
Kite Student Portal– Whitelist Settings

During testing, Kite® Student Portal passes information to our servers. If your location uses a firewall, be sure to whitelist the following domains so that Kite Student Portal will function correctly.

Whitelist

```
*.kiteaai.org  
*.googlevideo.com  
ssl.google-analytics.com/*
```

Files that Need Access Through the Firewall

In addition, consider allowing the following files access through the firewall:

```
kitestudentportal.exe  
kite.exe
```
