

## English Language Arts Materials Collections 2026 Instructionally Embedded Model Spring Window

Dynamic Learning Maps® (DLM®) testlets sometimes call for the use of specific materials. The Testlet Information Page (TIP) for each testlet identifies these materials. Sometimes materials are required and cannot be substituted, but substitutes are allowed in most cases. If a testlet requires materials, the TIP will state the specific materials mentioned in the testlet and describe their attributes so that test administrators can find appropriate substitutions. For more information about substituting materials, see the TEST ADMINISTRATION MANUAL sections titled Teacher-Administered Testlets and Prepare to Administer a Testlet.

The TIP is provided in the Instruction and Assessment Planner in Kite® Educator Portal when each testlet is assigned. Since the teacher chooses which Essential Elements and linkage levels to assess during instructionally embedded assessments, the materials needed or recommended to assess each student are unknown before the testlet is assigned. However, the materials used in different testlets often have common traits, giving teachers the ability to identify commonly available objects ahead of time that are likely to be useful when administering English language arts (ELA) testlets. Teachers may collect these materials and use them during instruction. The most useful materials are familiar to the student and available before the teacher begins assigning testlets in the Instruction and Assessment Planner.

The following list contains commonly needed materials in ELA testlets and gives test administrators more opportunity to prepare for the ELA alternate assessment prior to the opening of the assessment window. The tables in this document summarize lists of materials per grade level for general testlets and, where appropriate, for students who are blind or have visual impairments. **Materials may be substituted unless the TIP specifically states “No substitutions allowed.”**

Hints for using this list:

- Look at the whole list for each grade and find materials that can meet multiple purposes. Note the types of materials mentioned more than once.
- Find materials that already exist in the classroom or are easily found somewhere in the school building.
- Pick materials that are familiar to the student.
- Remember that in most cases, materials can be substituted if they have the same attributes as those on the list. Examples of possible substitutions are found in Table 1.
- Materials substitutions are listed for individual testlets on the corresponding TIP.
- The student's safety should be the primary concern when choosing materials or substitutions.

**Table 1***Example ELA Materials Substitutions*

Example Materials Description	Possible Substitution
Two books and one magazine, all of which have pages, words, and a cover.	Two objects that belong to the same subgroup (e.g., two backpacks) and a third object that belongs to a different subgroup within the broader category (e.g., one purse from the broader category of bags).
The person associated with teaching the student art.	The person associated with a different familiar routine (e.g., person who teaches reading).

**Contained in this document:**

- Lists by grade of materials commonly used in ELA testlets
- Lists by grade of materials that may be used to administer testlets to students who are blind or have visual impairments. Some ELA testlets are special forms designed for these students, while others are general testlets that have been adapted to make them accessible for students who are blind or have visual impairments.
