets on page 57 of this manual.

For assessment time estimates, go to Duration of the Assessment Administration on page 29 of this manual.

RETRIEVE TESTLET INFORMATION PAGE AND GATHER MATERIALS

**Testlet Information Pages**

Testlet Information Pages (TIPs) provide test administrators with information specific to each testlet. Test administrators receive a TIP after each testlet is assigned to a student. Review the TIP before beginning the student’s assessment. Once the testlet has been administered, the TIP for it is no longer available.
HINT: During the instructionally embedded assessment window, the TIP is accessed in the Instruction and Assessment Planner section of Educator Portal. During spring assessment window, TIPs appear in the Test Management section of Educator Portal. For a step-by-step procedure, go to the Retrieve Testlet Information Page section in the Educator Portal User Guide.

The testlet form name is included on the TIP (outlined in red in Figure 35). This is a TIP for an ELA assessment of reading informational text for grade 11 or 12 for a testlet at the Initial Precursor Level.

Figure 35. Example Testlet Information Page header with testlet form name.

Information on the TIP states whether a testlet is computer-delivered or teacher-administered and indicates the number of items on the testlet. The TIP for a teacher-administered testlet typically has more information regarding materials to use during testing than the TIP for a computer-delivered testlet, except for students who are blind or have visual impairments. The materials for a computer-delivered testlet are typically all on the computer screen.

The TIP also provides the following information for each testlet:

- **Materials Needed**: This field lists any materials needed to administer the testlet. A description of any necessary attributes of the materials will be provided. For example, the materials may be three different small objects that are familiar to the student, each of which has a single word name (e.g., ball, pencil, and bag).

- **Materials Use**: This field contains a description of how the materials are used in the testlet to assess the skill. For example, the student will be able to indicate a specific object when the object’s name is used.

- **Suggested Substitute Materials**: Substitute materials are often allowed. This section indicates whether materials may be substituted and sometimes recommends key attributes of substitute materials.

- **Accessibility Supports Not Allowed**: Although a test administrator may usually use all PNP Profile supports and take advantage of the flexibility described in the Practices Allowed section of this manual, the TIP will indicate when a support is not allowed (e.g., calculator or if other limits are included like when definitions or translation are not allowed).
• **Other Comments:** If a testlet has other unique instructions, they will appear here. Testlets that require special setup before test administration, such as some mathematics testlets designed for students who are blind or have visual impairments, have additional pages of instructions.

• **Alternate Text:** For test administrators who will be delivering human read aloud that includes descriptions of graphics, alternate text descriptions of images are provided as additional pages after the main TIP.

| HINT: Instructions for alternate text for ELA are in their own section in the last pages of the TIP. |

TIPs for ELA testlets also provide the following information:

- name of the text
- whether the text is informational or literature based
- whether the text is familiar or unfamiliar (familiar texts may be downloaded from the Instructional Resources page on the DLM website and used in classroom instruction prior to assessment)
- name of the grade-level text associated with the DLM alternate assessment text

TIPs for mathematics testlets also provide the following information:

- any specific mathematics terminology used in the testlet
- whether calculator use is allowed for the testlet
  - “Yes” means a student can use a calculator if the student is accustomed to using a calculator for instruction. Some items in the testlet may not require a calculator, but the test administrator does not have to remove the calculator once it has been given for the testlet.
  - “No” means a student cannot be allowed to use a calculator for any portion of the testlet.
  - “Not Applicable” means the items do not involve computation and a calculator does not need to be provided.

**Materials**

Materials used in testlets are typically easily available and are familiar to the student. Therefore, the TIP includes descriptions of the general material properties that are needed to correctly assess the Essential Elements at a linkage level. If a requested material is not readily available, a suitable substitution should be made. Materials that are not listed may be substituted if they meet the general requirements for that Essential Element. Also, if a testlet assigned to the student contains materials that are not appropriate for that student, substitutions can be made.

Materials for the testlet must be collected prior to the assessment session. However, if the student has begun a testlet and the materials are not working as anticipated, alternate materials may be retrieved. Student Portal can be inactive up to 90 minutes before timing out.
Go to System Timeout on page 55 of this manual for more information about the 90-minute timeout.

The Materials Collections is a list of common materials used in testlets, particularly the teacher-administered testlets. The list is first provided during the instructionally embedded assessment window and is then replaced by the one for the spring assessment window. The lists are available for each subject being tested.

To access the Materials Collections list, go to the DLM website > your state > Teacher > Instructional Resources > All > scroll to the Materials Collections list for each subject.

**Familiar Texts**

Teacher-administered reading testlets use texts that are familiar to students and that were used during instruction. If the student is accustomed to having the familiar text read from a paper copy, the paper copy may be used during assessment. Links to printable versions of familiar texts are provided. Go to the DLM website > your state > Instructional Resources > DLM Familiar Texts > choose a grade level to access all texts for that grade.

**Other Requirements**

Regardless of the type of the DLM alternate assessment, test administrators need the following when administering an assessment:

- assessment device with the most current version of Kite Student Portal
- student’s username and password
- assistive devices appropriate to the student (if applicable)
- headphones for use with computer Spoken Audio if other students are in the room (if applicable)

**Monitor Student Progress**

During the spring assessment window, students may receive as few as six and as many as ten testlets, depending on the grade and subject (details are in Appendix A. Number of Testlets for Spring Assessments on page 113 of this manual).

On the Test Management screen in Educator Portal, the Test Progress column allows the test administrator to monitor a student’s testing progress for each subject. For each test ticket, the Test Progress column will indicate the number of testlets that are available. For example, on the Test Management screen in Figure 36, the student is on the third of nine required science testlets for the grade.

*Figure 36. Screenshot of Test Management screen in Educator Portal.*
Also in Kite Student Portal, testing progress is indicated in the same way (e.g., Testlet 3 of 9) as shown in Figure 37.

**Figure 37.** Screenshot of science assessment progress in Kite Student Portal.

### INDIVIDUAL STUDENT SCORE REPORTS

The Individual Student Score Reports are generated exclusively from responses in testlets administered only during the required spring assessment window. Responses from field test testlets and testlets administered during the optional instructionally embedded assessment window are not factored into end-of-year results.

The scoring system in the DLM alternate assessment works differently than scoring in traditional alternate assessments. Students are not given raw scores, percentage-correct scores, or scale scores. Instead, the system combines a student’s responses on operational testlets, using a complex algorithm to determine which linkage levels the student has likely mastered.

Results for each linkage level are determined by the probability that the student has mastered the skills at that linkage level. The information about each linkage level leads to a summary of the student’s mastery of skills in each conceptual area for ELA and mathematics or each domain for science and then for each overall subject. Summative results are based on all assessed Essential Elements in the blueprint for ELA, mathematics, and science.

