- Mathematics
 - Grades 3-8 and high school
 - States choose the grade(s) in high school
- Science
 - Grade bands 3-5, 6-8, and high school
 - States choose the grade(s) within each grade band

6

Standards: Essential Elements

- Essential Elements
 - are the learning targets for the DLM assessments
 - provide a bridge from grade-level content standards to academic expectations for students with the most significant cognitive disabilities
 - align to states' grade-level standards

7

Blueprints

- Blueprints
 - list the Essential Elements available for assessment
 - for each grade
 - for each subject
 - include requirements regarding the number of ELA and mathematics Essential Elements to be assessed
 - are organized into groups of related Essential Elements
 - by claims and conceptual areas for ELA and mathematics
 - by domains for science

8

Testlets

- Testlets are short assessments that comprise the assessment as a whole.
- The number of testlets varies by grade and subject based on test blueprint requirements.
- Each testlet includes 3-9 conceptually-related items.
- A student typically takes 5-15 minutes to complete a single testlet.

9

Testlet Structure

- Each testlet begins with an engagement activity to
 - spark student interest
 - activate prior knowledge
 - provide a context for the items that follow
- Items follow the engagement activity.

10

Item Types

- Single-select multiple choice (most common)
- Multiple choice multi-select
- Drag and drop sorting
- Matching
- Select text

11

Testlet Types

- Computer-delivered (more common)
- Teacher-administered
 - teacher = test administrator

12

Linkage Levels

- Linkage levels
 - help make the academic content of the Essential Elements accessible to the widest range of participating students as possible
 - provide multiple levels of complexity for each Essential Element
- Each testlet a student takes is designed to assess one particular linkage level.
 - Writing testlets are an exception.

13

13

Linkage Levels for ELA and Mathematics

Linkage Levels	Complexity
Initial Precursor	Least complex; foundational
Distal Precursor	Knowledge and skills needed to reach the target
Proximal Precursor	Provides access to the target
Target	Aligns to content of the Essential Element
Successor	Progresses beyond the target

14

14

Linkage Levels for Science

Linkage Levels	Complexity
Initial	Least complex
Precursor	More complex
Target	Most complex; aligns with Essential Element

15

15

Assessment Windows

- Fall (early September to mid-December)
- Spring (early February to mid-May)

16

17

17

Attention!

- Results from all ELA and mathematics testlets taken during **BOTH** the fall and spring windows are used to determine the student's final, end-of-year score report.
- Results from science testlets taken during the spring window only determine a student's final, end-of-year score report for science.