The **Educator Portal User Guide** contains information about accessing Individual Student Score Reports in the section, Access Reports and Data Extracts. Scoring and reporting videos are available to help educators interpret score reports. These are located on each state’s webpage under the Scoring and Reporting tab. Only certain roles in Educator Portal are allowed access to the reports, which are determined by state policy. Test administrators may also contact the assessment coordinator or building test coordinator about reviewing students’ Individual Student Score Reports.
PREPARE FOR NEXT YEAR

Test administrators and IEP teams need to make certain decisions when preparing for the following school year. Two steps are described in Table 20.

Table 20

Preparation for the Following School Year

<table>
<thead>
<tr>
<th>Step</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Evaluate accessibility supports in the Personal Needs and Preferences (PNP) Profile settings with IEP teams and make decisions about supports for next year.</td>
</tr>
<tr>
<td>2.</td>
<td>Plan academic IEP goals with IEP teams. Use sources of information and resources when planning a student’s IEP goals, such as the blueprints for the next grade in which the student will be enrolled.</td>
</tr>
</tbody>
</table>

REVIEW BLUEPRINT

IEP teams are to review the provided blueprints for the next grade level as one source of information to plan the academic goals and prioritize the Essential Elements that will be taught the following year. Blueprints are available through your state’s Dynamic Learning Maps® (DLM®) webpage.
INSTRUCTIONALLY EMBEDDED ASSESSMENTS (OPTIONAL BUT RECOMMENDED)

  Testlet Information Page .................................................................................................................................... 93

Access the Fall Performance Report .................................................................................................................. 93

For an overview and more information about the purpose of instructionally embedded assessments, go to Optional Instructionally Embedded Assessment on page 29 of this manual.

KEY STEPS

Test administrators prepare for and deliver instructionally embedded assessments by completing the key steps in Table 21. Instructionally embedded assessments are only available during the instructionally embedded assessment window that occurs during the fall and winter months. Gray-shaded steps are described in more detail in this section. The other steps are defined in other Dynamic Learning Maps® (DLM®) resources listed in the Checklists for Test Administrators beginning on page 10 of this manual.

Table 21

*Key Steps in Preparing for Instructionally Embedded Assessments*

<table>
<thead>
<tr>
<th>Steps</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Follow state and district guidelines for choosing Essential Elements for instruction.</td>
</tr>
<tr>
<td>2. Retrieve instructional information for the Essential Element either on the website or by selecting on the mini-map in the Instruction and Assessment Planner for the Essential Element.</td>
</tr>
</tbody>
</table>
Steps

3. Follow the steps outlined in the Educator Portal User Guide to select an Essential Element and linkage level. The Instruction and Assessment Planner is open only during the optional instructionally embedded assessment window. Find the dates for your state’s instructionally embedded assessment window at the top of your state’s DLM webpage.

4. Deliver instruction until you determine the student is ready for assessment.

5. Schedule a location and time for assessment sessions.

6. Assign a testlet in the Instruction and Assessment Planner and retrieve the Testlet Information Page (TIP). Gather needed materials before attempting to begin the assessment.

7. Retrieve the student’s credentials (username and password) in the Instruction and Assessment Planner.

8. Sign in to Student Portal.

9. Assess the student on the assigned testlet.

10. Review and evaluate the assessment results—did the student master the Essential Element at the linkage level tested?

11. Choose the next Essential Element for instruction. This may be a new Essential Element or the same Essential Element at a different linkage level.

12. Repeat the instruction and assessment cycle for more Essential Elements during the instructionally embedded assessment window.

HINT: During the instructionally embedded assessment window, at least one testlet at each linkage level is available for each ELA, mathematics, and science Essential Element. After a student completes a testlet, more testlets for that Essential Element and linkage level may be available. Follow your district’s guidance on frequency of assessment.
CHOOSE ESSENTIAL ELEMENTS FOR INSTRUCTION

**HINT:** Each testlet in each subject delivered during the instructionally embedded assessment window assesses only one Essential Element except for writing testlets. All students receive only one writing testlet.

During the instructionally embedded assessment window, test administrators will be able to make choices about each of the following:

- Essential Elements
- linkage levels
- accessibility supports
- frequency of testing
- repeated assessment of a linkage level for an Essential Element (if more than one testlet is available at that linkage level)

Decisions should be grounded in academic priorities for the student, including priorities set in the IEP.

**SELECT A LINKAGE LEVEL**

For each Essential Element, the system recommends a linkage level that should provide an appropriate challenge for the student and represent a good instructional target, but the test administrator may override that recommendation and select another linkage level. Information about the nodes (skills) at each linkage level for ELA and mathematics are found in two places:

- Both short and long linkage level descriptors are provided in the Instruction and Assessment Planner. Go to the step for choosing a linkage level in the Create a Plan section in the **EDUCATOR PORTAL USER GUIDE**.
- The list of nodes for each Essential Element in the Tested Essential Elements PDFs are located on the Instructional Resource Page. An example is shown in Table 22.
Table 22

An Example of an ELA Essential Element with Node Descriptions

<table>
<thead>
<tr>
<th>ELA.EE.RI.6.5: Determine how the title fits the structure of the text.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Initial Precursor:</strong> The student can move appropriately to demonstrate an understanding of action words spoken by adults in a familiar routine.</td>
</tr>
<tr>
<td><strong>Distal Precursor:</strong> The student can identify concrete details, such as individuals, events, or ideas, in a familiar informational text.</td>
</tr>
<tr>
<td><strong>Proximal Precursor:</strong> Given a text with a clear structure, the student can determine whether the text tells about an event, gives directions, or provides information on a topic.</td>
</tr>
<tr>
<td><strong>Target:</strong> The student can understand how the title of an informational text reflects the structure, content, and purpose of the text.</td>
</tr>
<tr>
<td><strong>Successor:</strong> The student can identify that events or facts may be tied together in a sequence in order to communicate steps or the need for a linear process.</td>
</tr>
</tbody>
</table>

**REVIEW AND REVISE CHOICES**

Test administrators should review the Essential Elements they assigned to their students. A change may be necessary if a student has made considerable growth in the Essential Element, and the test administrator had previously selected a lower linkage level. Change may also be necessary when a student experiences significant regression due to disability or absence. A change can occur unless a testlet has been assigned. Only a user with the Educator Portal role of State Assessment Administrator or District Test Coordinator can cancel an assigned testlet.

HINT: Choosing an Essential Element is part of planning for an instructionally embedded assessment session. This process does not apply to testlets administered during the spring assessment window.

**RETRIEVE THE MINI-MAP**

Instructional information includes the Essential Element, a list of linkage levels and nodes, and the mini-map. These details are provided in the Tested Essential Elements PDFs located on the Instructional Resources page on the DLM website. This information is also available in the Instruction and Assessment Planner when the user selects the mini-map icon for each Essential Element during the instructionally embedded assessment. To learn about the steps to access the mini-maps, check the Create a Plan section of the EDUCATOR PORTAL USER GUIDE.

NOTE: The science learning map model is still being developed and not available at this time. Therefore, science Essential Elements have fewer nodes than ELA and mathematics Essential Elements.
For additional information on providing support for classroom instruction, consider reviewing the Professional Development modules. These modules are designed to support instruction on broad academic topics associated with many Essential Elements. Go to the DLM Professional Development website for access to the modules.

**ASSIGN A TESTLET**

After instruction is complete and the student is ready for assessment, the test administrator returns to the Instruction and Assessment Planner and assigns the testlet for the Essential Element at the selected linkage level. By choosing to assign a testlet to the student, the TIP becomes available to the test administrator. Also, the test administrator may decide not to assign a testlet for an Essential Element. By using this action, the Essential Element at that linkage level will revert to its original status.

**SCHEDULE AND ARRANGE ASSESSMENT SESSIONS**

Test administrators will likely need to schedule several assessment sessions during the instructionally embedded assessment window, including additional make-up sessions in case students are absent or not engaged in the assessment on the originally scheduled days.

Evaluating a student’s current behavior is very important in assessment. Not every day is a good day to assess. Therefore, use professional judgment and reschedule the assessment if the student is not having a good day on the intended assessment day. If the student gets tired or distracted during a testlet sooner than expected, allow the student to complete and submit the testlet and then pause the assessment, or use the **EXIT DOES NOT SAVE** button and return later (if your state allows this option). If **EXIT DOES NOT SAVE** is chosen, the student’s responses will not be saved.

Testlets may be administered in a classroom, computer lab, multipurpose room, or other school setting. However, the space must be quiet, free from distractions, and located where the testlet is not accessible to other students.

Recommendations for configuration of the computer, test administrator, student, and other materials are provided in Computer-Delivered Testlets on page 44 and Teacher-Administered Testlets on page 57 of this manual.

For assessment time averages and ranges go to Duration of the Assessment Administration on page 29 of this manual.

**PREPARE TO ADMINISTER AN INSTRUCTIONALLY EMBEDDED TESTLET**

Regardless of the type of the DLM alternate assessment (teacher-administered or computer-delivered), test administrators need the following supplies when administering an assessment:

- assessment device with the most current version of Student Portal downloaded
- student’s username and password
- assistive devices appropriate to the student (if needed)
- headphones for computer Spoken Audio if other students are in the room
- TIP
**Testlet Information Page**

The type of information included on the TIPs is the same for testlets in both the instructionally embedded assessment and spring assessment windows. For more information on TIPs, go to Testlet Information Page on page 82 of this manual.

**ACCESS THE FALL PERFORMANCE REPORT**

The Fall Performance Report provides information about the student’s participation in the optional instructionally embedded assessment window. The report is per student and shows the status of each Essential Element chosen for instruction: the date instruction began, the date the testlet was assigned, the date the testlet was administered, and whether the student mastered or did not master the linkage level for the Essential Element.

The Fall Performance Report is a PDF that can be downloaded, printed, and saved. Test administrators may find the report useful when planning or reviewing instruction during the instructionally embedded assessment window. For ELA and math, the report displays the tested conceptual areas. For science, the report displays the domains. This report contains sensitive information, including the student’s name, school, grade, and state ID number, and the report must be treated as a secure document.

**HINT:** Mastery results for writing testlets taken during the optional instructionally embedded assessment window are not available.
KITE STUDENT PORTAL USER GUIDE

HINT: When using Student Portal, all other screens are locked and cannot be accessed.

Kite Student Portal Assessment Devices ................................................................................. 94
Internet Connectivity ............................................................................................................. 94

  Start a Testlet ......................................................................................................................... 97
  Navigate in Kite Student Portal ............................................................................................ 100
  Spoken Audio ....................................................................................................................... 101
  Take a Break During Assessment .......................................................................................... 102
  Complete a Testlet .................................................................................................................. 103
  Troubleshoot in Kite Student Portal ..................................................................................... 104

HINT: Students access Kite® Student Portal with their own username and password.
Staff and educators do not have accounts in Student Portal.

KITE STUDENT PORTAL ASSESSMENT DEVICES
The most current version of Kite Student Portal must be downloaded each year on a student’s testing device to take the Dynamic Learning Maps® (DLM®) alternate assessment. Student Portal can be downloaded on a variety of devices. Go to the Kite® Suite page on the DLM website for the 2022–2023 Kite Installation Guides.

INTERNET CONNECTIVITY
An internet connection is required to deliver assessments. Your assessment coordinator or technology personnel can help with internet connectivity questions or issues.

KITE STUDENT PORTAL PROCEDURES

NOTE: A testlet must begin and end on the same testing device. Do not attempt to launch a single testlet on multiple devices. This means a student should not start a testlet on one device and then attempt to launch the same testlet on another device. If the testlet cannot be finished on one device, use EXIT DOES NOT SAVE to discontinue the testlet (no answers will be saved). Begin the testlet again on a different device.
**Access Practice Activities and Released Testlets**

HINT: The most current version of Student Portal must be installed before accessing practice activities or released testlets. Download instructions for each type of device are available on the Kite® Suite webpage on the DLM website.

To access the DLM practice activities and released testlets, follow these steps:

1. Select the Kite Student Portal icon on the testing device.

![Kite Student Portal Icon](image)

2. Enter the demo student username and password. Select **SIGN IN**.

![Kite Student Portal Welcome Back](image)
3. **Select PRACTICE FIRST.**

4. **Select Other**, then select one of the two practice activities. **Select Take Test.**

5. **Select BEGIN.**

6. **Continue with the testlet using the BACK and NEXT buttons to navigate.** To stop in the middle of a testlet and end testing in that testlet, select **EXIT DOES NOT SAVE.**

7. **Released testlets work in a similar way as the practice testlets.** Choose a username and password associated with the student profile you want to use for practice with the student. Instead of **Other**, select the appropriate subject (**English Language Arts**, **Mathematics**, or **Science**). Several pages of released testlets will be available. Scroll
through the pages to select a test. To try a different student profile or a different released testlet or practice activity, complete a testlet or select EXIT DOES NOT SAVE to return to the welcome screen. Then sign out and sign back in with a different username and password.

BEGIN AN OPERATIONAL ASSESSMENT

To sign in to Student Portal and begin the operational assessment, the assessment window must be open, and the student’s credentials (username and password) must be used. The student’s credentials will be the same for all DLM alternate assessments, including all testlets administered during the optional instructionally embedded window, all testlets assigned during the required spring assessment window, and all field test testlets.

The student’s credentials are available in Educator Portal and can be accessed in the Instruction and Assessment Planner after the opening of the instructionally embedded assessment window. Select the Credential icon to access and print the student’s username and password.

During the spring assessment window, the student’s username and password are available in Educator Portal in the Test Management section. Select the Test Ticket in the Test Ticket column.

Hint: Step-by-step directions on how to access a student’s username and password before the opening of the instructionally embedded assessment window are described in detail in the View Student Username and Password section in the EDUCATOR PORTAL USER GUIDE.

Before the test administrator can access the student’s username and password, two requirements must be met:

1. The test administrator must successfully pass the Required Test Administrator Training.
2. The student must be rostered to the test administrator.

START A TESTLET

To administer a DLM alternate operational assessment, follow these steps.

1. Select the Kite Student Portal icon on the testing device.
2. Enter the student’s username and password. Select **SIGN IN**.

3. Select **TAKE A TEST**.

4. One testlet in each subject will be available.
5. Select **BEGIN**.

In the spring assessment window, Student Portal will display the number of testlets remaining by subject (Figure 38). In this example, English language arts is the selected subject. The student is starting testlet 1 of 9.

*Figure 38. A student’s assessment progress by subject in Kite Student Portal.*
**Navigate in Kite Student Portal**

Navigate in Student Portal with the buttons introduced in Table 23.

Table 23

*Kite Student Portal Navigation Buttons*

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="BACK" /></td>
<td>Return to the previous screen.</td>
</tr>
<tr>
<td><img src="image" alt="NEXT" /></td>
<td>Go to the next screen.</td>
</tr>
<tr>
<td><img src="image" alt="READ" /></td>
<td>This button appears when the test administrator selects the Spoken Audio option in the student’s Personal Needs and Preferences (PNP) Profile. This is a synthetic voice. Select the icon or the word <strong>READ</strong> to begin the read aloud option. Select again to stop the option.</td>
</tr>
<tr>
<td><img src="image" alt="EXIT" /></td>
<td>Exit the testlet without saving responses. Upon returning, the student will start at the beginning of this testlet.</td>
</tr>
<tr>
<td><img src="image" alt="GO BACK" /></td>
<td>Go back to review or change responses for this testlet.*</td>
</tr>
<tr>
<td><img src="image" alt="END" /></td>
<td>Save responses and end this testlet.*</td>
</tr>
</tbody>
</table>

* Available on the review screen at the end of the testlet. Go to the review screen under Complete a Testlet on page 103 of this manual.
Figure 39 shows the buttons available on each testlet screen.

*Figure 39. Screenshot of the available buttons on each testlet screen in Kite Student Portal.*

![Screenshot of the available buttons on each testlet screen in Kite Student Portal.]

**Spoken Audio**

When Spoken Audio is enabled in a student’s PNP Profile, a **READ** button will appear at the bottom of the screen. Students may select the **READ** button to start the Spoken Audio (Figure 40).

*Figure 40. Screenshot of the **READ** button in a testlet in Kite Student Portal.*

![Screenshot of the **READ** button in a testlet in Kite Student Portal.]

As soon as Spoken Audio is enabled, a diagonal red line appears across the button and the word **READ** changes to **PAUSE** (Figure 41).

*Figure 41. Screenshot of the **PAUSE** button in a testlet in Kite Student Portal.*

![Screenshot of the **PAUSE** button in a testlet in Kite Student Portal.]

The synthetic voice continues reading until all sentences or response options on the screen have been read or the student selects **PAUSE**.

If the student selects **PAUSE**, the Spoken Audio stops. The button changes back to **READ** and the icon becomes uncrossed again. To resume the synthetic voice reading, the student selects **READ** and the Spoken Audio resumes.
Additionally, while the synthetic voice is reading, the sentence or response option on the screen is highlighted in yellow. The screen highlights one sentence or response option at a time. If the student wants to hear the sentence or response option again, or have the highlighting displayed, the students may select READ repeatedly to reactivate Spoken Audio as many times as needed. Once the student is ready to move on, the student selects the NEXT button to move to the next screen.

**Take a Break During Assessment**

DLM testlets are not timed and breaks are not limited during assessment. A student may take a break in the following three ways:

1. **Take a short break (up to 90 minutes).** After 88 minutes and 30 seconds of inactivity in the testlet, the system provides two warning options: EXTEND SESSION or LOGOUT. If neither option is selected, after the 90 seconds expires, Student Portal will automatically close the session and not save any responses.

   ![Your session is about to expire.
   Select Extend Session to continue where you left off.
   Time Remaining: 01 mins and 28 seconds][1]

   - EXTEND SESSION
   - LOGOUT

2. **Take a break between testlets.** After submitting the testlet, log out of Student Portal. Sign back in when the student is ready to take the next testlet.

3. **Stop in the middle of a testlet** using the EXIT DOES NOT SAVE button. Student responses will not be saved and the testlet reverts to unused. The button will appear on every testlet screen.

   ![EXIT DOES NOT SAVE][2]

   The user receives a confirmation message when choosing EXIT DOES NOT SAVE.
If **YES** is selected, the testlet will close without saving the student’s work. The testlet will be reset, and when the student returns to the testlet, the testlet will start at the beginning.

If **NO** is selected, the student can continue with the testlet.

**NOTE:** Not all states allow the use of **EXIT DOES NOT SAVE**. Check with the assessment coordinator about using this option before beginning a testing session with a student.

**COMPLETE A TESTLET**

A review screen appears at the end of a testlet. Figure 42 is an example of a high school biology testlet at the Target linkage level during the spring assessment window. The student did not respond to two of the items. The screen provides an opportunity for the student to go back to those items again unless they were purposefully left unanswered.

*Figure 42. Screenshot of the review screen at the end of a testlet in Kite Student Portal.*
To complete the testlet, follow these steps:

1. Select **END**.

2. A confirmation message displays with the question, “Are you sure you want to end?”

3. If **YES** is selected, all answers will be saved, the testlet will be submitted and closed.

4. If **NO** is selected, the student can return to any page and continue working in the testlet.

**Troubleshoot in Kite Student Portal**

If you encounter scroll bars when magnification was not selected in the PNP Profile, the student’s display has technology issues. Contact your district technology staff for help.

For more help with common Student Portal problems, go to the Troubleshooting Kite Errors page on the DLM website.

## GLOSSARY

This glossary compiles definitions and acronyms relevant to the Dynamic Learning Maps® (DLM®) alternate assessment.

<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>card</td>
<td>A cell on the Student View Page in the Instruction and Assessment Planner for each Essential Element and linkage level. Information about the specific Essential Element and the specific linkage level can be accessed when the user selects the card.</td>
</tr>
<tr>
<td>claim</td>
<td>ELA and mathematics: A broad statement about what the DLM Consortium expects students to learn and to be able to demonstrate within English language arts and mathematics. Each claim is subdivided into two or more conceptual areas.</td>
</tr>
<tr>
<td>conceptual area</td>
<td>ELA and mathematics: A region within the DLM learning map containing nodes associated with related Essential Elements, representing concepts and skills that support the learning of the Essential Elements in English language arts and mathematics. Conceptual areas are composed of clusters of connected concepts and skills and serve as models of how students may acquire and organize their content knowledge. Conceptual areas are considered subparts of the overall claims.</td>
</tr>
<tr>
<td>connection</td>
<td>ELA and mathematics: The relationship between two nodes in the DLM maps. Connections are illustrated with arrows in the maps.</td>
</tr>
<tr>
<td>core idea</td>
<td>Science: The key organizing principles in science and are taught and learned over multiple grades at increasing levels of depth and sophistication. For science, within each domain, three or four core ideas have been selected to use for instruction and assessment. Each of the core ideas is narrowed further into topics.</td>
</tr>
<tr>
<td>display enhancements</td>
<td>Options that change the testlet appearance on the student’s device screen, including magnification, overlay color, invert color choice, and contrast color.</td>
</tr>
<tr>
<td>domain</td>
<td>Science: The major science content areas assessed are domains. The domains assessed across all grade bands are physical science, life science, and Earth and space science.</td>
</tr>
<tr>
<td>Term</td>
<td>Description</td>
</tr>
<tr>
<td>---------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Educator Portal</td>
<td>Educator Portal is a secure, web-based application designed to aid teachers and administrative users in the administration of assessments, including student enrollment and monitoring or tracking results. Users can access Educator Portal using any supported browser via <a href="https://educator.kiteaai.org/">https://educator.kiteaai.org/</a>. For information on working within Educator Portal, access the DATA MANAGEMENT MANUAL and the EDUCATOR PORTAL USER GUIDE on the DLM website.</td>
</tr>
<tr>
<td>engagement activity</td>
<td>An activity at the beginning of a testlet that describes a scenario, taps prior knowledge or experience, or introduces the concept to be addressed. In English language arts reading testlets, the first reading of the text often serves as the engagement activity. In mathematics and science, the engagement activity provides context for the items. The engagement activity for some science testlets at the upper linkage levels include a short video without audio.</td>
</tr>
<tr>
<td>Essential Elements</td>
<td>Essential Elements are the content standards used for assessment for students with the most significant cognitive disabilities. Essential Elements are reduced in depth, breadth, and the level of complexity, and they build a bridge from the content in the grade-level standards to academic expectations. They are specific statements of knowledge and skills linked to the grade-level expectations identified in K–12 grade-level standards for English language arts and mathematics. Essential Elements in science are linked to the National Research Council’s Framework for K–12.</td>
</tr>
</tbody>
</table>
### Term

#### First Contact survey

A survey used to collect background information about students who are eligible for the DLM alternate assessments. The survey goes beyond basic demographic information and includes questions on communication, assistive technology devices, motor and sensory impairments, and academic performance.

In the optional instructionally embedded assessment window, data gathered from the core questions from the survey are used to **recommend** the linkage level for each ELA and mathematics Essential Element. In addition to the core questions, data gathered from the science questions are used to **recommend** the linkage level for each science Essential Element. Data gathered from the core questions plus data from the writing questions are used to **recommend** the linkage level for the writing testlet.

In the spring assessment window, data gathered from the core questions are used to **assign** the linkage level for the student’s first ELA and mathematics testlets.

Data gathered from the core questions plus data from the science questions are used to **assign** the linkage level of the student’s first science testlet.

In the spring window, data gathered from the core questions plus data from the writing questions are used to **assign** the linkage level for the writing testlet, instead of performance of previously completed testlets.

#### initialization

The process by which a student’s existing information is used to determine the point in the DLM learning map model where the student enters the assessment for the first time.

#### Instruction and Assessment Planner

A part in Educator Portal where test administrators perform assessment functions for a student during the optional instructionally embedded assessment window. Functions include selecting an Essential Element and linkage level for instruction and subsequent testing. Most assessment data about the student is provided in the Instruction and Assessment Planner during this window, including a mastery of a tested Essential Element at a linkage level. Score results are not used for the end-of-year Individual Student Score Reports.
<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>instructionally embedded</td>
<td>Occurs during the optional instructionally embedded assessment window in the fall and winter months where instruction and assessment are closely integrated with assessment functions being performed throughout instruction. Functions include educator-selected Essential Elements and linkage levels for instruction and subsequent testing. Most assessment data about the student is provided in the Instruction and Assessment Planner during this window, including a mastery indication for a tested Essential Element at a linkage level. Although a mastery indication is provided, score results do not impact end-of-year Individual Student Score Reports.</td>
</tr>
<tr>
<td>assessment</td>
<td></td>
</tr>
<tr>
<td>Kite Student Portal</td>
<td>Student Portal is a secure testing platform used by students to take testlets. Once launched, Student Portal prevents students from accessing unauthorized webpages or applications during testing.</td>
</tr>
<tr>
<td></td>
<td>All students taking the DLM alternate assessment will have unique accounts in Kite Student Portal. Test administrators do not have accounts in Student Portal.</td>
</tr>
<tr>
<td></td>
<td>In addition to operational testing in the Student Portal, practice activities and released testlets can be administered using Student Portal. The login credentials for the practice activities and released testlets are unique to each one. Access the TEST ADMINISTRATION MANUAL for more information about Student Portal.</td>
</tr>
<tr>
<td>linkage level</td>
<td>ELA and mathematics: A small section of the DLM learning map model containing one or more nodes that represent critical concepts or skills needed to learn the Essential Element. ELA and mathematics each have five linkage levels: Initial Precursor, Distal Precursor, Proximal Precursor, Target, and Successor.</td>
</tr>
<tr>
<td></td>
<td>Science: An incremental level of complexity toward the learning target where an assessment was developed for the science Essential Elements. Science has three linkage levels: Initial, Precursor, and Target.</td>
</tr>
<tr>
<td></td>
<td>Linkage levels for an Essential Element are always related directly to grade-level content standards but at different levels of cognitive complexity. The Target level is most closely related to the grade-level expectation.</td>
</tr>
<tr>
<td>Term</td>
<td>Description</td>
</tr>
<tr>
<td>---------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>materials</td>
<td>Any objects, manipulatives, and tools used during an assessment. Materials Collection lists are specific to a window for each subject. The lists are found on each state’s DLM website under Educator Resources.</td>
</tr>
<tr>
<td>node</td>
<td>ELA and mathematics: A representation in the DLM learning map model of an individual skill or conceptual understanding identified in the research in ELA and mathematics.</td>
</tr>
<tr>
<td>Personal Learning Profile</td>
<td>A collective term used to describe a student’s personal needs and preferences settings entered in the PNP Profile in addition to information about the student entered in the First Contact survey in Educator Portal.</td>
</tr>
<tr>
<td>Personal Needs and Preferences (PNP) Profile</td>
<td>Student-specific information that informs Kite Student Portal about an individual student’s personal needs and preferences for each testlet. The PNP Profile includes information the system needs to make the student’s user interface in Student Portal compatible with their accessibility needs. The PNP Profile includes information about display enhancements, language and braille, and audio and environmental supports. Educators who know the student provide the information in the profile found in Educator Portal.</td>
</tr>
<tr>
<td>plan</td>
<td>The test administrator creates a plan in the Instruction and Assessment Planner in Educator Portal only during the optional instructionally embedded assessment window. A plan includes an Essential Element, a linkage level, and a testlet for ELA, mathematics, and science.</td>
</tr>
<tr>
<td>released testlets</td>
<td>A released testlet is a publicly available sample DLM assessment. Released testlets may be used by students and teachers as examples or opportunities for practice. Released testlets are developed using the same standards and methods used to develop testlets that are used in DLM operational assessments. New released testlets are added periodically.</td>
</tr>
<tr>
<td>stem</td>
<td>The beginning part of the item that presents a problem to solve or an item to which a student responds. The stem may also include other relevant information in the item. A multiple-choice item is a common example in the DLM alternate assessment, consisting of a stem and a set of response options from which a student chooses.</td>
</tr>
<tr>
<td>Term</td>
<td>Description</td>
</tr>
<tr>
<td>-----------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Student Activity Table</strong></td>
<td>A page in the Instruction and Assessment Planner in Educator Portal. The Student Activity Table provides an at-a-glance overview for all students rostered to the test administrator in the subjects in which the students are being tested during the optional instructionally embedded assessment window. The data in the Student Activity Table populates based on the test administrator’s actions on the Student View Page for each student (i.e., how many testlets were administered). The table also includes three icons providing easy access to the First Contact survey, PNP Profile, and the student’s credentials.</td>
</tr>
<tr>
<td><strong>Student View Page</strong></td>
<td>A page in the Instruction and Assessment Planner in Educator Portal that displays details about one student at a time for each Essential Element and linkage level. During the optional instructionally embedded assessment window, test administrators use the Student View Page for several instruction and assessment actions for each student (i.e., creating a plan and assigning a testlet). The system will display information about the student’s testing progress and will indicate whether the student achieved mastery of an Essential Element at the linkage level tested.</td>
</tr>
<tr>
<td>tactile graphic</td>
<td>Tactile graphics are a means of conveying non-textual information to students who are blind or have visual impairments. Tactile graphics may include tactile representation of pictures, maps, graphs, diagrams, and other images. The DLM alternate assessment does not provide tactile graphics with the testlets.</td>
</tr>
<tr>
<td>technology-enhanced Items</td>
<td>Computer-delivered test items that require a specialized interaction, such as select and drag. A technology-enhanced item is any item that is not answered using direct selection. This item type is only used at upper linkage levels.</td>
</tr>
</tbody>
</table>
**Term**

**testlet**

A short assessment that begins with an engagement activity and include three to nine items, depending on the subject. Together the items increase the instructional relevance of the assessment and provide a better estimate of a student’s knowledge, skills, and understandings than can be achieved by a single assessment item. Each testlet assesses only one Essential Element, except for the writing testlet, which assesses all writing Essential Elements together in one testlet.

Testlets are delivered one at a time in each subject. They are either teacher-administered or computer-delivered and they are adaptive, except for the writing testlet, which is always delivered last, and its linkage level assignment is not based on performance of previous testlets. More specific information is found in the **Test Administration Manual**.

**Testlet Information Page (TIP)**

A PDF that is unique to each testlet and provides specific information to guide the test administrator in delivering the assessment.

The Testlet Information Page (TIP) for each testlet lists the materials needed or describes the attributes of the materials needed specific to a testlet.

The materials listed in the TIP are especially needed for the teacher-administered testlets at the Initial and Distal Precursor linkage levels in ELA and mathematics, and the Initial linkage level for science.

The TIP for testlets at the Initial level for science has picture response cards that must be printed before testing. Best practice is to print them in color.

Computer-delivered testlets require fewer materials than the teacher administered testlets.
**APPENDIX A. NUMBER OF TESTLETS FOR SPRING ASSESSMENTS**

Table 24 shows the number of operational testlets to expect during the spring assessment window. It is organized by grade for each subject area.

*Field test testlets in the spring are delivered after all operational testlets in a subject have been submitted.

**The high school blueprint provides coverage options for students in grades 9, 10, 11, and 12 to support the various testing requirements in different states in the consortium. Each state sets its own policy for which high school grade(s) are appropriate for DLM alternate assessments.

***For states testing end-of-instruction biology in high school, students receive 10 testlets.

HINT: Check your state’s DLM webpage for the subjects tested in your state.
APPENDIX B. FIRST CONTACT SURVEY (ALL QUESTIONS)

Current. No changes since 3/10/16.

The questions asked in the First Contact survey are included here. The test administrator completes the First Contact survey in Educator Portal. Only users with an Educator Portal role of District Test Coordinator, Building Test Coordinator, or Teacher have permission to enter student information in the First Contact survey. Other roles have permission only to access.

Asterisks indicate items that are required for all states. Other questions may be required based on state-specific directions.

HINT: The status Not Applicable is possible in the First Contact survey column, but it is not common. However, because this option is so rare, check that you are logged in as a DLM user and that the student’s information has been loaded properly into the system.

Special Education

Special Education Services

Select the student’s Primary Disability

- autism
- deaf-blindness
- deafness
- developmental delay
- emotional disturbance
- hearing impairment
- intellectual disability
- multiple disabilities
- orthopedic impairment
- other health impairment
- specific learning disability
- speech or language impairment
- traumatic brain injury
- visual impairment, including blindness
- non-categorical
- eligible individual

Educational Placement: Choose the option that best describes the student’s educational placement. “Regular Class” means a typical classroom, not a resource room or separate class.

- 80% or more of the day in Regular Class
- 40% to 79% of the day in Regular Class
- Less than 40% of the day in Regular Class
• Separate School: includes public or private separate day school for students with disabilities, at public school expense
• Residential Facility: includes public or private separate residential school for students with disabilities, at public school expense
• Homebound/Hospital Environment: includes students placed in and receiving special education in a hospital or homebound program

**SENSORY CAPABILITIES**

**Hearing**

Hearing

- No hearing loss suspected/documentated
- Questionable hearing but testing inconclusive
- Deaf or hard of hearing

Classification of Hearing Impairment

- Mild (26–40 dB loss)
- Moderate (41–55 dB loss)
- Moderately Severe (56–70 dB loss)
- Severe (71–90 dB loss)
- Profound (91+ dB loss)
- Unknown

Hearing: Mark all that apply

- Uses personal or classroom amplification (e.g., personal FM device)
- Uses unilateral hearing aid
- Uses bilateral hearing aid
- Has cochlear implant
- Uses oral language
- Uses sign language

**Vision**

Vision

- No vision loss suspected or documented
- Normal vision with glasses or contact lenses
- Blind or low vision, including vision that is not completely corrected with glasses or contact lenses
- Questionable vision but testing inconclusive

Classification of Visual Impairment: Mark all that apply

- Low vision (acuity of 20/70 to 20/200 in the better eye with correction)
- Legally blind (acuity of 20/200 or less or field loss to 20 degrees or less in the better eye with correction)
- Light perception only
• Totally blind
• Cortical visual impairment

Vision: Mark all that apply
• Requires enlarged print
• Requires tactile media (objects, tactile graphics, and tactile symbols)
• Requires or uses Braille
  o Uncontracted Braille
  o Contracted Braille
  o UEB

Technological Visual Aids: Mark all that apply
• Screen magnification device (fits over standard monitor) or software (e.g., close view for Mac, ZoomText)
• CCTV
• Screen reader and/or talking word processor
• Manual (e.g., Perkins Brailler) or Electronic (e.g., Mountbatten Brailler) Braille writing device
• Device with refreshable Braille display

Motor Capabilities and Health

Arm/Hand Control and Health
Arm and hand control: Mark all that apply
• Uses two hands together to perform tasks
• Uses only one hand to perform tasks
• Requires physical assistance to perform tasks with hands
• Cannot use hands to complete tasks even with assistance

Does the student have any health issues (e.g., fragile medical condition, seizures, therapy or treatment that prevents the student from accessing instruction, medications, etc.) that interfere with instruction or assessment?
• No
• Yes

Computer Instruction

Computer Use and Instruction
Computer Use: Select the student’s primary use of a computer during instruction
• Accesses a computer independently
• Accesses a computer independently given assistive technology
• Uses a computer with human support (with or without assistive technology)
• This student has not had the opportunity to access a computer
• This student cannot access a computer with human or assistive technology support

Why has this student not had the opportunity to access a computer during instruction?
• Student’s disability prevents the student from accessing a computer
• The equipment is unavailable
• Student refuses to try to use a computer
• I (or other educators) at this school have not had the opportunity to instruct the student on computer usage

Computer access during instruction: Mark all that apply
• Standard computer keyboard
• Keyboard with large keys or alternative keyboard (e.g., Intellikeys)
• Touch screen (e.g., touch screen computer, tablet, iPad, iPod touch)
• Standard mouse or head mouse
• Eye gaze technology (e.g., Tobii, EyeGaze Edge)
• Scanning with switches (one- or two-switch scanning)

Level of attention to computer-directed instruction
• Generally sustains attention to computer-directed instruction
• Demonstrates fleeting attention to computer-directed instructional activities and requires repeated bids or prompts for attention
• Demonstrates little or no attention to computer-directed instructional activities

Level of attention to teacher-directed instruction
• Generally sustains attention to teacher-directed instruction
• Demonstrates fleeting attention to teacher-directed instructional activities and requires repeated bids or prompts for attention
• Demonstrates little or no attention to teacher-directed instructional activities

**COMMUNICATION**

**Expressive Communication**

*Does the student use speech to meet expressive communication needs?*

• Yes
• No

*Choose the highest statement that describes the student’s expressive communication with speech*

• Regularly combines 3 or more spoken words according to grammatical rules to accomplish a variety of communicative purposes (e.g., sharing complex information, asking/answering longer questions, giving directions to another person)
• Usually uses 2 spoken words at a time to meet a variety of more complex communicative purposes (e.g., obtaining things including absent objects, social expressions beyond greetings, sharing information, directing another person’s attention, asking/answering questions, and commenting)
• Usually uses only 1 spoken word at a time to meet a limited number of simple communicative purposes (e.g., refusing/rejecting things, making choices, requesting attention, greeting, and labeling)
*Does the student use sign language in addition to or in place of speech to meet expressive communication needs?

- Yes
- No

*Choose the highest statement that describes the student’s expressive communication with sign language

- Regularly combines 3 or more signed words according to grammatical rules to accomplish a variety of communicative purposes (e.g., sharing complex information, asking/answering longer questions, giving directions to another person)
- Usually uses 2 signed words at a time to meet a variety of more complex communicative purposes (e.g., obtaining things including absent objects, social expressions beyond greetings, sharing information, directing another person’s attention, asking/answering brief questions, and commenting)
- Usually uses only 1 signed word at a time to meet a limited number of simple communicative purposes (e.g., refusing/rejecting things, making choices, requesting attention, greeting, and labeling)

Select the student’s primary sign system

- American Sign Language (ASL)
- Signed Exact English (SEE)
- Hybrid or idiosyncratic/personalized signing system

Alternate Communication

*Does the student use augmentative or alternative communication in addition to or in place of speech or sign language to meet expressive communication needs?

- Yes
- No

Choose the highest statement that describes the student’s expressive communication with augmentative or alternative communication

- Regularly combines 3 or more symbols according to grammatical rules to accomplish the 4 major communicative purposes (e.g., expressing needs and wants, developing social closeness, exchanging information, and fulfilling social etiquette routines)
- Usually uses 2 symbols at a time to meet a variety of more complex communicative purposes (e.g., obtaining things including absent objects, social expressions beyond greetings, sharing information, directing another person’s attention, asking/answering brief questions, and commenting)
- Usually uses only 1 symbol to meet a limited number of simple communicative purposes (e.g., refusing/rejecting things, making choices, requesting attention, greeting)

Augmentative or alternative communication

How many symbols does the student choose from when communicating? (choose the highest that applies)
• 1 or 2 at a time
• 3 or 4 at a time
• 5 to 9 at a time
• 10 or more at a time

What types of symbols does the student use? (choose all that apply)
• Real objects
• Tactual symbols
• Photos
• Line drawing symbol sets (Boardmaker, PCS, Symbol Stix, other)
• Text Only

What voice output technology does the student use? (choose all that apply)
• Single message devices (e.g., BIgment"
• Simple devices (e.g., GoTalk, QuickTalker, SuperTalker)
• Speech generating device (e.g., Tobii-DynaVox, PRC/PrentkeRomich)
• None

If the student does not use speech, sign language, or augmentative or alternative communication, which of the following statements best describes the student’s expressive communication? Choose the highest statement that applies
• Uses conventional gestures (e.g., waving, nodding and shaking head, thumbs up/down), looking, pointing, and/or vocalizations to communicate intentionally but does not yet use symbols or sign language
• Uses only unconventional vocalizations (e.g., grunts), unconventional gestures (e.g., opening mouth wide to indicate hunger), and/or body movement to communicate intentionally
• Exhibits behaviors that may be reflexive and are not intentionally communicative but can be interpreted by others as communication (e.g., crying, laughing, reaching for an object, pushing an object away)

**Receptive Communication**

Receptive communication: MARK EACH ONE to show how consistently the student uses each skill. (1) 0% to 20% of the time = Almost never, (2) 21% to 50% of the time = Occasionally, (3) 51% to 80% of the time = Frequently, (4) More than 80% of the time = Consistently.

If the student previously demonstrated and no longer receives instruction, mark “More than 80%.”

A. Can point to, look at, or touch things in the immediate vicinity when asked (e.g., pictures, objects, body parts)
B. Can perform simple actions, movements or activities when asked (e.g., comes to teacher’s location, gives an object to teacher or peer, locates or retrieves an object)
C. Responds appropriately in any modality (sign, gestures, facial expressions) when offered a favored item that is not present or visible (e.g., “Do you want some ice cream?”)
D. Responds appropriately in any modality (sign, gestures, facial expressions) to single words that are spoken or signed
E. Responds appropriately in any modality (sign, gestures, facial expressions) to phrases and sentences that are spoken or signed
F. Follows two-step directions presented verbally or through sign (e.g., gets a worksheet or journal and begins to work, distributes items needed by peers for a lesson or activity, looks at requested or desired item and then looks at location where it should go)

LANGUAGE

Primary Language

Is English the student’s primary language?

- Yes
- No

Is English the primary language spoken in the student’s home?

- Yes
- No
- Unknown

Is English the primary language used for the student’s instruction?

- Yes
- No

ACADEMIC

*Reading Skills – Entire Section is Required

Reading skills: MARK EACH ONE to show how consistently the student uses each skill. (1) 0% to 20% of the time = Almost never, (2) 21% to 50% of the time = Occasionally, (3) 51% to 80% of the time = Frequently, (4) More than 80% of the time = Consistently.

If the student previously demonstrated and no longer receives instruction, mark “More than 80%.”

A. Recognizes single symbols presented visually or tactualy (e.g., letters, numerals, environmental signs such as restroom symbols, logos, trademarks, or business signs such as fast-food restaurants)
B. Understands purpose of print or Braille but not necessarily by manipulating a book (e.g., knows correct orientation, can find beginning of text, understands purpose of text in print or Braille, enjoys being read to)
C. Matches sounds to symbols or signs to symbols (e.g., matches sounds to letters presented visually or tactualy, matches spoken or signed words to written words)
D. Reads words, phrases, or sentences in print or Braille when symbols are provided with the words
E. Identifies individual words without symbol support (e.g., recognizes words in print or Braille; can choose correct word using eye gaze)
F. Reads text presented in print or Braille without symbol support but WITHOUT comprehension
G. Reads text presented in print or Braille without symbol support and WITH comprehension (e.g., locates answers in text, reads and answers questions, retells after reading, completes maze task)
H. Explains or elaborates on text read in print or Braille

Reading Skills
Student’s approximate instructional level of reading text with comprehension (print or braille):
Mark the highest one that applies
- Above third grade level
- Above second grade level to third grade level
- Above first grade level to second grade level
- Primer to first grade level
- Reads only a few words or up to pre-primer level
- Does not read any words when presented in print or Braille (not including environmental signs or logos)

*Math Skills Entire Section is required
Math skills: MARK EACH ONE to show how consistently the student uses each skill. (1) 0% to 20% of the time = Almost never, (2) 21% to 50% of the time = Occasionally, (3) 51% to 80% of the time = Frequently, (4) More than 80% of the time = Consistently.
If the student previously demonstrated and no longer receives instruction, mark “More than 80%.”
A. Creates or matches patterns of objects or images
B. Identifies simple shapes in 2 or 3 dimensions (e.g., square, circle, triangle, cube, sphere)
C. Sorts objects by common properties (e.g., color, size, shape)
D. Counts more than two objects
E. Adds or subtracts by joining or separating groups of objects
F. Adds and/or subtracts using numerals
G. Forms groups of objects for multiplication or division
H. Multiplies and/or divides using numerals
I. Uses an abacus
J. Uses a calculator
K. Tells time using an analog or digital clock
L. Uses common measuring tools (e.g., ruler or measuring cup)
M. Uses a schedule, agenda, or calendar to identify or anticipate sequence of activities
**Writing Skills Entire Section is Required**

Indicate the highest level that describes the student’s writing skills. Choose the highest level that the student has demonstrated even once during instruction, not the highest skill demonstrated consistently.

Writing includes any method the student uses to write using any writing tool that includes access to all 26 letters of the alphabet. Examples of these tools include paper and pencil, traditional keyboards, alternate keyboards and eye-gaze displays of letters.

A. Writes paragraph length text without copying using spelling (with or without word prediction)
B. Writes sentences or complete ideas without copying using spelling (with or without word prediction)
C. Writes words or simple phrases without copying using spelling (with or without word prediction)
D. Writes words using letters to accurately reflect some of the sounds
E. Writes using word banks or picture symbols
F. Writes by copying words or letters
G. Scribbles or randomly writes/selects letters or symbols

**Science Skills Entire Section is required (This section is only visible for states administering the DLM science assessment.)**

Science skills: MARK EACH ONE to show how consistently the student uses each skill. (1) 0% to 20% of the time = Almost never, (2) 21% to 50% of the time = Occasionally, (3) 51% to 80% of the time = Frequently, (4) More than 80% of the time = Consistently.

If the student previously demonstrated and no longer receives instruction, mark “More than 80%.”

A. Sorts objects or materials by common properties (e.g., color, size, shape)
B. Identifies similarities and differences
C. Recognizes patterns
D. Compares initial and final conditions to determine if something changed
E. Uses data to answer questions
F. Identifies evidence that supports a claim
G. Identifies cause and effect relationships
H. Uses diagrams to explain phenomena
